## **COOCH BEHAR DISTRICT**

**2020-21**

# INDEX

## Chapter - 1 : Disaster

1.01: Disaster .....	1
1.02: Disaster Management.....	1
1.03: Objective.....	1
1.04: Types Of Disasters.....	1
1.05: Overview of the District.....	2
1.06: District Profile.....	2
1.07: Administrative Units.....	3
1.08: Demographic Details .....	5
1.09: Distribution Of Population By Sex ( <i>As Per Census, 2011</i> ) .....	5
1.10: Caste-wise Distribution Of Population ( <i>As Per Census, 2011</i> ) .....	6
1.11: Household Details: As Per Census 2011: .....	7
1.12: Distribution Of Population: By Age-Groups ( <i>As Per Census, 2011</i> ) .....	7
1.13 Type Of Workers: As Per Census 2011: .....	7
1.14: Disabled Persons: By Type & By Sex In Cooch Behar, <i>As Per Census 2011</i> .....	7

## Chapter - 2 : **HAZARD, VULNERABILITY, CAPACITY AND RISK ASSESSMENT**

2.1: HISTORY OF DISASTER AND PROBABILITY OF DISASTER EPISODES IN THE DISTRICT

2.2: *SEASONALITY OF HAZARD :*

2.3 RISK ASSESSMENT

2.4 VULNERABILITY ANALYSES

2.5 EVACUATION PLAN

2.6 List of BOP in different Blocks

2.7 INFRASTRUCTURE VULNERABILITY AGAINST FLOOD

2.8 UNPROTECTED AREA (VULNERABLE ZONE):

## Chapter - 3 : **INSTITUTIONAL ARRANGEMENTS FOR DM**

3.1 INTRODUCTION

3.2 IMPORTANT TELEPHONE NUMBERS

3.3 CIVIL DEFENCE

3.4 COOCH BEHAR IRRIGATION DIVISION

## Chapter - 4 : **PREVENTION AND MITIGATION MEASURES**

4.1 SECTOR WISE VULNERABILITY REDUCTION MEASURES :

## Chapter - 5: **PREPAREDNESS MEASURES**

5.01: AGRICULTURE

5.02: ANIMAL RESOURCE DEVELOPMENT

5.03: HEALTH

05.04 Jalpaiguri Irrigation Division.

05.05 : COOCHBEHAR IRRIGATION DIVISION, COOCHBEHAR

## **CHAPTER 6: CAPACITY BUILDING AND TRAINING MEASURES**

## **CHAPTER 7: RESPONSE AND RELIEF MEASURES**

**7.1: CRISIS-RESPONSE STRUCTURE OF THE SUB DIVISION**

**7.2: Evacuation, Search and Rescue Response**

**7.3: CHECKLISTS: DO'S AND DON'TS**

## **CHAPTER 8: RECONSTRUCTION, REHABILITATION AND RECOVERY MEASURES**

## **CHAPTER 9: FINANCIAL RESOURCES FOR IMPLEMENTATION OF DDMP**

## **CHAPTER 10: PROCEDURE AND METHODOLOGY FOR MONITORING, EVALUATION, UPDATION AND MAINTENANCE OF DDMP**

## **CHAPTER 11: COORDINATION MECHANISM FOR IMPLEMENTATION OF DDMP**

## **CHAPTER 12: STANDARD OPERATING PROCEDURES (SOPs) AND CHECK LIST**

## **SECTION-A :- RESOURCE AVAILABILITY**

## **CHAPTER 13:- ANALYSIS OF VULNERABILITY**

## **APPENDIS 14 : 1. AIRPORT AUTHORITY, 2. HERITAGE BUILDING.**

## **APPENDIS 15 : 1. THE PLAN FOR PROCUREMENT OF MACHINERY 2. THE PLAN FOR MOCK DRILL 3. THE DETAIL OF MAJOR DISASTERS FACED BY THE DISTRICT AND ITS FINANCIAL LOSS**

## CHAPTER –1

### 1.01: DISASTER

“A **Disaster** is a sudden, calamitous event that causes serious disruption of the functioning of a community or a society involving widespread human material economic or environmental losses and impacts which exceeds the ability of the affected community or society to cope using its own resources.” ---- **UN International Strategy for Disaster Reduction, (UNISDR).**

### 1.02: DISASTER MANAGEMENT

The Red Cross and Red Crescent societies define Disaster Management as “the organisation and management of resources and responsibilities for dealing with all humanitarian aspects of emergencies, in particular preparedness, response and recovery in order to lessen the impact of disasters.”

The United Nations defines Disaster Management as “the systematic process of using administrative directives, organizations, and operational skills and capacities to implement strategies, policies and improved coping capacities in order to lessen the adverse impacts of hazards and the possibility of disaster.”

Against this back drop a plan has been prepared namely “**Cooch Behar District Disaster Management Plan, 2018**”

### 1.03: OBJECTIVE :

- To assess the risks and vulnerabilities associated with various disasters;
- To develop appropriate disaster prevention and mitigation strategies;
- To formulate an inter-sectoral plan at the district level to mitigate disasters of different natures in a convergent manner.
- To minimize the disaster risk and vulnerability of people and infrastructure in the district
- To mainstream disaster management concerns into the developmental planning process.
- To define the roles and responsibilities of various stakeholders in disaster risk management & to ensure optimum co-ordination with all stakeholders related to disaster management viz line departments, Panchayat bodies, Army, BSF etc
- To build the capacity of all stakeholders in the district to cope with the disasters and promote community based disaster management.

### 1.04: Types of Disasters

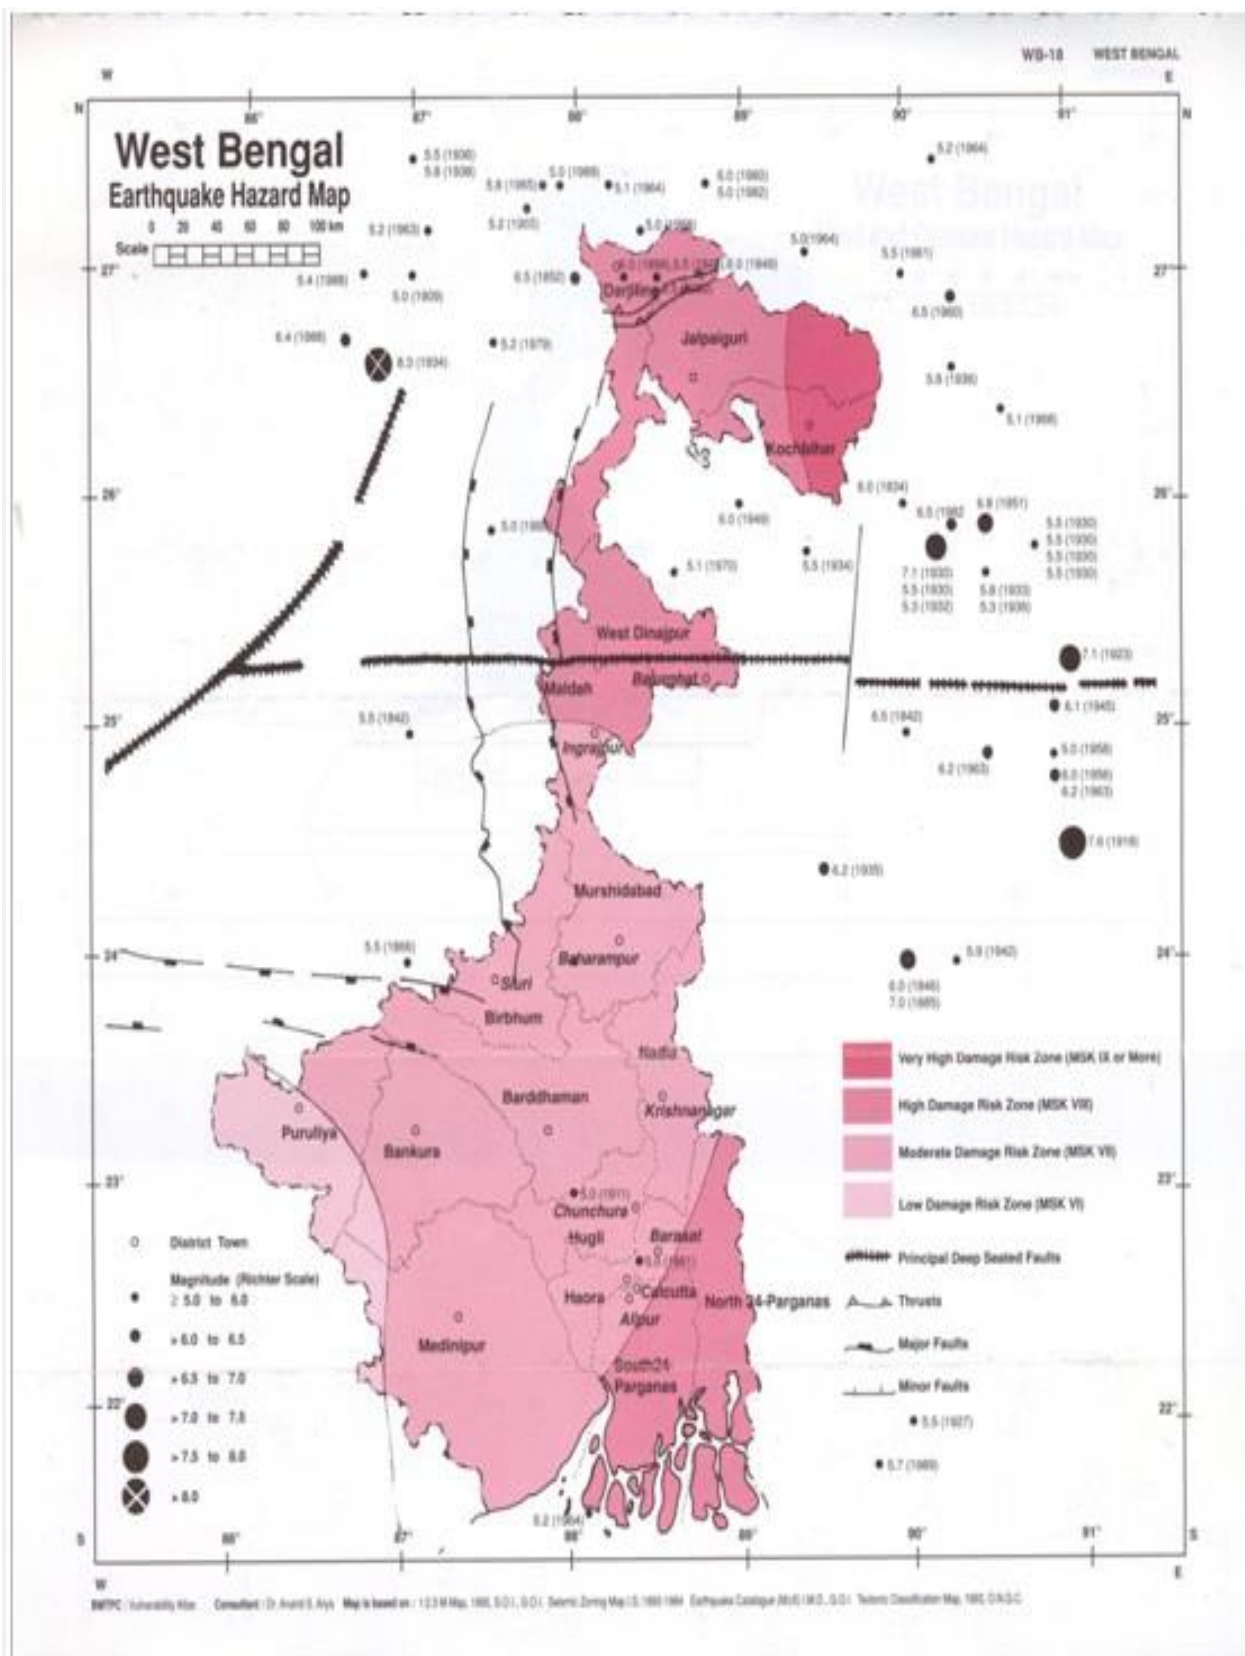

<i>Common Natural Disasters</i>	<i>Man Made disasters</i>
 <b>Cyclone</b>	 <b>Accident- Road/ Railway</b>
 <b>Flood</b>	 <b>Rasta Roko</b>
 <b>Drought</b>	 <b>Fire- House / Forest</b>
 <b>Earthquake</b>	
 <b>Hail Storm/ Whirl wind</b>	

### 1.05: OVERVIEW OF THE DISTRICT:

**Location:** Cooch Behar is the North Eastern district of the Jalpaiguri Division. Geographically it forms part of Himalayan Tarai Region of West Bengal.

**Area and Administrative Division:**

Cooch Behar district falls within Zone IV, which is the High Damage Risk Seismic Zone & Zone V, which is the Highest Risk Seismic Zone. Eastern part of Cooch Behar is within Zone V.

**1.06: District Profile**

Area	3388.34 sq km																								
Latitude	25°57'47" & 26°36'20" North																								
Longitude	88°47'44" & 89°54'35" East																								
Bordering Countries/States	<b><u>Bangladesh</u> in the south &amp; south west.</b> <b>District Alipurduar in the north.</b> <b>District Jalpaiguri in the west.</b> <b>State of <u>Assam</u> in the east.</b>																								
Major rivers	<p>The rivers flow in a slanting course from north-west to south-east. Six river systems cut through the district flowing in a south-easterly direction. From the west to east these are: - the Tista system, Jaldhaka system, Torsa, Kaljani, Raidak and Gadadhar system. Some notable rivers are :-</p> <table><tr><td>1</td><td>Dharla</td><td>5</td><td>Jaldhaka</td><td>9</td><td>Raidak - II</td></tr><tr><td>2</td><td>Dudua</td><td>6</td><td>Kaljani</td><td>10</td><td>Sankosh</td></tr><tr><td>3</td><td>Gadadhar</td><td>7</td><td>Mansai</td><td>11</td><td>Teesta</td></tr><tr><td>4</td><td>Ghargharia</td><td>8</td><td>Raidak-I</td><td>12</td><td>Torsa</td></tr></table>	1	Dharla	5	Jaldhaka	9	Raidak - II	2	Dudua	6	Kaljani	10	Sankosh	3	Gadadhar	7	Mansai	11	Teesta	4	Ghargharia	8	Raidak-I	12	Torsa

### 2.3 RISK ASSESSMENT

Type of Hazards	Time of Occurrence	Potential Impact	Vulnerable areas
<b>Cyclone</b>	April - June	Loss of lives, animal, crop income, livelihood, infrastructures	All 5 Sub Divisions
<b>Flood</b>	June - September	Loss of lives, animal, crop income, livelihood, infrastructures, displacement	All 5 Sub Divisions
<b>Drought</b>			
<b>Earthquake</b>	Any Time	Loss of lives, animal, crop income, livelihood, infrastructures, displacement	All 5 Sub Divisions
<b>Fire</b>	Any Time	Loss of lives, animal, crop income, livelihood, infrastructures, displacement	All 5 Sub Divisions
<b>Chemical Accidents</b>			
<b>Boat capsize</b>	June - September	Loss of lives and property	All 5 Sub Divisions
<b>Epidemic</b>	Any Time	Loss of lives and property	All 5 Sub Divisions
<b>Accident</b>	Any Time	Loss of lives and property	All 5 Sub Divisions
<b>Lightning</b>	June - September	Loss of lives, animal	All 5 Sub Divisions

### 2.4 VULNERABILITY ANALYSES :

**Major Rivers in the Cooch Behar District and Block likely to be affected by Flood.**

Major Rivers in the Cooch Behar District	Block likely to be effected by Flood.
Teesta	Mekliganj and Haldibari
Jaldhaka / Mansai	Mathabhanga-I / II, Dinhata-I and Sitai
Torsa	Cooch Behar-I / II
Kaljani	Cooch Behar-I / II , Tufanganj-I & Dinhata-II
Raidak-I	Tufanganj-I
Raidak-II	Tufanganj-II
Sankosh	Tufanganj-II

**3.3 CIVIL DEFENCE**

**Civil Defence:** Civil Defence is an integral part of the Disaster Mitigation plan. They play a major role in rescue operation. The Civil Defence Volunteers have been given training in different occasions in rescue operation. They have been trained on modern rescue equipments as Quick Response teams (QRT). The brief highlights of the arrangements of Civil Defence:

- **Three** rescue vehicles fitted with the modern equipments are at the disposal of the District.
- Like the previous year INF Boat and OBM's with modern accessories will be stationed to meet with any exigencies at **Twelve** strategic locations, one for each Block.

- 

**The list of strategic locations:**

Sl. No.	Name of the strategic location
1	Mathabhanga I Development Block
2	Mathabhanga II Development Block
3	Dinhata SDO Office
4	Tufanganj I Development Block
5	Tufanganj II Development Block
6	Cooch Behar II Development Block
7	Mekhliganj SDO Office
8	Haldibari Development Block
9	District Head Quarter

- The Civil Defence Volunteers have been trained in different occasion from all over the District in order to respond to any kind of eventuality. The Sub-division wise figure is given below:

Sl. No.	Name of the Sub-division	No. of QRT trained CDV	No. of trained CDV(Aquatic)	Total
1.	Sadar	27	17	44
2.	Dinhata	16	14	30
3.	Mathabhanga	7	13	20

## CHAPTER 4:

### PREVENTION AND MITIGATION MEASURES

#### MITIGATION PLAN

##### 4.1 SECTOR WISE VULNERABILITY REDUCTION MEASURES :

Type/ of Sector	Sub sector	Mitigation measures	Department Concerned	Time Frame
<b>Infrastructure Development</b>	IEC activities	Wall writing, IEC on Hazard risk information	Disaster Management Dept.	Throughout the year.
	Road	Restoration of all damaged roads as identified	PWD/Zilla Parishad	Before the monsoon strikes
		PWD (Roads) will take care of approach roads towards specific areas assessed to be vulnerable. Gram Panchayat Pradhans are to take appropriate measures pertaining to their respective areas in matters of ensuring access to village roads especially in vulnerable areas. In this regard sustainability approach needs to be taken.	Irrigation. PWD (Roads) Gram Panchayat, Panchayat Samiti and Zilla Parishad	Before the monsoon strikes
	Embankment	Protection of Weak Bundhs as identified on the both sides of river from erosion	Irrigation Department	May-June
	Bridges	PWD (Roads) will take care of bridges and culverts towards specific areas assessed to be vulnerable. Gram Panchayat Pradhans are to take appropriate measures pertaining to their respective areas in matters of ensuring access to bridges and culverts especially in vulnerable areas.	PWD Gram Panchayat, Panchayat Samiti and Zilla Parishad	Before the monsoon strikes
	Safe Shelters	-A list of schools to be used as shelters will be available with the GP and Block administration along with the names and contact nos. of the nodal persons. Similarly number of victims who are likely to take shelter should be made available with the nodal teachers of the concerned schools. All nodal teachers to be included as members of the BDMC and GPDMC Meeting of the nodal teachers with block and panchayat officials will be conducted. Emergency Preparedness and Response plans of such schools will be prepared and shared with the Block Officials. Required nos of toilets, water points, cooking arrangements, ramps etc. will be in place much before the hazard. Students, teachers and parents teams will be formed for shelter management Specific duties will be allocated and check list will be prepared and made available to all concerned teams. -Do's & Don't's with important contact nos will be written in local language and put in prominent places. -Moreover other safe shelters should be constructed at high land, with good communication facility, Construction code should be followed	Gram Panchayat, Panchayat Samiti and Zilla Parishad & District Inspector of Schools/ Sub Inspector of Schools/Respective Head teachers	May-June

	Communication	<ul style="list-style-type: none"> <li>-Telephone department will ensure and maintain uninterrupted communication system across the district, especially in vulnerable areas.</li> <li>-List of important telephone numbers will be made available to all concerned.</li> <li>-Solar Chargers with multiple charging facilities will be in place in sufficient nos. for charging the mobile phones. Police Wireless Set to be placed in all the PS and should be open for 24 hrs</li> </ul>	BSNL SDO BDO Panchayat Samity Police	Before the monsoon strikes
	Drinking water and sanitation	<p>Physical verification of the status of all the drinking water sources and community toilets</p> <p>Appropriate corrective measures will be taken based on the information, received by the verification team. Adequate water facility and distribution will be ensured in all villages by installing new PHE connections and tube wells. Awareness generation Campaign against open defecation will be done extensively under Nirmal Bangla Abhiyan.</p> <p>Identify the place for temporary toilets and bathing places for men and women separately.</p>	Health & Family Welfare Panchayat Samity Gram Panchayat Public Health Engineering NGOs	Before March

	Power	<ul style="list-style-type: none"> <li>-Physical verification of the cables, transformers, street lights etc will be done and adequate corrective measures will be taken to avoid inconveniences during and post disaster periods.</li> <li>-Solar panels will be fitted to avoid darkness during power cut.</li> <li>-List of generators with telephone nos. of the contact persons will be made available with the concerned officials so that they can hire the services as and when required, or these generators can be put on stand by condition in the safe shelters. Arrangements of the fuel for Generators to be kept ready.</li> </ul>	West Bengal State Electricity Distribution Company Limited (WBSEDCL) WEBREDA	Before May-June
	Technology dissemination	<ul style="list-style-type: none"> <li>-Project planners and managers will make informed choices about the most appropriate technologies for risk reduction in particular contexts. So called 'appropriate' or 'alternative' technologies are well accepted to local level application and community management.</li> <li>-Such technologies can use a range of materials that are easily obtained locally (such as stone, wood, earth), recycled materials and living trees and plants.</li> <li>-Active volunteers, villagers will be informed about the technology being taken up through different orientation programme and meetings.</li> </ul>	Disaster Management Department Panchayat Samity Gram Panchayat	Before May-June

Health	IEC activities	<p>IEC materials will be developed on Use of Halogen Tablets, how to prepare safe drinking water using Sodium Hypochlorite, safe use of bleaching powder, how to prepare ORS,</p> <p>-Do's and Don'ts of Sanitary habits, time and dosages of vaccines, how to identify poisonous and non-poisonous snakes bites, First Aid – use of bandages, CPR, etc issues on different materials for distribution amongst the mass.</p>	Health & FW Department, NGO	Before March
--------	----------------	--	-----------------------------	--------------

Health	IEC activities	<p>Health and Family Welfare department will keep ready of sufficient quantum of bleaching powder, halogen tabs. BMOHs will arrange for medicine during and post flood situation</p>	Health & FW Department, NGO	Before March
--------	----------------	--	-----------------------------	--------------

Animal Resource Development	Vaccination	Livestock Department, will take necessary steps to ensure stock in respect of cattle fodder as assessed and the VS will arrange for cattle vaccine etc. to combat flood situation. VS will also complete the cattle vaccination before heavy rainfall. Pradhans will disseminate the idea of cattle vaccination before monsoon.	Animal Resource Development Department	May-June
	Training	Arrangements of training for Local youths club members, Farmers, and members of SHGs to be made on the health related issues and vaccination, animal care and facilities available for insurance.	Health & Family Welfare, Animal Husbandry, GP, NGO	Throughout the year
Livelihood Sector	Awareness	The dissemination of information promptly and correctly is the prime focus of risk management. Vulnerable Communities need to know about the hazards and risks they may encounter and the measures they can take to mitigate and prepare for potential disasters. Without such knowledge, they cannot easily protect themselves. Development and disaster professionals also need to know about the views and priorities of the target vulnerable groups.		
		The aim of awareness / public education programme is to create what is often called a 'culture of safety', where awareness of risk and adoption of risk reduction measures are part of daily life. It is relatively easy to improve understanding of hazards and risks and how to deal with them, but harder to change people's behaviour so that they take up appropriate measures, individually or collectively.		

Livelihood Sector	Agriculture	<p>-Use of Bio- composed, bio- fertilizer, seed bank preparation, minimum use of chemical fertilizer, promotion of effective contingency crop planning to deal with year to year climate variations.</p> <p>-Promotion of effective crop diversification program including the use of hazard resistant crops, to deal with shifts in climate patterns.</p> <p>-Ensuring sustainable livelihoods in areas of recurrent climate risks by promoting supplementary income generation from off-farm (e.g. animal husbandry) and non-farm activities (e.g. handicrafts).</p> <p>-Promotion of effective insurance and credit schemes to compensate for agricultural related damage and losses to livelihoods due to natural.</p>	Agriculture Department	Throughout the Year
	Fishery	People engaged with fishing will be covered under mass awareness programme	Fisheries Department	Throughout the Year
		Communities will be imparted training on growing Ornamental fishes as an alternative livelihood programme	Fisheries Department	Throughout the Year
	Allied activities	<p>Disruption of electricity supply is the major impact in most of the vulnerable areas. Food &amp; Supplies Department, will take all possible actions for a buffer stock of 4000 lts of Kerosene Oil.</p> <p>-Communities will be trained to have their Family Survival Kits ready</p>	Disaster Management Department, NGOs	May-June
	Horticulture	Saplings of good quality fruit bearing trees will be supplied to the villagers.	Horticulture & FPI Department	Seasonal

Insurance	IEC activities	IECs will be developed to generate awareness and educate people on the benefits of the insurance, different insurance schemes, how to apply, whom to contact, etc. A Hand Bill depicting the story of a vulnerable family having the similar experience and insurance coverage of their animals, crops and construction and how they were benefited after disaster strikes will be published.	Disaster Management Department, Insurance Companies	Throughout the Year
-----------	----------------	--	---	---------------------

	Infrastructure	-Insurance camps will be organized jointly by the Disaster Management Department, Insurance Companies and NGOs on the benefits of insuring buildings and other infrastructures, premiums to be paid, advantages and disadvantages of different schemes for the concerned families. -Special efforts will be there in SHG and FC trainings on insurance on the benefits of insuring buildings and other infrastructures.	Disaster Management Department, Insurance Companies, NGOs	Throughout the Year
	Livelihood	-Insurance camps will be organized jointly by the Disaster Management Department, Insurance Companies and NGOs on the benefits of insuring crops, animals and other essential equipments premiums to be paid, advantages and disadvantages of different schemes for the concerned families. -Special efforts will be there in SHG and FC trainings on insurance on the benefits of insuring buildings and other infrastructures on the benefits of insuring crops, animals and other essential equipments.	Disaster Management Department, Insurance Companies, NGOs DRDC	Throughout the Year
	Life	-Insurance camps will be organized jointly by the Disaster Management Department, Insurance Companies and NGOs on the benefits of Life insurance, health insurance, accident insurance etc. premiums to be paid, advantages and disadvantages of different schemes for the concerned families. -Special efforts will be there in SHG and FC trainings on insurance on the benefits of insuring buildings and other infrastructures on the benefits of insuring crops, animals and other essential equipments.	Disaster Management Department, Insurance Companies, NGOs	Throughout the Year

## **CHAPTER 5:**

### **PREPAREDNESS MEASURES**

Planning is the one of the key elements in the Preparedness cycle. Preparedness cycle illustrates the way the plans are continuously evaluated and improved through a round of planning, organizing, training, equipping, exercising, evaluating and taking corrective actions.

1. **IRT:** As per NDMA's IRS guidelines which prescribe Incident Response Team (IRT) at District, Sub-Division, Tehsil and Block level should be constituted under the written directives of District Magistrate (DM). These teams will include experienced officers / employees at all levels and respond to all natural and man-made disasters. The lowest administrative unit (Sub-Division, Tehsil or Block) will be the first responder as the case may be. IRT at all levels will have same structure, i.e. IC supported with Operation, Planning and Logistic sections. The IRTs are to be pre-designated at all levels.
2. **District Emergency Operations Centre (DEOC):** District Emergency Operations Centre becomes a nodal point for overall coordination of planning and response. Its main duty is to ensure that the EOC facility has required communication (connecting all stakeholders vertically and horizontally), Decision support system, alert and warning system in working conditions.

#### **EOC SOP**

1. Emergency numbers existing for Police, Fire and Medical support etc. are linked to the EOC for response, command and control under an SOP. For e.g., if there is any fire incident, the information should not only reach the fire station but also the EOC and the nearest hospital to gear up the emergency medical service.
2. NGOs carry out their activities in an equitable and non-discriminatory manner. Set up wherever possible an NGO Coordination Centre.
3. Ensure that telephone directory of all ESF is prepared and available with EOC and members of IRTs.
4. Ensure that adequate exercises are conducted for testing the plan and gaps analyzed.
5. Outline plan to receive support from State and Central Government in a major disaster (e.g. helipads, evacuation, food distribution, medical support).

**PREPAREDNESS OF LINE DEPARTMENT****5.01: AGRICULTURE**

**Introduction:** - Coochbehar, the North Eastern district of West Bengal is situated between 26°57'40'' N to 26°32'20'' N and 88°47'40'' to 89°54'' E Latitude. The average rainfall varies from 3300 to 3400mm. Pre monsoon rainfall starts from March and it continues to October. During last year the pre monsoon cyclone affected the crops maize Jute, Maize and Boropaddy. The Cyclone normally hits the district within last week of March to April. Early and Late flood both are common in this district. In this situation the following precautionary measures are normally taken to combat the situation. However the actual compensation is provided by the Department after the damage is assessed.

Some salient features in relation to flood or flood-like situation arising in this district are furnished below:-

**AGRICULTURE AT A GLANCE IN COOCH BEHAR DISTRICT.**

1	Total geographical area	338700 HA
2	Net area shown	250611 HA
3	Cropping Intensity	209%
4	No. of Bargadars	85959 nos.
5	No of Patta Holders	141865 nos.
6	No. of small farmers	50748 nos
7	No of Marginal Farmers	249437 nos
8	Total area of Kharif crops	255000 HA
9	Flood area of different Sub divisions	Cooch Behar Sadar..15970 HA Dinhata 9995 HA Mathabhanga 10450 HA Mekhliganj- 5585 HA
10	Total Flood Prone Areas of Cooch Behar	42000 HA
11	Normal Rainfall	3344.6 mm
12	Rainfall during June to September (Average of last 5 years)	3600 mm

**1) PREPAREDNESS FOR FLOOD CONTROL:-**

	<b><u>PLAN TO COMBAT FLOOD/PRE MONSOON CYCLONE</u></b>
	<b><u>PLAN FOR PRE MONSOON CYCLE</u></b>
1	Distribution of Jute seed kit and urea if cyclone affected within April.
2	Distribution of Paddy seed kit for preparation of Paddy seed bed.
3	Distribution of vegetable seeds like Brinjal, Chillies may be done.
	<b><u>PLAN FOR EARLY FLOOD</u></b>
1	Raising of Community Nursery Seed Bed in Govt Farm( 9 Nos of farm) x0.4 ha = 3.6 ha
2	Storing of short duration variety Paddy seed at govt farm & dealers end throughout the district.
3	Preparation of seed bed by <b>DAPOG</b> method.
4	Adoption of <b>SRI</b> method for Rice cultivation.
5	Adoption of closer spacing and use of more seedlings per hill.
6	Adoption of <b>Double transplanting</b> .

7	Adoption of Rice cultivation through <b>DRUM SEEDER</b> .
8	Storing of Paddy Straw in Govt. farms.
9	Day to day transmission of Rainfall data.
10	Recommendation of Crop Loan under KCC.
11	Ensure the crop insurance .
Distribution of following seed kit with fertiliser –	
i)	<b>Paddy : 40000 @ 10 kg/kit</b>
ii)	<b>Black Gram(Kalai) : 5000 @ 4kg/kit</b>
iii)	<b>Urea/10:26:26 : 50000 @10 kg/kit</b>
<b><u>PLAN FOR LATE FLOOD</u></b>	
Regular visit & reporting.	
Estimation of crop damage area & loss of production.	
Preparation of the list of affected farmers.	
Compensation through Rabi seed kits (need based) of following crops-	
i)	<b>Mustard : 30000 @ 1kg/kit</b>
ii)	<b>Maize : 25000 @ 3kg/kit</b>
iii)	<b>Wheat : 8000 @ 4kg/kit</b>
iv)	<b>Lentil : 1000 @15kg/kit</b>
v)	<b>Ground nut : 5000 @ 4kg/kit</b>
vi)	<b>Black Gram (Kalai) : 1000 @ 4kg/kit</b>
Compensation of food production through distribution of –	
i)	<b>Urea : 50000 @ 10 kg/kit</b>
ii)	<b>NPK-10:26:26 : 48000 @ 10 kg/kit</b>
iii)	<b>Boro Paddy : 40000 @ 10 kg/kit</b>
Recommendation to the Bankers for conversion of Short term crop loan to Long term.	
Reclamation of sand laden area by the Soil Conservation wing.	
Organisation of Farmers' training in flood affected areas.	

**DRY SPELL CONDITION AND DROUGHT LIKE SITUATION.**

- 1) In command area of minor irrigation project, life saving irrigation needs to be arranged in rational basis.
- 2) Recommendation to keep paddy field weed free both in irrigated and non-irrigated areas.
- 3) Field channels should be kept clean to avoid seepage losses of irrigation water.
- 4) Recommendation for storage of rain water required to irrigate the crop during critical period of growth.
- 5) Application of nitrogenous fertilizers to be avoided without irrigation availability.
- 6) As soon as rain received recommendation to apply nitrogenous fertilizer in the field to boost-up the Crops.
- 7) Recommendation to Bankers for crop loan under K.C.C during Rabi.
- 8) Prior intimation to the Agri-Mech.Agril-Irrigation and Minor irrigation Department to keep their Installation in running condition.
- 9) Adoption of SRI (System of Rice Intensification) method as it requires very low quantity of water .
- 10) To supply pump sets to make temporary irrigation installation in typically rainfed areas for life saving irrigation to the transplanted crops.
- 11) Distribution of fuels at subsidized rates to the affected farmers.
- 12) Preparation of Mouza-wari damage report and submission of day to day crop condition report to the higher authority.
- 13) Compensation through rabi seed kits (need based) of following Crop:-  
MUSTARD, LENTIL, GROUNDNUT, MAIZE, WHEAT,KALAI, SESAMUM etc.

**RAINFALL MONITORING UNDER METEOROLOGICAL OBSERVATORY**

There are 9 Nos. of meteorological observatories to record daily meteorological data in different sub-division/block of this district for transmission to the competent authority.

## **5.02: ANIMAL RESOURCE DEVELOPMENT**

### **ACTION PLAN FOR CONTROL OF NATURAL CALAMITY LIKE CYCLONE & FLOOD, FOR THE YEAR 2016-17**

**Livestock disasters are primarily due to the following of risks:-**

- A) Natural Disaster:- Flood Drought, Cyclone, earth quake etc.
- B) Infectious disaster :- Zoonotic and non-zoonotic disease.
- C) Fodder scarcity/Fodder poisoning
- D) Miscellaneous :- Boarder Threat etc.

**Considering the above risks the action plan may be grouped in three phases:-**

- 1) Preparedness in anticipation
- 2) Immediate action
- 3) Post disaster action.

#### **1) Preparedness in anticipation:-**

- a) Training facilities are being conducted both for veterinarians and para-veterinarians twice in a year on the management of routine disease disaster along with other disaster (such as Bird flu, FMD, PPR Anthrax & other zoonotic. Non-zoonotic diseases along with risk management of Natural calamities. Feed & fodder scarcity /poisoning ,trans bound diseases etc.)  
Capacity building training are being conducted through Block Level & District Level by the Expert veterinarians such as formation of RRT (Bird Flu) , panibandhu, village social workers P.R.I Bodies etc. (Awareness regarding temporary makeshift shelters at suitable place, avoid contaminated water, grains, feedstuffs, poisonous chemicals, burial of dead carcass for cleaning environment)
- b) The essential inputs like medicine, vaccine etc to save the affected livestock are being placed to the field units under B.L.D.O (s) for restoration of health works in the affected areas. Paddy straw & balanced cattle feed (like EPIC/HIMUL) are to be provided to the affected cattle.
- c) Shelter house development is the prime need based component for shelter of the affected livestock during disaster, such type of works should have to be developed by the P.S. in each of the Block or Highland should have to search out for restoration of the affected livestock on temporarily.

#### **2) Immediate action on face of livestock disaster:-**

- a) Opening of control room at District/Sub-division/Block Level.
- b) Assess the requirement of feed and fodder, medicines, vaccines and communicate the same to the Dist. H.Q. from Block and to the Directorate from Dist. H.Q. accordingly.
- c) In the face of the livestock disaster Animal Health Camps to be opened immediately at the affected area nearest the temporary shelters of Livestock with medicines and vaccines and assessments are to be made for loss.
- d) Information flow should be as follows:-
  - i) L.D.A of A.D.A.C → Veterinary Officer → B.L.D.O → B.D.O/Dist.H.Q.
  - ii) Veterinary Officer → B.L.D.O. → B.D.O/Dist.H.Q.
  - iii) V.O. Dist. Vety Hospital → V.O. S.A.H.C → S.D.O./Dist.H.Q.
  - iv) Dist. H.Q. → Sabhapati/D.M./D.A.H & V.S.

- e) Arrangements of need based relief materials for the affected Livestock with the help of local administration and panchayat (At Block Level only requisition for tarpaulin to be placed to BDO for making temporary shed for cattle by the BLDO)
- f) Intimation to remove carcasses and for technical guidance to the removal team of Civil Defence organization /Panchayat Bodies.
- g) Arrangement to be made from District Reserve store for supply of Life saving Drugs from the Stock of Reserve store to the affected area on the basis of demand.
- h) Trans boundary threats occur in the border areas of the district where major diseases like bird flu, FMD etc & other non-zoonotic diseases may cause considerable mortality or losses in the productivity. Both preparedness and action taken measures are of prime importance.
- i) Inter-departmental support i.e. B.S.F. Public Health Engineering Department, Agriculture, PRI-bodies etc may support in risk management during disasters.

3) **Post livestock disaster management:-**

4)

- i) Rehabilitation of affected livestock should be judiciously made by the way of restoring, and insurance etc.
- ii) Economic rehabilitation of affected Livestock farmers with small units of poultry, Goatery,
- iii) Piggery, Dairy with consultation of panchayat samity may be provided immediately after calamity.
- iv) Model Live stock scheme to be implemented in consultation with Panchayat.

**Calculation sheet for requirement feeds and fodder to be supplied to the affected  
Cattle for combating the nutritional stress condition of the vulnerable blocks**

Sl. No.	Vulnerable blocks / Municipality	Total Cattle population as per census	% of cattle to be affected by natural calamities (10%)	Requirement balanced cattle feed@250g m/head/day X 7 days(kg)	Cost involved @ Rs.20/kg (approx)	Requirement of paddy straw @2kg/head/day X 7 days (approx)	Cost involved @ Rs.10/kg (approx)	Total Cost Rs. (approx)
1	Coochbehar-I	93211	9321	16311.75	326235	130494	1304940	1631175

	<b>Total</b>	<b>1050889</b>	<b>105090</b>	<b>183907.5</b>	<b>3678150</b>	<b>1471260</b>	<b>14712600</b>	<b>18390750</b>

**A) PADDY STRAW :-**

Paddy Straw may be procured from the local market by inviting spot quotation.

**MEDICINES AND VACCINES :-**

Required Medicines and Vaccines will be procured from the reputed Firms and Companies approved by the Director of Animal Husbandry & Veterenary Services, West Bengal. Sufficient quantity of vaccines will be stored at the Sector Offices. **PROBABLE EXPENDITURE :-**

*(Considering the Cattle & Buffalo population 10,55,271 numbers in Coochbehar District as per Live-Stock Census)*

Sl. No.	Particulars of Expenditure	Quantity Required	Rate (in Rs.)	Prpbable cost (Rs.)
1	Cattle Feed	660.00 MT	20.00 Per Kg	13200000
2	Paddy straw including Transportation	70.00 M.T	10.00 Per Kg	700000
3	Medicines and Vaccines	--	--	700000
4	Contingent fund for Fuel of vehicles and other expenditure	--	--	200000
<b>Total (Rupees one core forty eight lakh twenty thousand) only</b>				<b>14800000</b>

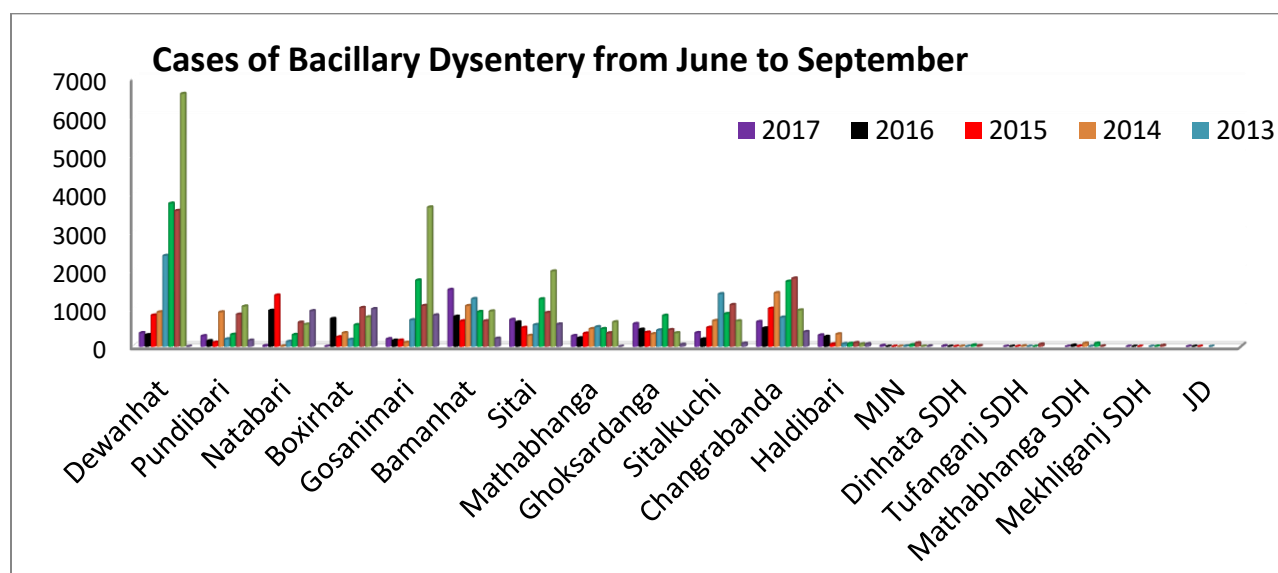

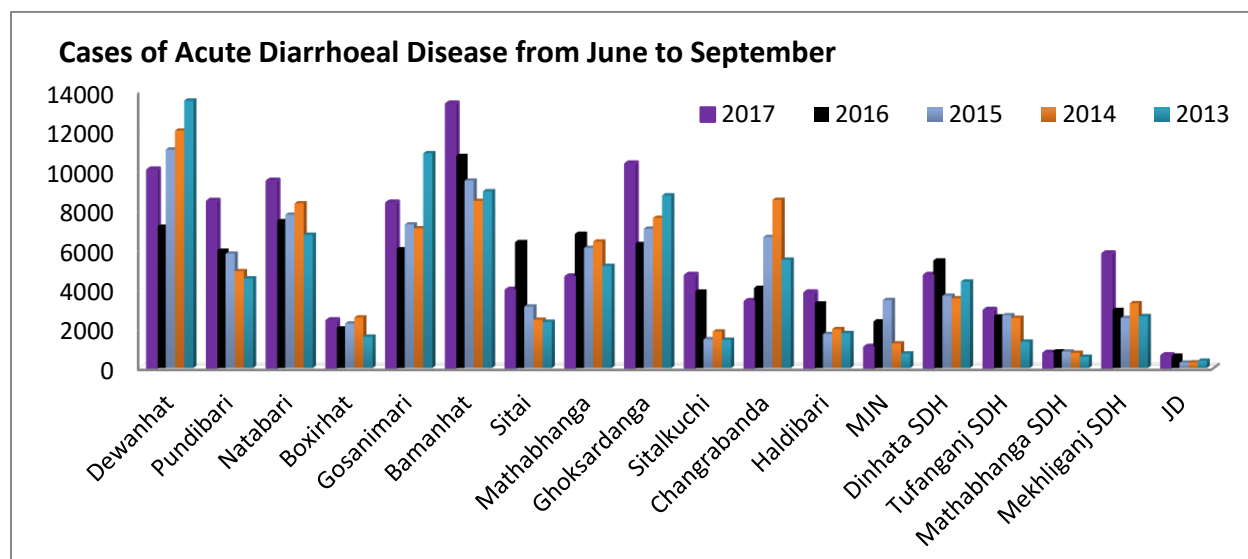

**5.03: HEALTH**

The word "disaster" indicates all kind of natural calamities such as flood, earthquake, cyclone etc. but in Cooch Behar district the word disaster means mainly flood, as most of the rivers Torsa, Mansai, Teesta, Jaldakha, Kaljani Raidak-I&II and Sankosh regularly cause flood in this district.

**2. PREVENTIVE MEASURE :-**

Water born diseases like Diarrhoea, Typhoid, Infective Hepatitis & Dysentery are common phenomena during and post flood period. Therefore emphasis will be given on safe drinking water, personal hygiene, public education including sanitary arrangement to the common people for prevention of epidemic. The disinfection of drinking water sources have to be done immediate after end of flood. Random surveillance and IEC activities will be continued for early detection and early treatment. Necessary instruction was issued to all concern.

Some data analysis of Acute Diarrhoeal Disease, Basilliary Dysentery and snake bite for the period from June to September for 2017, 2016, 2015, 2014, and 2013

### 3. STOCK & DISTRIBUTION OF MEDICINE :-

The BMOH will arrange to collect the necessary medicine and disinfectant from the DRS and will store the same in the respective GP / nearest Health Institution for vulnerable and cut-off area. The quantity of stock will be used for treatment for expected patients about 10% of flood affected population of the area. The in charge of Sub-Centre will also stock the medicine and disinfectant from the BMOH for Sub-centre emergency use. A stock of medicine and disinfectant will also be stored in BPHC for emergency use.

ACMOHs & Dy. CMOH-II will store a stock of medicine and disinfectant for the use of DE Cell & SD Sq. for emergency. Distributed flood medicine in different units if remain unutilized, may be used for treatment of general patient. The flood indents do not include any extraordinary drugs which are not a part of quarterly indent. First installment of drug and disinfectant is ready for distribution and completed within 15<sup>th</sup> May.

### 4. TRANSPORTATION & MOBILITY :-

- BPHCs should keep readying their vehicle on road & keeping contact with respective BDO if necessary for mobility of Medical Team and other purposes.
- Other Officers of Health & FW Dept. have been asked to keep all the vehicles quite ready to meet up the Health Emergency during and post flood.
- The District Magistrate, Cooch Behar is being requested to arrange the vehicles if the necessary more on flood.

### 5. FLOOD CONTROLROOM & CELLS:-

- Flood control room will be open at ACMOH Office in Sub-Divisional level except ACMOH (Sadar) and Office of the Chief Medical Officer of Health (PH Wing) in district level under the control of Dy CMOH-II, Cooch Behar during the flood.
- During flood emergency both the DE Cell and Sadar Cell will run under direct control of DY CMOH-II, Cooch Behar.

- c) BMOH have been advised to make flood control room and make at least two medical team comprising with one MO and 2/3 PMW staffs to control the flood emergency in the block.
- d) The Control room and medical team will function on Sunday, Saturday and holidays. Only a skeleton unit will attend in CMOH Office and DRS on holidays.

#### 6. **MEDICAL TEAM / HEALTH CARE TEAM:**

In apprehending of impending flood the Medical Team as identified comprise with One MO ,2/3 PMW with medicine & disinfectant should work as per necessity. Any change of member should be replaced forthwith.

All the Camps show open will must be attend at list once in a day by Medical Team. Necessary vehicle should be arranged. Submission of daily report to be ensured.

**\*\* List of RRT is given in the page no: 22 to 23**

#### 7. **STAFF DEPLOYMENT:**

During the flood situation the ACMOH's will look after the staff deployment. In emergency purpose they have the controlling power to post the staffs from the non flood affected block to effected block in their jurisdiction.

#### 8. **DISINFECTANT :-**

- (a) **Bleaching Powder :-** Use for disinfection Pond, Well, Tube Well which will be used as drinking water sources in the flood affected areas as well as post flood disinfection work, this work will be done in consultation with the concern Panchayet.

**Pond disinfection** – 30 grains (2 grms.) of Bleaching Powder (25%) are needed to disinfect 100

Gallons of water to achieve the strength of 1 PPM.

**Tube well disinfection** – 25 Liters solution of Bleaching Powder 60 PPM strength. The solution filtered by a piece of clean Porous cloth and inserted in the pipe of Tube well and head of the Tube well is to be immersed fully in the same preparation of solution for 2 hour.

**Well disinfection** – Calculate the water of the well and apply the Bleaching Powder solution to achieve the strength of 1 PPM.

*Formula to calculate the water content in Well is*

$$D^2 \times DW \times 5 = \text{Gallons of water (1 Gallon = 4.5 Litre)}$$

D = Diameter of Well in feet, DW = Depth of water inside the Well.

*Camp/ House disinfection – Bleaching powder to be mixed with lime at the ratio of 1:9 for the purpose of camp and house disinfection.*

- (b) Disinfection by Chlorine Tablet – One Tablet of 4mg for 1(One) liter of clean water but 2 tablet for flood water and turbid water in both places contact period is half an hour.

**Sequence of Well and Tube well disinfection** – Twice in a year in normal situation and once in A week during outbreak.

9. District and Sub-divisional level Officers will be the Zonal Officer of different blocks. The Zonal Officer will visit the respective zone to supervise the block plan, progress of work and submit a report to the Dy CMOH-II with a copy to the CMOH in pre flood and post flood period.

The Blocks against the Zonal Office are as follows:

SL. No	Name of Officer	Block	Office No.	Mobile No.
1.	Dr. Syamal Saren,Dy. CMOH-II	COB-II	03582-227128	9932022393
2.	Dr. B. Roy, Dy. CMOH-I	COB-I	03582-228874	8900073683
3.	Dr. R. Adhikary, ACMOH, Tufanganj	TUF-I	03582-244775	9475756333
4.	Dr. B. Sarkar,Dy. CMOH-III	TUF-II	03582-228797	9932206392
5.	Dr. B. Roy, DLO	DIN -I	03582-224503	9647821246
6.	Dr. Dilip Dey, DMCHO	DIN-II	03582-228797	9434367436
7.	Dr. P. Mandal, ACMOH, (Dinhata)	Sitai	03581- 255002	9434073502
8.	Dr. A. Das, ACMOH ( Mathabhanga)	Sitalkuchi	03582-228797	9932389884
9.	Dr. A. Das ,ACMOH, (Mathabhanga)	MTB-I	03583- 255261	9932389884
10.	Dr. Dr. Sourav Shil ,ACMOH(Sadar)	MTB-II	03582- 230519	9836144980
11.	Dr. S. Saha, DTO	Mekhliganj	03582-231543	9830755903
12.	Dr. J. Sarkar., ACMOH, Mekhliganj	Haldibari	03584-255275	9434450367

Beside the Zonal Officers, ACMOH's will be the Primary Monitoring Officer of their normal jurisdiction and guide, help the BMOH in respect of all, specially distribution and meticulous use of medicine, disinfectant, deployment of staff if required and Monitor the overall activities on behalf of CMOH and report accordingly.

Medical Team should be kept ready to meet any emergency during flood by the all Superintendents of Hospitals in this district.

**10. Reporting System**

After the occurrence of flood or any kind of disaster a detailed report mentioning the following information should be submitted to the Office of the Dy CMOH-II by special messenger and otherwise within 4 PM in same day positively.

1. Name of GP Affected.
2. Name of SC Affected
3. Name of village with population Affected.
4. No. of rescue camp open with location.
5. No. of camp inmate.
6. No. of Medical Team deployed.

From next day daily report as per proforma should be submitted if fresh area affected later on, the detailed should be submitted as above.

**11. Contact No. for Sending Reports:**

- a) Office of Dy. CMOH-II: Tele/Fax: 03582-227128  
Email id : [dycmoh2\\_cbr@wbhealth.gov.in](mailto:dycmoh2_cbr@wbhealth.gov.in) ,[dycmoh2\\_cbr@rediffmail.com](mailto:dycmoh2_cbr@rediffmail.com)
- b) Office CMOH: Tele: 03582-22887, Fax: 03582-228966
- c) Office of Dy. CMOH-III: Tele/Fax: 03582-228797

**Additional requirement of flood Emergency Medicine and Equipment for  
Cooch Behar District.**

#### 05.04 Jalpaiguri Irrigation Division.

#### FLOOD CONTINGENCY PLAN 2018-2019 OF JALPAIGURI IRRIGATION DIVISION (FOR Dist. COOCHBEHAR)

**1. INTRODUCTION :-** Jalpaiguri Irrigation Division Under the administrative control of the Superintending Engineer ,North East Irrigation Circle –II concerned with the flood control management in the area if the western part of the district of Jalpaiguri [ 26°32'34" N, 88°39'7" E ]. The main rivers that attacks the Jurisdiction of this Division (for Dist. Coochbehar) during flood are Teesta, Jaldhaka, Saniajan etc. and some small rivers / Jhora. Due to heavy rain on the catchment area the bed level of rivers are gradually raising due to heavy situation resulting which reducing the water carrying capacity of the river and threatened the adjacent area in respect of flood and erosion.

*The jurisdiction of this division covered the following Blocks Under Coochbehar District :-*  
Coochbehar District :- i) Mekliganj. ii) Haldibabi

**2. PROBLEM :-** There are 15 Nos. of Spurs, 47.58 Km. length of embankment & 4.725 Km. of bank protection work. It is not possible to repair all the damaged portion of spurs & embankment in the previous year due to scarcity of fund.

District wise break up of structures :-

	Embankment(Km)	B.P.(Km)	No of Spurs	Length of Spur(Km)	Irrigation Scheme
<b>Coochbehar</b>	47.58	4.725	15	7.261	

**3. MEASURES TAKEN :-** As it is not possible to restore all the damaged spots due to shortage of fund, some restorations of severely damages spurs & embankment are taken up in faces from different fund & the works are likely to be completed by 30<sup>th</sup> June 2018

**4. VULNERABLE AREA :-** A list showing probable vulnerable area are attached here with.

**5. PROTECTED/ UNPROTECTED AREA LIKELY TO BE INUNDATED :-** A list attached here with

**6. FLOOD WARNING SYSTEM :-** Like every year control room of Flood Warning Authority, Jalpaiguri, under Jalpaiguri Irrigation Division will start from 1<sup>st</sup> June 2018.

**7. CONCLUSION :-** Within the limitation of fund efforts are being taken to repair the damage embankments and spurs so that they can fight with the coming flood. It is very difficult for Teesta & Jaldhaka to predict flow pattern and any structure may be endangered.

All staffs of this Division connected with the flood works are prepared to fight with the coming flood with the help of Administration and other Departments connected and also with the help of local people.

**FLOOD WARNING AUTHORITY**  
**JALPAIGURI**

**Phone No: 03561-230249/ 03561-230153**

**Fax: 03561-220101**

**Email: [fwajalpaiguri2014@gmail.com](mailto:fwajalpaiguri2014@gmail.com)**

**NORTH EAST (IRRIGATION & WATERWAYS DEPTT.)**

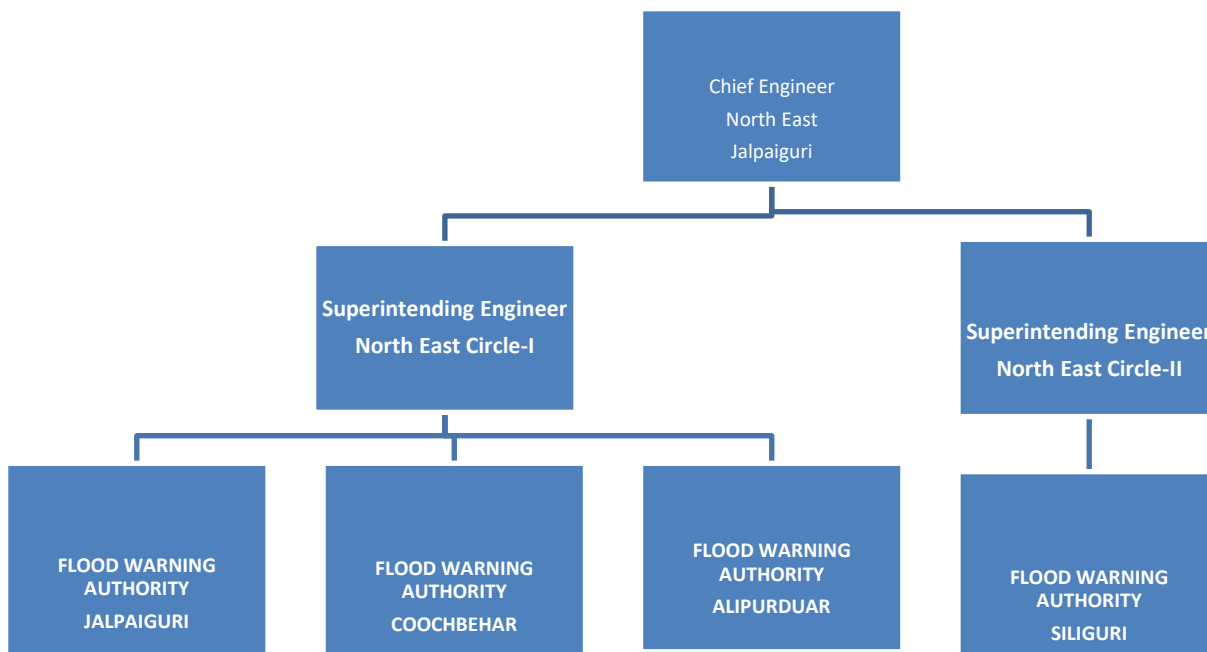

- 1) Executive Engineer, Jalpaiguri Irrigation Division/ Coochbehar Irrigation Division/ Alipurduar Irrigation Division/ Siliguri Irrigation Division are the **Flood Warning Authority** in their respective jurisdiction.
- 2) Every year Flood season starts from 1<sup>st</sup> June.
- 3) Flood Control Room set up opened (normally) 1<sup>st</sup> June on every year.
- 4) Flood Control Room runs 24 hours (round the clock) throughout the Flood season.
- 5) Head Quarter Sub- Divisional Officers of their own Division are the Control room In-Charge of F.W.A.
- 6) **Manning:** 24 hours i.e. 8 hours x 3 shift .
- 7) **Shifts:** Morning shift = 06.00 hrs. to 14.00 hrs, Evening shift = 14.00 hrs. to 22.00 hrs. Night shift = 22.00 hrs. to 06.00 hrs.
- 8) Each shift contains 2(Two) nos. Shift In-Charge, one of them designated as Shift In-Charge and other designated as Assistant Shift In-Charge, & 2(Two) nos. Messenger to dispatch & collect flood messages to the authority & other necessary control room works.
- 9) For smoothly running of control room 4(four) nos. of Shift (including messenger) required, because night duty performing shift get off from next day's duty.
- 10) One rain gauge reader is being engage to collect rain gauge data from Flood Meteorological Office, Sialpara, Jalpaiguri. (Until our own rain gauge station installed). Rain gauge data should be recorded in the control room's rain gauge register day by day with upto date grand total during Flood Season.

- 11) Gauge level of different Rivers to be collected from C.W.C. control room over Telephone & from different FWA under Chief Engineer, North East.
- 12) There are 2(Two) nos. of datum board displayed in the Flood Control Room.
- 13) The board shows un-protected Zones & protected Zones in jurisdiction wise.
- 14) The Danger level / Extreme Danger level marked in the board. When water level of rivers crossed Danger level / Extreme Danger level, signal imposed phase wise, with the concurrence of FWA, Jalpaiguri, and intimated to Central Control Room, Jalasampad Bhawan, higher authorities of the deptt and to local civil administration instantly.
- 15) When water level of rivers falls down below the Danger level / Extreme Danger level, imposed signal withdrawn as per direction of the FWA, Jalpaiguri, and intimated to Central Control Room, Jalasampad Bhawan, higher authorities of the deptt and to local civil administration instantly.

Daily flood message/ bulletin from all Sub-Division Offices & description of flood protective embankments, Spurs & other flood protective structures should be registered in control room log book & in the message register of Flood Warning Authority. Though Flood Warning Authority, Jalpaiguri Control room working as Central Control Room of North East, so all messages and reports of the flood situation along with adverse condition of river protective embankment, spurs and other structural work should be communicate to the higher authority in right time as per their availability. If they are not available in right time then the same should be communicate to the next of the authority in-charge. Daily river gauge level, Weather Forecast, Rainfall, Synopsis of river protective embankment, spurs and other structural work of North East should be communicate in prescribed format to Central Control Room, Jalasampad Bhawan, Chief Engineer, North East , Superintending Engineer, North East Irrigation Circle- I, Superintending Engineer, North East Irrigation Circle -II, within 9:30hrs positively. **After receiving the daily flood report from all F.W.A./ Alipuduar/Coochbehar/ Jalpaiguri/Siliguri same are transmitted to Central Control Room ,Kolkata through Superintending Engineer, North East Irrigation Circle- I, Jalpaiguri.**

Weather Forecast & Heavy Rainfall Warning from Flood Meteorological Office, Alipore meteorological address to Flood Control Room should be communicate to the authority.

**AUTHORITIES OF CHIEF ENGINEER, NORTH EAST****DUTY ROASTER OF CONTROL ROOM MANING**

DAY	1 <sup>ST</sup> SHIFT 6.00A.M to 2.00P.M.	2 <sup>nd</sup> SHIFT 2.00P.M. to 10.00P.M.	3 <sup>rd</sup> SHIFT 10.00P.M to 6.00A.M
Mon	A	B	C
Tues	D	A	B
Wed	C	D	A
Thurs	B	C	D
Fri	A	B	C
Sat	D	A	B
Sun	A	C	D

Reserve staffs should be required for leave vacancies.

In place of Police Wireless set Mobile Phone set have been issued to departmental staff for collection and transmission of Flood related data from Beltali, Mandalghat , Basusuba , Premganj. They collect flood situation & current position of embankment and spurs and then they convey the message to the requisite Sectional Officer and

Central Control Room. The Impose/Withdrawn signal confirmation copy should be sent over telephone / E-mail/ Fax/ Post to different authorities.

### **LOG BOOK**

Log book is the most important register of flood control room which may called as well as the mirror of the total flood control management. Log book has its own serial number itself. Every year Flood Warning Authority opened the log book with date & time to continue the Flood Control Room during the flood season. After opening the control room the message of opening the flood control room should be noticed to the higher authorities. Every moment gauge data of different rivers & messages received & record in log book with date & time is the primary duty of the Flood Control Room staff. After receiving gauge data of different rivers & messages from all Sub-Division & section of Jalpaiguri Irrigation Division should be communicate to the Flood Warning Authority and Member (Execution), NBFCC & wait for their next instruction of Flood Warning Authority and Member (Execution), NBFCC (if necessary). If they instruct to communicate any reply messages it should be registered in log book with date & time. Any special instruction by the authority should be registered in Log book & take immediate action accordingly.

At the time of ending of Flood Control Room authority, should signed to close the same.

#### **How to Impose Signals :**

When Gauge levels crossed D/L or E.D.L of the rivers then it should be noticed to Flood Warning Authority, after considering the tendency of water level in upper catchment of the river which sent by C.W.C Flood (Forecast) he instruct to the control room to impose the signal or not.

## 5.5 COOCH BEHAR IRRIGATION DIVISION

1. INTRODUCTION :- Coochbehar Irrigation Division under the administrative control of the Superintending Engineer, North East Irrigation Circle-I, Debibari, Coochbehar is concerned with the flood control and management in the area of the district of Coochbehar. There are large number of rivers originating from the Himalayas of Bhutan passing through the district of Jalpaiguri enter into the jurisdiction of this Division and finally proceed to Bangladesh.

More than 30 number of Rivers flow over the jurisdiction of this Division. The Major Rivers are Sankosh, Gangadhar , Raidak - I, Raidak - II, Kaljani, Torsha, Jaldhaka , Mansai, and Singimari.

The jurisdiction of this division, located on the southern side of District of Jalpaiguri just on the foot hill of Himalayas and there are often flush Flood on the Rivers due to heavy Rain on the Catchment areas (Himalayas on Bhutan). The Bed level of Rivers are gradually rising due to heavy

**siltation, resulting which water carrying capacity of the Rivers are being reduced and the adjacent area is being threatened in respect of Flood and Erosion**

**The jurisdiction of this division covers the following Blocks :**

Coochbehar Block - I / Coochbehar Block - II / Tufanganj Block – I / Tufanganj Block – II / Dinhata Block - I / Dinhata Block – II / Sitai Block / Sitalkuchi / Mathabhanga Block - I / Mathabhanga Block - II .

**The Total length of river bank within this jurisdiction is approximately 1600.0 KM, Since creation (1954) of this Division 21% length has been protected.**

## **2. DAMAGES OCCURRED DURING FLOOD 2018 :**

During Monsoon 2018, due to torrential rainfall from 22.06.2018 to 01.07.2018 severe damages on embankment / structures under the jurisdiction of this Division had taken place, which are as follows -

### **Damage of flood protective and anti- erosive structures**

Period of occurrence	Number of locations of damaged structures	Length of damage	Cost of damage	Remarks
22.06.18 to 01.07.18	29 Nos.	2911 M	Rs.352.00 Lac	Damage report submitted

### **5.4.1. Prevailing arrangements of Flood Warning System:**

1. Control Room of Flood Warning Authority, Cooch Behar will be functioning from its office at Debi Bari, Cooch Behar with Phone No. 229114 (03582) (Yet to be installed).
2. Sub- Divisional Control Room:
  - a) In the office of the S.D.O., Tufanganj Irrigation Sub-Division, Tufanganj with Phone No. 244668 (03582) (Yet to be installed)
  - b) In the office of the S.D.O., Mathabhanga, Irrigation Sub-Division, Mathabhanga, with Phone No. 255733 (03583) (Yet to be installed)

Control Rooms are expected to be functioning from 01.06.2018 at the onset of S.W. monsoon.

These Control Rooms shall be run by existing staff of Cooch Behar Irrigation Division. These Control Rooms shall remain open 24 hrs. till withdrawal of S.W. monsoon.

The Hydrological observation stations (H.O.S. s) situated beside different rivers under the territorial jurisdiction of Cooch Behar Irrigation Division shall be manned each with Gauge Readers, Khalasis and other staff.

The staffs deputed at the H.O.S. s collect gauge and discharge data of the relevant rivers daily and record in the relevant registers. During the flood season, all the H.O.S. s function round the clock and send messages regarding water-levels of rivers and local weather centrally to control room at Cooch Behar and Sub – Divisional control room at Mathabhanga and Tufanganj. Control room at Cooch Behar usually functions as the central control room of the Flood Warning Authority of Cooch Behar & Executive Engineer, Cooch Behar Irrigation Division, whose primary object is to issue flood warning signals for the rivers within this jurisdiction during the flood season. The staffs deputed at the control room at Cooch Behar collect gauge and discharge data from Alipurduar Control room located at HOS Kaljani of the relevant rivers within the jurisdiction of Alipurduar Irrigation Division daily and record in the relevant registers and communicate to the District Authority. The flood season officially starts from 1<sup>st</sup> June and ends usually after the 15<sup>th</sup> October of each year.

For protected and unprotected zones along the bank of each river, there is specific Yellow / Danger Level (D.L) and Red / Extreme Danger Level (E.D.L.)

**Guiding Warning Levels of rivers:**

- (a) 0.6 M or more below Yellow or D.L. .... = Normal Flood
- (b) Within 0.6 M of Yellow or D.L. .... = Moderate Flood
- ( c ) Yellow or D.L. .... = High Flood
- (d) Red or E.D.L. .... = Very High Flood

**During Normal Flood period**

Gauge Level are observed :- At 3 hours interval.

**During High Flood period**

Whenever the Gauge Level enters within 0.6 Mt. of Yellow / Danger Level. :- Readings are observed at hourly Interval and continued till the Gauge level subsides below normal flood level.

During the Gauge level at Corresponding signal are imposed for that river and it is instantly communicated to the wireless Supervisor of Cooch Behar Police Station, Cooch Behar with request to transmit the message to different addresses. Telephonic messages are sent to local administration and other authorities like Railways, N.H., P.W.D. etc. after which the confirmation copies are sent by messenger or by post.

**Locations of existing Hydrological Observation Stations (H.O.S) :**

Under the control of the Flood Control warning Authority, The Executive Engineer, Coochbehar Irrigation Division, there are 3 (seven) nos of Hydrological Observation Stations (H.O.S.) at the location is given below :-

Sl. No.	River on which H.O.S is situated with location	D.L AND E.D.L.
1)	<b>Torsa at Keshab Ashram</b>	<b>D.L./ Y- 42.07 M E.D.L./ R- 42.68 M</b>
2)	<b>Raidak-I at Tufanganj L.R.P.</b>	<b>D.L./ Y- 47.00 M E.D.L./ R- 47.90 M</b>
3)	<b>Mansai at Mathabhanga.</b>	<b>D.L./ Y- 47.90 M E.D.L./ R- 48.40 M</b>

Maximum Gauge Reading in different Rivers (Torsa at Keshab Ashram, Raidak- I at Tufanganj & Mansai at Mathabhanga) from 2008 to 2017 is enclosed.

**Daily Rainfall Data. -**

Daily Rainfall data collected from rain gauge Station at i )Cooch Behar,. ii ) Tufanganj and iii ) Mathabhanga

Total Rainfall with maximum rainfall in last year are as below

RAIN GAUGE STATION	TOTAL YEARLY RAINFALL IN MM	MAXIMUM RAINFALL IN A DAY IN MM	DATE	Remarks
COOCHBEHAR	2745.90 mm	212.20	22.06.2018	
TUFANGANJ	3256.50 mm	320.00	01.07.2018	
MATHABHANGA	1932.80 mm	139.20	01.07.2018	

**Structures / Assets in custody of this Division:**

- 1) Flood Embankment armoured Length – 120.835 K.M.
- 2) Flood Embankment unarmoured Length – 34.150 K.M.
- 3) Bank protection work ., Length – 179.328 K.M.
- 4) Spur - 85 Nos Total length – 19.501 KM

**7. FLOOD PRECAUTIONARY MEASURE :**

Most of the damaged structures have been restored. However 36 nos of vulnerable sites are to be taken up before the on set of monsoon. During monsoon all the areas shall be looked after by the departmental field staffs and officers and keep close contact with the local administration and Panchayat . A list of contact number is also

**PRIORITY LIST OF THE PROPOSED M/R WORKS REQUIRED TO BE TAKEN BEFORE MONSOON-2019**  
**UNDER COOCH BEHAR IRRIGATION DIVISION**

Sl. No.	Name of work	Length of damage portion	River	Block	Nature of Damage	Tender Amount (In Lakh)
1	M/R to Bank Protection work along the left bank of river Raidak-I at Banshraj part-I (D/S of burning ghat ) in Block-Tufanganj-II in P.S. Boxirhat, Dist. Cooch Behar.	100m	Raidak-I	Tufanganj-II	Bank erosion	4.82
2	M/R to Protection of Notafela area against spilling and silt deposition along the right bank of river Kaljani in P.S. Dinhata , Dist. Cooch Behar	80m	Kaljani	Dinhata-II	Bank erosion	4.84
3	M/R to Protection of Balarampur area on the right bank of river Kaljani in Block-Tufanganj-I, P.S. Tufanganj , Dist. Cooch Behar	47m	Kaljani	Tufanganj -I	Bank erosion	4.82
4	Damage restoration along the left bank of river Ghargharia at Kaljani Roy para village area for a length of 120 m within Coochbehar_ II Block PS Kotwali Dist Cooch Behar	120m	Ghargharia	Coochbehar_ II	Bank erosion	27.06

5	MR to Panisala protection work along the right bank of river Torsa under Panisala GP in PS Kotwali Dist Cooch Behar (Protection work at upstream of salbullah spur No 18)	55m	Torsa	Coochbehar_I	Slope pitching	9.34
6	MR to to US of Manidas Para B.P work along the right bank of river Kaljani at Kamar Para area in PS Kotwali Dist Cooch Behar	150m	Kaljani	Coochbehar-II	Bank erosion	32.84
7	MR to Paniarchara protection work along the left bank of river ghargharia under Maruganj GP in PS Tufanganj Dist Cooch Behar ( Protection work at upstream of Paniarchara protection work)	150m	Ghargharia	Tufanganj-I	Bank erosion	25.52
8	Damage restoration work along the left bank of river Baniadaha at Barabalasi village area for protection of Masjid within Cooch Behar I Block in PS Kotwali Dist Cooch Behar.	105m	Baniadaha	Dinhata-II	Bank erosion	5.22
9	MR to Arampur Embankment along the right bank of river kaljani ( Armouring of embankment in between Spur No.2 and 3 ) in Block Tufanganj I in PS Tufanganj Dist Cooch Behar	2000m	kaljani	Tufanganj-I	Bank erosion	27.60
10	MR to US of existing BP work Kodaldwaha area on the RB of river mansai within GP Nishiganj I Block Mathabhanga I PS Mathabhanga Dist Coochbehar	100m	mansai	Tufanganj-I	Bank erosion	22.06
11	MR to Rangamati and Nagar Gopalganj BP work (Down stream) along the right bank of river Dharala within Block Mathabhanga I PS Mathabhanga Dist Coochbehar	60m	Dharala	Tufanganj-II	Bank erosion	25.41
12	MR to kajlikura BP work along the right bank of river Mansai within Block and PS Sitai Dist Cooch Behar.	210m	Mansai	Sitai	Bank erosion	11.88
13	MR to downstream of Nayarhat BP Work on the left bank of river Sutunga under Nayerhat GP in PS Mathabhanga Dist Cooch Behar	250m	Sutunga	Dinhata-II	Bank erosion and damage of Apron	34.44
14	MR to South Bhangamore BP Work along the left bank of river Sutunga on D/S side under Hazrahat GPI, in P.S – Mathabhanga, Dist. Cooch Beha	125m	Sutunga	Mathabhanga-II	Bank erosion & damage of round sausage	7.94

15	Damage Restoration in right bank of river Mora Torsa under Mouza Khagrabari G P Khagrabari near Jamai Colony in PS Kotwali Dist Coochbehar	80m	Torsa	Coochbehar-II	Bank erosion and damage of Apron	8.02
16	Damage Restoration along the left bank of river Jhaljhali at Bara Nalangibari village area in PS Kotwali Dist Coochbehar	180m	Jhaljhali	Coochbehar-I	Bank erosion	24.74

17	Damage Restoration work along the left bank of river Ghoramara at Salmara near Hatidhura Bazar in PS Pundibari Dist Coochbehar Block in PS Kotwali Dist Cooch Behar.	130m	Ghoramara	Coochbehar-II	Bank erosion	8.82
18	Damage Restoration work along the left bank of river Dolong at Matier Kuthi Daspara in PS Goksadanga Dist Coochbehar	130m	Dolong	Mathabhang a-II	Bank erosion	16.39
19	MR to Coochbehar TP Embankment along the left bank of river Torsa in down stream of Masjid Para Ramp under Coochbehar Municipality of Coochbehar sadar Sub Division in PS Kotwali Dist Coochbehar	40m	Torsa	Coochbehar Municipality	Bank erosion	7.26
20	MR to Boraibari ( down stream of PWD Road Bridge) BP work along the right bank of river Ghargharia at Boraibari area in PS Kotwali Dist Cooch Behar	200m	Ghargharia	Mathabhang a-II	Bank erosion	24.58
21	MR to Gadolerkuthi BP Work along the left bank of river Sutunga on Upstream Side under Hazrahat GP I in Block Mathabhanga II Dist Coochbehar	90m	Sutunga	Mathabhang a II	Bank erosion	7.43
22	MR to BP work along the left bank of River Raidak I at Kadamguri area within Salbari I G.P adjacent to Heritage road Mouza salbari in Block Tufanganj II PS Boxirhat Dist Coochbehar	218m	Raidak I	Tufanganj II	Bank erosion	13.70
23	M R to Baro Bospara B P work along the right bank of river Gadadhar in G P Natabari I Block Tufanganj I in P S Tufanganj Dist Coochbehar	110m	Gadadhar	Tufanganj I	Bank erosion	5.81

24	MR to Down stream of Bosspara B P work along the right bank of river Gadadhar in GP Natabari I Block Tufanganj I in P S Tufanganj Dist Coochbehar	200 m	Gadadhar	Tufanganj-I	Bank erosion	8.15
25	MR to Chhotolawkuthi embankment along the right bank of river Raidak II within Block Tufanganj II PS Boxirhat Dist Cooch Behar	200m	Raidak II	Tufanganj-II	Bank erosion	5.74
26	Extension of Balaghat BP work at uttar Balaghat area along the left Bank of river Gadadhar within Block Tufanganj I PS Tufanganj Dist-Coochbehar Dist Cooch Behar	70m	Gadadhar	Tufanganj-I	Bank erosion	8.07
27	Damage restoraton work at Sarakarpar area along the Right Bank of river Raidak I within block Tufanganj I PS Tufanganj Dist Coochbehar	200m	Raidak I	Tufanganj-I	Bank erosion	23.76
28	Damage restoraton work at Nepalkhata area along the Left bank of river Gadadhar within Block Tufanganj I P S Tufanganj District Cooch Behar.	80m	Gadadhar	Tufanganj-I	Bank erosion	10.29
29	Damage restoraton work at Madhya Dhadial area along the left bank of river Gadadhar within block Tufanganj I PS Tufanganj Dist Coochbehar	120m	Gadadhar	Tufanganj-I	Bank erosion	14.54
30	Damage restoraton work at Purbo Dwiperpar area near SSK School along the right bank of river Raidak I whinin Block Tufanganj I P S Tufanganj Dist Coochbehar	140m	Raidak-I	Tufanganj-I	Bank erosion	20.22

31	MR to BP work at Balaghat area along the left Bank of river Gadadhar within Block Tufanganj I PS Tufanganj Dist Coochbehar.	90m	Gadadhar	Tufanganj-I	Bank erosion	5.27
32	Damage restoraton to Sahapara area along the left bank of river Mora Raidak in Salbari I GP within Block Tufanganj II PS Boxirhat Dist Cooch Behar	80m	Mora Raidak	Tufanganj-II	Bank erosion	10.06
33	Damage restoraton work at Kadamguri area along the Right bank of River Raidak I in Block Tufanganj I	70m	Raidak I	Tufanganj I		16.28

	PS Tufanganj Dist Cooch Behar					
34	MR to BP work along the right Bank of river Gadadhar at saheb Bari Ghat ( Jaigir Chilakhana) area Up Stream of road bridge in GP Natabari II Block Tufanganj I PS Tufanganj Dist Coochbehar	215m	Gadadhar	Tufanganj-I	Bank erosion	23.98
35	M/R to Cooch Behar Town protective Embankment along the left bank of river Torsa at Khagrabari area ( Adjacent to PWD road) in P.S. Kotwali ,Dist- Coch Behar	135 m	Torsa	Cooch Behar-II	Bank erosion	2.51
36	M/R to Bara Bangla B.P work along the right bank of river Mansai within Block & P.S- Sitai, Dist - Coochbehar	12 m	Mansai	Sitai	Bank erosion	4.93
37	M/R to Country side of Tikonja embankment on the right bank of river Mansai within G.P. Pachagarh , Block : Mathabhanga-I, PS. Mathabhanga Dist - Coochbehar	40 m	Mansai	Mathabhanga-I	Bank erosion	2.79
38	M/R to town protective embankment along the right bank of river Mansai in P.S- Mathabhanga, Dist- Coochbehar	21 m	Mansai	Mathabhanga-II	Bank erosion	3.85
39	M/R to Marginal embankment at Khaterbari area in between river Sutunga and river Mansai near Ward No-7 behind Mathabhanga Hospital under Mathabhanga Municipality ,Block- Mathabhanga –I, P.S- Mathbhanga, Dist. Cooch Behar.	35 m	Mansai	Mathabhanga –I	Bank erosion	4.76
40	M/R to Coochbehar T.P embankment along the left bank of river Torsa (in un-armoured area) in Mouza- Khagrabari and Sahar Coochbehar in P.S- Kotwali, Dist - Coochbehar	205 m	Torsa	Cooch behar-II	Earthwork and bamboo piling	4.33
41	M/R to town protective embankment along the right bank of river Mansai in P.S- Mathabhanga, Dist- Coochbehar. ( 2 nd Call)	3 Nos	Mansai	Mathabhanga –I	Sausage work	3.85
42	M/R to Chhatowa Amlaguri B.P. work along the right bank of river Kaljani within Tufanganj_I Block, in P.S. Tufanganj, Dist. Cooch Behar.	106 m	Kaljani	Tufanganj_I	Bank erosion	4.83

## CHAPTER 6:

### CAPACITY BUILDING AND TRAINING MEASURES

Capacity Building develops and strengthens skills, competencies and abilities of both Government and non-government officials and communities to achieve their desired results during and after disasters, as well as preventing hazardous events from becoming disasters. When undertaking disaster management planning assessments, it is important that the indigenous traditions, methods and materials being used for disaster management locally are considered and incorporated appropriately. Local residents are likely to be the first emergency responders to such incidents, particularly in remote areas and, therefore, critical to the successful outcome.

Developing institutional capacity is very important. At the same time, by making the local community part of the process and solution would help in ensuring that disaster mitigation measures are more likely to be implemented and maintained over time. The capacity building plan should cater to the ‘differential capacity building needs’ based on the functional responsibilities assigned to stakeholders (refer table 8 giving sample of functions). It should address -

1. Institutional capacity building
  - i. Officials / policy makers

Details of Training of the District				
Sl. No.	Course	Venue	Period	No. of Participants
1.	Post Disaster Need Analysis (PDNA)	ATI, Saltlake, Kolkata	18.07.2016 to 22.07.2016	3
2.	Disaster Risk Reduction	Directorate, Tran Bhavan, Kolkata	11.08.2016 to 12.08.2016	2
3.	Child Centred DRR & CCA approach	Pool Side Banquet Hindustan, Internatinal, 235/1, AJC Bose Road, Kolkata	2.10.2016 to 21.10.2016	3
4.	Dissemination workshop on Emergency Supply Chain Assessment	Park Circus Campus of Aliah University, Kolakat	10.11.2016	3
5.	Induction Training	ATI, Saltlake, Kolkata	05.12.2016 to 24.12.2016	2

6.	Workshop for preparation of module on event specific and area specific disasters	Directorate, Tran Bhavan, Kolkata	16.12.2016	1
7.	Post Disaster Need Analysis (PDNA)	ATI, Saltlake, Kolkata	26.12.2016 to 30.12.2016	2
8.	Induction Training	ATI, Saltlake, Kolkata	09.02.2017 to 03.30.2017	2
9.	Post Disaster Need Analysis (PDNA)	ATI, Saltlake, Kolkata	20.02.2017 to 23.02.2017	3
10.	Child Centred DRR	ATI, Saltlake, Kolkata	29.05.2017 to 31.05.2017	2
11.	Induction Training	ATI, Saltlake, Kolkata	06.11.2017 to 24.11.2017	2
12.	Child Centred DRR	ATI, Saltlake, Kolkata	06.12.2017	1
13.	Child Centred DRR	Alipurduar	27.12.2018	2
14.	TOT on Climate Change & Disaster Management	ATI, Saltlake, Kolkata	09.01.2018 to 11.01.2018	2
15.	Incident Response Software Previstar CPS	Cooch Behar	15.03.28	20
16.	Incident Response System	ATI, Saltlake, Kolkata	02.04.2018 to 06.04.2018	1
17.	DRR & Sustainable Development	RTC, Cooch Behar	11.12.18 to 13.12.18	30

Training Calendar for the Year 2019				
Sl. No.	Course	Venue	Period	No. of Participants
1	DRR	Cooch Behar I Block	02 days January-2019	30
2.	DRR	Cooch Behar II Block	02 days January-2019	30
3.	DRR	Tufanganj-I Block	02 days February-2019	30
4.	DRR	Tufanganj-I Block	02 days February-2019	30
5.	DRR	Dinhata-I Block	02 days June-2019	30
6.	DRR	Dinhata-II Block	02 days June-2019	30
7.	DRR	Sitai Block	02 days July-2019	30
8.	DRR	Mathabhanga-I Block	02 days Jul-2019	30
9.	DRR	Mathabhanga-I Block	02 days September-2019	30
10	DRR	Sitalkuchi Block	02 days September-2019	30
11.	DRR	Mekhliganj Block	02 days November-2019	30
12.	DRR	Haldibari Block	02 days November-2019	30
13	DRR	Cooch Behar	03 days December-2019	30

- ii. Engineers, Architects, Masons, Doctors, Nurses, Teachers and other professionals

Details of Training of the District				
Sl. No.	Course	Venue	Period	No. of Participants
1.	Disaster Management for Junior Engineers	ATI, Saltlake, Kolkata	09.01.2017 to 11.01.2017	3
2.	Combating Climate Change; National Solar Mission & Mission on Enhanced Energy	ATI, Saltlake, Kolkata	14.03.2017 to 16.03.2017	3
3.	Mainstreaming DRR into Development	ATI, Saltlake, Kolkata	03.05.2017 to 05.05.2017	1
4.	Earthquake Management for Jr. Engineers	ATI, Saltlake, Kolkata	15.05.2017 to 19.05.2017	1
5.	Disaster Management for Jr. Engineers	ATI, Saltlake, Kolkata	21.06.2017 to 23.06.2017	1
6.	Earthquake Risk Mitigation & Management	ATI, Saltlake, Kolkata	30.10.2017 to 01.11.2017	3
7.	Disaster Management for Jr. Engineers	ATI, Saltlake, Kolkata	08.11.2017 to 10.11.2017	
8.	Mainstreaming of DRR into Development	ATI, Saltlake, Kolkata	13.06.2018 to 15.06.2018	3

iii. State Police, Fire Services, State Disaster Response Force

2. Community capacity building and Community Based Disaster Management which should also focus on vulnerable groups – women, children, aged persons and persons with various kinds of disabilities.

3. Knowledge Management, networking and sharing

- i. Community registries to collate basic contact information for persons with disabilities

4. Training of Trainers

- i. Civil Defense/Home Guards/Volunteers

5. Disaster Management Education

- i. Schools
- ii. Colleges: medical, Engineering

6. Skill up gradation and follow up training programmes
7. Inventory of trained professionals, engineers, architects and masons, medical Professionals, rescue specialists etc.

Strengthening and capacity building of DM Institutions (SDMA and DDMA) should be the first priority towards DM capacity building in the State. Training module, commensurate with the State / District specific requirements, should be designed and

22

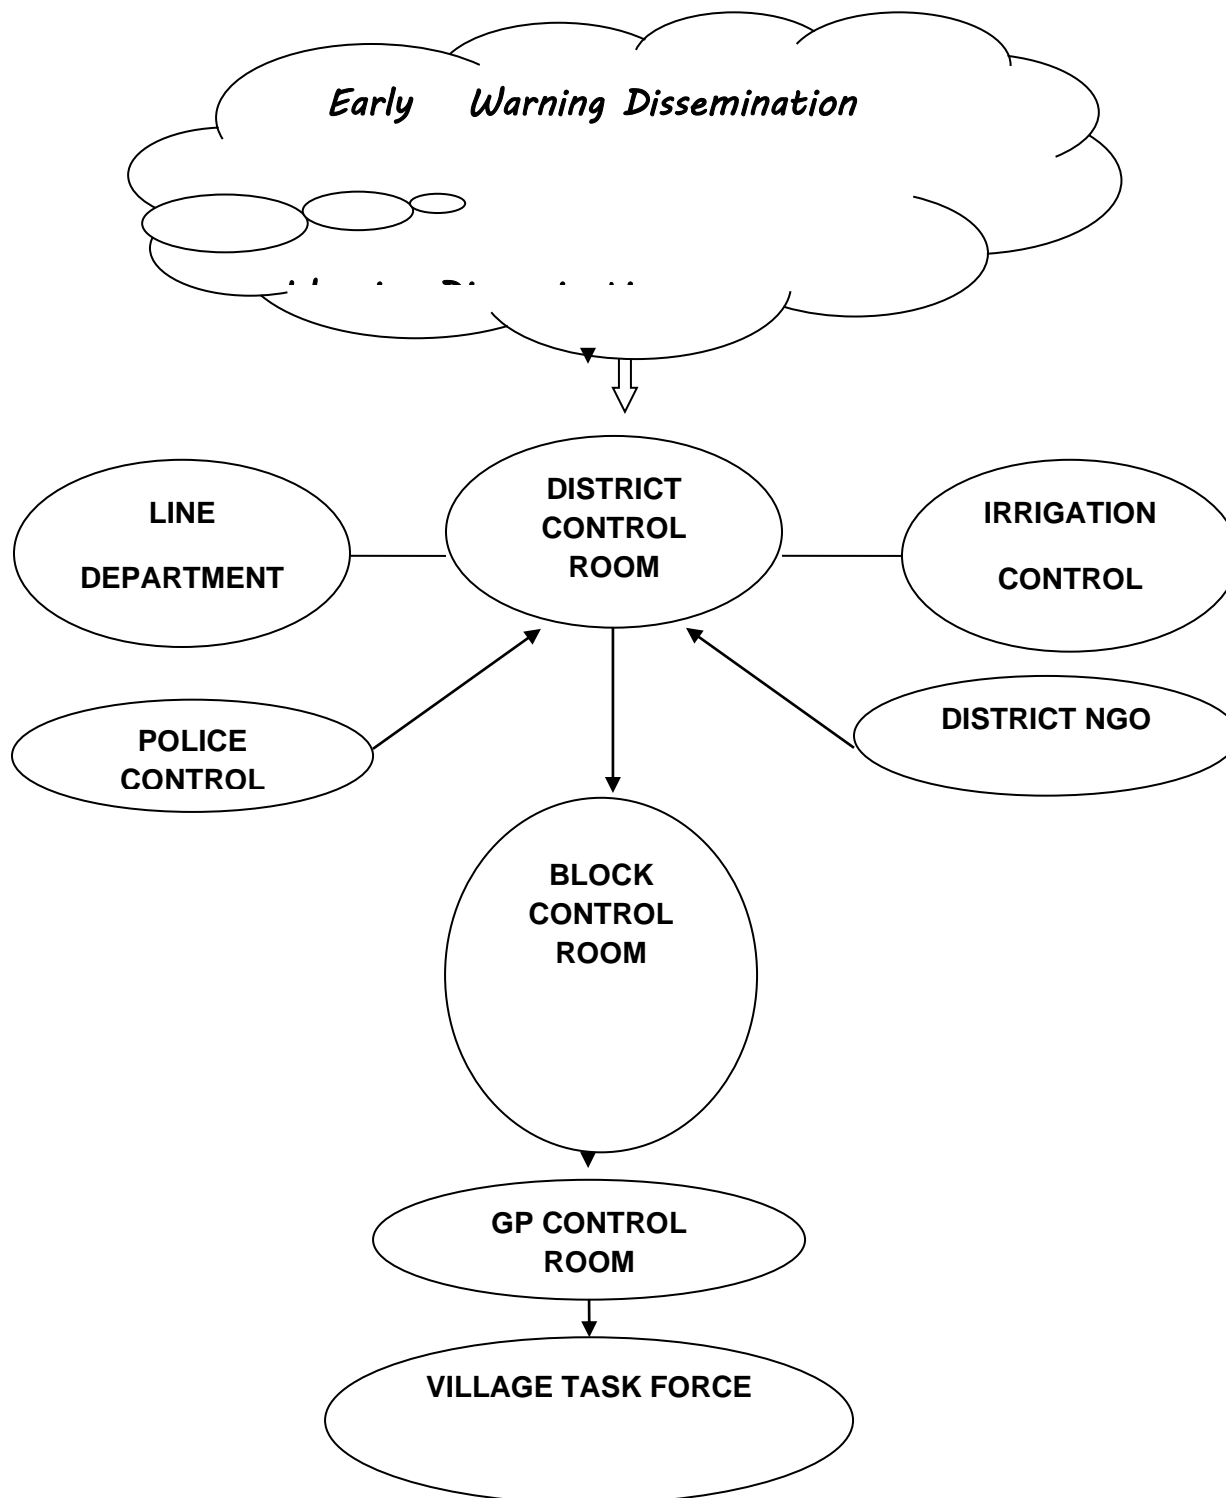

implemented in consultation with NIDM/NDMA. Capacity building requirement at all levels in institutional hierarchy as well as society should be addressed adequately.

Training and capacity building program should be integrated with the monitoring and evaluation system for effective revision of the program.

## **CHAPTER 7: RESPONSE AND RELIEF MEASURES**

### **7.1: CRISIS-RESPONSE STRUCTURE OF THE SUB DIVISION :**

#### **Early Warning Dissemination and Response Plan**

**(A) Early Warning Dissemination and Response Plan :**

Department	Response System			
	Preparedness	Pre (after Warning)	During Disaster	Post Disaster
Sub Division ( SDDMO )	Will arrange to receive early warning from the District / MD / IWD / CWC and to inform the concerned agencies ( BDO, BDMO, Police, Gram Panchayats, Govt departments etc ) immediately by FAX, Phone	Control room to be kept open round the clock.	The message is required to be passed on to all areas which have been earmarked as vulnerable and to contact with all the rescue shelters.	Will make liaison with rescue and relief team, shelter management team and other teams.
1.Rural Development Department	Information should be communicated to all the officers of the line departments.	Will arrange to receive early warning from the District Office and to inform the concerned	Contact with other line departments are to be maintained 24 hrs.	
2.Disaster Management Department	Information should be communicated to all the officers of the line departments.			
3.Fisheries Department	To ensure safe drinking water in the affected areas all sources including Gram Panchayat, Panchayat Samiti, PHE etc. will be tapped suitable measures to install a good number tube wells in thrust areas. Arrangements can be made of sending water tanks to those areas where installing tube wells are not possible.			
4.Industry department	Health & Family Welfare Department will be moved to keep ready of sufficient quantum of bleaching powder, halozen tablets, AVS, etc. BMOH will arrange for medicine during and post flood situation.			
5.Water and Sanitation Department				

Education Department - Mainly looked after by Sub-Inspector of Schools (SI)	Make a list of nodal teachers' of all the schools and colleges Select experienced and competent NGOs/CBOs for orientation of the school children. Students from the schools	Arrange to talk with the head of the institutions and nodal teachers earmarked as rescue shelters.	To observe the situation Search and Rescue team may be called for operation. Shelter management team will start their works.	Shelters will start functioning fully and the shelter management team members will work as per plan.
---	---	--	--	--

under the active guidance of Education Department and also by the EOMEE and LEOMEE under the active guidance of Block Development Officer and Executive Officer, Panchayat Samiti.	<p>(Class VIII and above) and colleges to be imparted training on disasters, mitigation measures, health matters, sanitation, search and rescue, etc.</p> <p>DRR team formation in schools and colleges, and make plans for mock drills in each institute.</p> <p>A list of victims should be made available with the nodal teacher.</p> <p>All nodal teachers will be considered as members of the concerned GPDMC. Meeting of the nodal teacher with block officials should be conducted.</p> <p>Emergency Preparedness and Response plans of such schools will be prepared and shared with the Block Officials.</p> <p>Required nos. of toilets, water points, cooking arrangements, ramps etc. will be in place much before the hazard.</p> <p>Students, teachers and parents teams will be formed for shelter management</p> <p>Who will do what, will be well documented and check list will be prepared and made available to all concerned teams.</p> <p>Do's &amp; Don'ts with important contact nos. will be written in local language and put in prominent places.</p>	To arrange to transmit the message in the vulnerable areas		
Police - Police Authorities headed by Inspector in Charge	<p>Police personnel will remain alert.</p> <p>Volunteers to be given training to help police</p> <p>Keep vigil against antisocial activities.</p>	<p>Wireless set and man pack to be in operation.</p> <p>Vigilance to be maintained.</p>	Will observe the situation and to monitor closely.	<p>Intensified patrolling.</p> <p>Welfare attitude to build up.</p> <p>Vigilance to be kept continued.</p>
Revenue - Land and Land	A Team may be formed with selected staff headed by the Revenue Inspector at the GP	Team to be prepared and they will disseminate the	Will observe the situation and to monitor closely.	To assist the block administration in the rescue shelters.

Reforms department, Headed by Block Land and Land Reforms Officer	Level and Revenue Officer at the Block Level and to give them training.	warning among the villagers living in the protected and un protected areas.		Will assess the extent of damage and to inform the matter to the higher authority.
Health – Headed by Block Medical Officer, Health	<p>Several teams may be formed at different places with selected staff headed by the Health Supervisors and to impart trainings to them.</p> <p>Stock essential medicines, vaccines, AVS, Halogen tablets, Bleaching Powder etc. for emergency period as per plan.</p> <p>Organize GP wise orientations programmes for all health professionals including Health Supervisors, Health Assistants, ANMs, ASHA Karmis on how to execute the plan and role of different professionals and the coordination mechanisms.</p>	Teams to remain prepared and disseminate the warning among the villagers through their network.	Team members may join the shelter management teams.	Will assess the extent of damage and start health camps and closely monitor the situation to avoid any further health related disaster.
Irrigation - headed by SAE, Sech – O – Jalpath Daftar, Sech Sakha,	Will take care of the embankments of the Rivers in regards to rain-cuts, evidenced in some parts of the main embankment.	Will disseminate the warning among the villagers living in the protected and un protected areas.	To see the condition of the main embankments of the rivers. To keep co-ordination with local administration.	Construction of the damaged embankments are to be taken up immediately.
RD & R&B - The name of the department is Public Works department, Headed by Assistant Engineer PWD Roads	To form a team under the leadership of LDA at the GP level and to give them training.	To arrange for transmitting messages among the villagers in vulnerable areas and to coordinate with the Block administration.	To keep co-ordination with local administration.	Will assess the actual damage and will take necessary steps to ensure playability of the affected roads.
AH Dep. - The name of the	To form a team under the leadership of LDA at the GP level and to give them training.	To arrange for transmitting message among the	To keep co-ordination with local administration	Will assess the actual damage and will take necessary

department is Animal Husbandry, headed by Block Live Stock Development Officer		community in vulnerable areas through their village level network.		steps to ensure Cattle vaccination, cattle fodder etc.
Electric	To take precautionary measures for maintaining the cables and to form a team. The department also takes care of the poles during monsoon to prevent hazards from electrocution..	To keep their team ready.	To keep co-ordination with local administration.	To inspect the electric lines and to restore normalcy as early as possible.
Agriculture - Looked after by the Agriculture Development Officer	To form a team with the farmers headed by the KPS at the GP level. To record date wise maximum and minimum temperature at the block and rainfall.	To arrange for transmitting message among farmers in vulnerable areas.	To keep co-ordination with local administration.	Will assess the actual damage in terms of crop and cultivated area etc. and the names of affected farmers and will take necessary steps to ensure supply of minikits and others specially for re vitalizing the affected land of the farmers, To counsel the farmers in matters of re-vitalizing the land especially where the lands are covered by silts.
Public Health Engineering deptt.	Ready with materials & stock of Bleaching powder etc. at Divisional & Sub divisional Level	1)Inform all R.W.S. staff posted at different Blocks through AE, Cooch Behar R.W.S. sub division. 2)Alert all sub divisional staff through Executive Engineer, Cooch Behar Division & Northern	All works will be taken up through AEs/SAEs/Mech.?Hel pers RWS posted in different blocks.	Restoration works of different PWSS through sub divisions under Cooch Behar Division & Cooch Behar Mechanical sub division, P.H.E. Dte.

		Mechanical Division, P.H.E. Dte.		
--	--	--	--	--

NGOs	To arrange for extensive sensitization programme.  Volunteer team to be kept ready vulnerable area wise.	To keep contact with GP and block administration. To arrange to pass the message in the vulnerable areas.	Rescue Operation To arrange for shifting the affected people in the safer places. To keep co-ordination with local administration.	Provide relief.  Provide medicines and safe drinking water First aid and medical care
Gram Panchayat bodies	To arrange for making a net work for transmitting the message among the villagers in the vulnerable areas.	To arrange for transmitting message among farmers in vulnerable areas.	To keep co-ordination with local administration.	Arrangement to be taken for taking the affected people to the temporary relief shelters and to inform the matter to the block administration. A close contact with the evacuation, search and rescue team is also very much needed.
Food & Supplies Deptt.	Will take all action so that a buffer stock of 4000 Lts. of K.Oil may be arranged and kept ready for use during contingencies as there is no electricity in the vulnerable areas. To prepare a list of all the stockist, fair price owners and also to monitor them. To arrange for a network	To keep their team ready.	To keep co-ordination with local administration.	A close contact with the evacuation, search and rescue team is very much needed  To inform the matter to the block administration To inspect the situation to check the

	<p>with the MR/GR Dealer at the GP level and arrange to disseminate the message as has been received from the authority to the vulnerable areas.</p> <p>Do's and Don'ts and important telephone nos. are required to be displayed at the shop premises and at the petrol pumps so that every villagers / visitors can access the information to prepare themselves.</p>			price hike of the essential commodities.

## 7.2: Evacuation, Search and Rescue Response

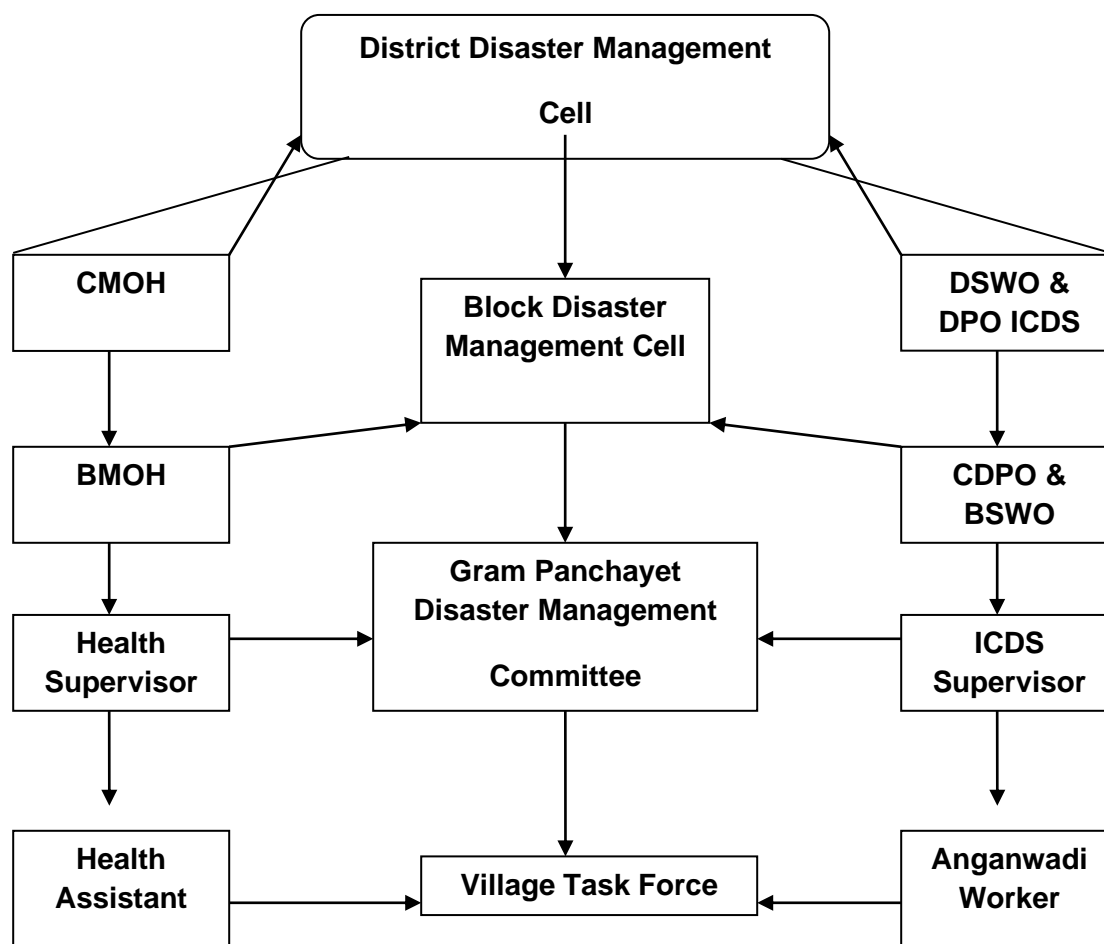

**(B) Evacuation, Search and Rescue:**

Department	Evacuation, Search and Rescue Response Structure and System			
	Preparedness	Pre(after Warning)	During Disaster	Post Disaster
Disaster Management Department/SDDMO/ CIVIL DEFENCE/ BDDMO / Panchayat Samiti/NGOs	<ul style="list-style-type: none"> <li>-Shelters to be identified.</li> <li>-A list of the same is to be given to the Prodhans.</li> <li>-The Head of the institutions are also to be required to be informed well in advance.</li> <li>-Necessary relief materials to be kept ready.</li> </ul>	Concerned Disaster Management Teams of the GP to be kept on alert.	To watch the situation and to coordinate with others.	<ul style="list-style-type: none"> <li>-To monitor search and rescue operation of all the departments.</li> <li>- They will also prepare a record of missing people and inform the report to the higher authority.</li> </ul>
Police	<ul style="list-style-type: none"> <li>-Police personnel will remain alert.</li> <li>-Volunteers to be given training to help police.</li> <li>-To Keep vigil against antisocial activities.</li> </ul>	To be aware of the temporary shelters and its' particulars.	Will observe the situation and to monitor closely.	<ul style="list-style-type: none"> <li>-Intensified patrolling.</li> <li>-Welfare attitude to build To Keep vigil against antisocial activities.</li> <li>-They will also prepare a record of missing people and inform the report to the Block Development Officer of the Block</li> </ul>
Medical	<ul style="list-style-type: none"> <li>-Sensitization programme in the vulnerable areas.</li> <li>-A team to be formed and to be informed to the block administration and to the Gram Panchayat Prodhans.G.P.</li> <li>-Health Supervisors are to arrange to counsel to the people of the vulnerable</li> </ul>	<ul style="list-style-type: none"> <li>-They are supposed to stock water purifying tablets, medicines, blade, bandage, iodine, ointment, ORS, delivery equipments etc., which will be used at the rescue shelters or during and after</li> </ul>	<ul style="list-style-type: none"> <li>-They will inform the Prodhans of the Gram Panchayat, BDO/ BMOH/ Savapati of the Panchayat Samiti for supply of medicines and allied items whenever the stock decreases.</li> <li>- To keep co-ordination with</li> </ul>	<ul style="list-style-type: none"> <li>-They will keep list of all infectious patients and try to keep all infectious patients in the rescued shelters separately at a safe distance from other rescued persons.</li> <li>-The team will be required to counsel affected persons who lost their</li> </ul>

	areas regarding purification of water and other allied matters.	calamity.	local administration.	relatives and property or only property. -All bereaved or stressed people will be given counsel/solution by the members of this team. Some members should be women. -They will constantly counsel rescued persons in the rescue shelters and see that no rescued person gets mentally derailed.
Embankment/ PWD/ Irrigation	-Will take care of approach roads towards specific areas assessed to be vulnerable. -Gram Panchayat Prodhans are to take appropriate measures pertaining to their respective areas in matters of ensuring pliability of village roads especially in vulnerable areas. In this matter, convergance of disaster management in to development plans to be taken up.	To be on alert	Will observe the situation and to monitor closely.	Will help the GP administration and block administration.
GO/ Volunteer	-This team has special responsibility of rescue of the affected persons. -The members of this team will also require rescue equipments like life jackets, life lines, rope, tyre, life jacket torch saw etc. . which will be used at	They will keep a list of the owners of carts, vans, four-wheeler, boats, etc so that at the time of calamity, these things can be utilized by the members of this team.	After getting information from the early warning team, will immediately visit all the low-lying areas , request all people to get out of their homes with important belongings and	-They will reach affected areas quickly and safely with doctors, relief materials and volunteers,. -They will also prepare a record of missing people and inform the report to the Block Development Officer of the Block

	the time of rescue during calamity		<p>cattle.</p> <p>-They will see that discipline is maintained by all the villagers at the time of the calamity because discipline will curtail rescue time.</p> <p>-Members of this team will complete evacuation before calamity actually strikes and they will also take shelter in the rescue shelters.</p>	<p>and the Prodhan of Gram Panchayat.</p> <p>-During a calamity, members of this team will arrange for transporting villagers who may fall sick, to the nearest health centre.</p> <p>-Will help people to remove their belongings and to bring them to rescue shelters</p> <p>-They will also keep a watch on the rescued materials</p>
Public Health Engineering	Water pouch, Tanker, spout arrangement at nearby PWSS, collection of water disinfectants (Holo gen tab., chorine tab, Bleaching powder, onsite mobile analysis system etc.	Procurement of materials.	Engaged all RWS Mech/ Senior workmen posted at different blocks for disinfection & repair of spot source headed by SAE,RWS	Restoration of PWSS & spot source with the help of Divisional & sub divisional staff/ Agencies

## First Aid & Health Services

**(C) Medical and First Aid:**

Departments	Medical Aid Response System			
	Preparedness	Pre (after warning)	During	Post
	<ul style="list-style-type: none"> <li>-Sensitization programme in the vulnerable areas.</li> <li>-Team to be formed.</li> <li>-Health Supervisors are to arrange to give counsel to the people of the vulnerable areas regarding purification of water and other allied matters.</li> </ul>	<ul style="list-style-type: none"> <li>-They are supposed to stock Halogen tablets / Aqua tabs, medicines, blade, bandage, iodine, ointment, ORS, delivery equipments etc., which will be used at the rescue shelters or during and after calamity.</li> </ul>	<ul style="list-style-type: none"> <li>-They will inform the Prodhan of the Gram Panchayat, BDO/ BMOH/ Savapati of the Panchayat Samiti for supply of medicines and allied items whenever the stock decreases.</li> <li>- To keep co-ordination with local administration</li> </ul>	<ul style="list-style-type: none"> <li>-They will keep list of all infectious patients and try to keep all infectious patients in the rescued shelters separately at a safe distance from other rescued persons.</li> <li>-The team will be required to counsel affected persons who lost lives and property or only property.</li> <li>-All bereaved or stressed people will be counseled /given solutions by The members of this team. Some members will be women.</li> <li>-They will constantly counsel rescued persons in the rescue shelters and see that no rescued person gets mentally derailed.</li> </ul>

BWO	-Arrange for sensitization Programme with the Health Department. -Request the Health Dept. to prepare a blueprint of their proposed action.	Keep a liaison with the Health Department	Will observe the situation and monitor	To assist the Health Department.
ADO/BLDO	-Will take necessary steps to ensure stock in respect of cattle fodder as per assessment and the VS will arrange for cattle vaccine etc. to combat flood situation. -VS will also complete the cattle vaccination before heavy rainfall. -To form a team with the farmers headed by the LDA and also block supervisors at the GP level.	To be on alert.	Will observe the situation and to monitor closely.	Will help the GP administration and block administration.

**(D) CARCASS/DEAD BODIES' DISPOSAL**

Departments	Preparedness	Pre (after warning)	During	Post
Health & Family Welfare	Sensitization programme	To observe the situation.	Keep on monitoring	<ul style="list-style-type: none"> <li>• Arrange for post mortem</li> <li>• Give the post mortem report to the police</li> <li>• Keep record and inform BDO</li> </ul>
Police	Sensitization programme	To observe the situation.	Keep on monitoring	<ul style="list-style-type: none"> <li>-Prepare a list of dead bodies.</li> <li>-Maintain Law &amp; Order</li> <li>-Arrange for post mortem</li> <li>-Keep record and inform BDO</li> </ul>
ADO/BLDO	Sensitization programme	To observe the situation.	Keep on recording	<ul style="list-style-type: none"> <li>-Prepare a list of animal population died.</li> <li>-Arrange for removal and burry</li> </ul>
BDO/Gram Panchayat	Sensitization Programme.	To observe the situation.	To observe the situation.	<ul style="list-style-type: none"> <li>-Will take necessary steps under the supervision of IC/OC of the Police Station and BMOH of the Concerned Block.</li> <li>-Arrange for removal and burry.</li> </ul>
NGO Volunteers	To take part in the Sensitization Programme	To form a team and to contact with the GP Officials	To observe the situation.	Will take necessary steps under the supervision of GP Prodhan and IC/OC of the police Station.

**(E) SHELTER MANAGEMENT**

Departments	Shelter Management - Response System			
	Preparedness	Pre (after Warning)	During	Post
DISASTER Management Deptt/ SDDMO/BDMO / Panchayat Samity/Cibil Defence/NGOs	-Discussion, Co-ordination, -To visit the rescue shelter or the proposed rescue shelters for making the shelter habitable. -To reach the rescue shelters before hand -To ensure health and nutrition components in the food which will be supplied to the rescued people at the shelters.	-To take care of Rescue shelters, Safe shelter, Supply of food, Water and medicines to the rescued people. -To arrange for stocking water, sanitation, and separate sanitation for women. -To arrange for food utensils and medicines at the proposed rescue shelters at the time of actual calamity.	Observation.	-To keep list of all infectious patients and try to keep all infectious patients in the rescued shelters separately at a safe distance from other rescued persons. -To counsel affected persons who lost lives and property or only property. All bereaved or stressed people will be required to be given counsel/solution by the members. - To see that no rescued person gets mentally derailed.
Police	To arrange for sensitization programme. To arrange for a team	To arrange to maintain law and order in and around the shelters.	Observation.	To maintain law and order.

Electricity	Plan for temporary electric supply to be ready and to submit a report to the B.D.O.	To form a team and to keep their instruments ready.	Observation.	Construction of the temporary installation in the temporary shelter to be executed.
NGO/ Volunteers	-Discussion, -Co-ordination, -Observation. -This team will ensure health and nutrition in the food which will be supplied to the rescued people at the shelters. -Members of this team are required to visit the rescue shelter or the proposed rescue shelters for making the shelter habitable. -Before actual calamity strikes, the members of this team will reach the rescue	-This team will take care of Rescue shelters, Safe shelter, Supply of food, Water and medicines to the rescued people. -They will also arrange for stocking water, sanitation, and separate sanitation for women. -Members of this team will arrange for food utensils and medicines at the proposed rescue shelters at the time of actual calamity.	Observation.	-They will also arrange for keeping the rescue shelters clean and germ-free by spreading bleaching power around the shelter. -Special care will be taken by the members of this team for children, aged persons, infirm and sick persons, pregnant and lactating mothers. -Members of this team will also arrange for recording the names of every rescued persons and for issuing identification slips to them

	shelters beforehand.			so that by showing these slips the rescued persons may obtain supply of food, water and medicine.
RWS & S	Action Plan to be prepared and to submit a report.	To form a team and to keep their instruments ready.	Observation.	Temporary installation of Tube wells in the temporary shelter and also arrange for purification of water and disinfection of the tube wells in the vulnerable areas.
Medical / ICDS / PHE	<p>-Sensitization programme in the vulnerable areas.</p> <p>-Teams to be formed and to be informed to the block administration and to the Gram Panchayat Prodhans, G.P.</p> <p>-Health Supervisors are to arrange to counsel to the people of the vulnerable areas regarding purification of water and other allied matters.</p>	They are supposed to stock Halogen/Aqua Tabs, medicines, blade, bandage, iodine, ointment, ORS, delivery equipments etc., which will be used at the rescue shelters or during and after calamity.	They will provide first-aid services to rescued persons	<p>-They will keep list of all infectious patients and try to keep all infectious patients in the rescued shelters separately at a safe distance from other rescued persons.</p> <p>-The team will be required to counsel affected persons who lost lives and property or only property.</p> <p>-All bereaved or stressed people will be counseled by the members of this team. Some members will be women.</p> <p>-They will constantly counsel rescued persons in the rescue shelters and see that no rescued person gets mentally derailed.</p>

**(F) Water and Sanitation**

Departments	Health and Sanitation Response System			
	Preparedness	Pre (after Warning)	During	Post
PHE / SDDMO/BDMO / Sanitary Inspector	<p>-Sensitization programme in the vulnerable areas.</p> <p>A team to be formed and to be informed to the block administration and to the Gram Panchayat Prodhans.G.P.</p>	<p>-They are supposed to stock water purifying tablets, medicines, blade, bandage, iodine, ointment, ORS, delivery equipments etc., which will be used at the rescue shelters or during and</p>	<p>-They will supply first-aid to rescued persons and inform the Prodhans of the Gram Panchayat, Block</p>	<p>-They will keep list of all infectious patients and try to keep all infectious patients in the rescued shelters separately at a safe distance from other rescued persons.</p> <p>-The team will be required to counsel affected persons who lost lives and property or only</p>

	<p>-Health Supervisors are to arrange to counsel to the people of the vulnerable areas regarding purification of water and other allied matters.</p>	after calamity.	<p>Development Officers/ Block Medical Officer of Health/ Savapati of the Panchayat Samiti for supply of medicines and allied items whenever the stock decreases. -To keep co-ordination with local administration.</p>	<p>property. -All bereaved or stressed people will be given counsel/solution by the members of this team. Some members will be women. -They will constantly counsel rescued persons in the rescue shelters and see that no rescued person gets mentally derailed.</p>
RD/NGO /volunteers	<p>-People will be instructed by these members to develop sanitation in their families before, during and after the calamity. -Before a calamity, this team will arrange for raising the platform of some of the tube wells so that people can use those tube wells during inundation. -The team will prepare a list of all Children, pregnant mothers and physically handicapped persons, infirm and aged persons of the village and obtain information on their medical treatment.</p>	<p>-Members of Water and Sanitation Team will try to collect sufficient quantity of Bleaching Powder and water purifying tablets. -They are supposed to stock water purifying tablets, medicines, blade, bandage, iodine, ointment, ORS, delivery equipments etc., which will be used at the rescue shelters or during and after calamity.</p>	<p>-It is the duty of this team to see that no rescued person go for open defecation. -They will supply first-aid to rescued persons and inform the Prodhan of the Gram Panchayat, Block Development Officers/Block Medical Officer of Health/ Savapati of the Panchayat Samiti for supply of medicines and allied items whenever the stock decreases.</p>	<p>-They will see 1.that Rescue centers have separate toilets and 2. Rescued people use temporary toilets prepared near the rescued centers. 3. Members of this team will also arrange for clearing drainage and maintain the cleanliness. -These members will ensure that rescued persons use only fixed toilets. -These members will also stay at the rescue centres during calamity. -After the calamity, it is the duty of these members to spread Bleaching Powder and other disinfectant in and around affected areas to clear the rescue centers, temporary toilets, guide people to use purified water only and to help villagers to use purified water of the tube wells and wells. -They will keep list of all infectious patients and try to keep all infectious patients in the rescued shelters separately at a safe distance from other rescued persons.</p>

**(G) Relief**

<b>Departments</b>	<b>Health and Sanitation Response System</b>			
	<b>Preparedness</b>	<b>Pre (after Warning)</b>	<b>During</b>	<b>Post</b>
Disaster Management Department/ SDDMO/BDMO/GP	Discussion, Co-ordination, discipline, observation, arrangement of stocking of relief articles etc.	To see that storage of packets, baby food, dry food, medicine, torch, dry cell, kerosene oil, hurricane, fuel wood bamboo, rope, tarpaulin sheet etc. at the temporary rescue shelters. Fodder and medicine for cattle should also be stored.	Observation  To see as to the affected persons' coming in the rescue shelter	-To arrange for supplying relief materials to rescue centers as per plan -To arrange for keeping a vigil that all rescued persons are provided with relief materials. -To maintain proper accounts for receiving and distributing all relief material. -To assess damages and arrange for compensation for the villagers.
BLDO	-Will take necessary steps to ensure stock in respect of cattle fodder as assessment and the VS will arrange for cattle vaccine etc. to combat flood situation. -VS will also complete the cattle vaccination before heavy rainfall. -To form a team with the farmers headed by the LDA and also block supervisors at the GP level.	To be on alert	Will observe the situation and to monitor closely.	Will help the GP administration and block administration.
RWS	Action Plan to be prepared and to submit a report to the B.D.O.	To form a team and to keep their instruments ready.	Observation.	Installation of temporary Tube wells in the temporary shelters and also arrange for purification of water and disinfection of the tube wells in the vulnerable areas to be made.

NGO/Volunteers	Discussion, Co-ordination, discipline, observation, arrangement of stocking of relief articles etc.	This team will be responsible for stocking packets, dry food, medicine, torch, dry cell, kerosene oil, hurricane, fuel wood bamboo, rope, tarpaulin sheet etc. at the temporary rescue shelters. Fodder and medicine for cattle should also be stored.	They will see as to the affected persons' coming in the rescue shelter	-This team will supply relief materials to rescue centers as per provisions. -Some of the members of this team may stay at the rescue shelters to keep a vigil that all rescued persons are provided with relief materials. -They will maintain proper accounts for receiving and distributing all relief material. -This team will also assess damages and arrange for compensation for the villagers.

*(Note: For all the eight groups' roles and responsibilities should be defined for flood, cyclone, Drought, fire, earthquake, chemical hazard depending on the vulnerability of the area)*

### 7.3: CHECKLISTS: DO'S AND DON'TS : Hazard Specific Instructions

#### Important Guidelines in case of Emergency

- Listen to a battery-powered radio and follow local evacuation instructions.
- Secure your home: Unplug electrical equipment, such as radios televisions and small appliances such as toasters heaters, etc.
- Leave freezers and refrigerators plugged in unless there is a risk of flooding.
- Follow recommended evacuation routes. Do not take shortcuts; they may be blocked.
- Be alert for washed-out roads and bridges.
- Do not drive into flooded areas.
- Stay away from downed power lines.

#### a) Operational Guidelines of what to do in the event of a Flood.

Do's	Don'ts
<ul style="list-style-type: none"> <li>• Avoid building in a floodplain unless you elevate and reinforce your home.</li> <li>• Elevate the pumps and electric panel if susceptible to flooding.</li> <li>• Install 'check valves' in sewer traps to prevent flood water from backing up into the drains of your home.</li> <li>• Construct barriers (levees, beams, floodwalls) to stop floodwater from entering the building.</li> <li>• Seal walls in basements with waterproofing compounds to avoid seepage.</li> </ul> <p><b>if a flood is likely in the area</b></p> <ul style="list-style-type: none"> <li>• Listen to the radio or TV for information.</li> <li>• Be aware that flash flooding can occur. If there is any possibility of a flash flood, move immediately to higher ground. Do not wait for instructions to move.</li> <li>• Be aware of streams, drainage channels, canyons, and other areas known to flood suddenly. Flash floods can occur in these areas with or without such typical warnings as rain clouds or heavy rain.</li> </ul> <p><b>If you must prepare to evacuate, you should do the following:</b></p> <ul style="list-style-type: none"> <li>• Secure your home. If you have time, bring in outdoor furniture. Move essential items to an upper floor.</li> <li>• Turn off utilities at the main switches or valves if</li> </ul>	<ul style="list-style-type: none"> <li>• Do not enter deep, unknown waters.</li> <li>• Do not go near the riverbank even after the floodwater has receded.</li> <li>• Do not try to leave the safe shelter to go back home until the local officials declare normalcy after flood and instruction to return home are not given.</li> <li>• Do not use polluted water.</li> <li>• Do not follow any shortcut for rescue work.</li> <li>• If you find any breakage in the drainage system stop using latrines and do not use tap water.</li> <li>• If the floodwater has entered the house or has surrounded the house, then it is advisable not to enter such house.</li> </ul>

instructed to do so. Disconnect electrical appliances. Do not touch electrical equipment. If you are wet or standing in water.

**If you have to leave your home, remember these evacuation tips:**

- Do not walk through moving water. Six inches of moving water can make you fall. If you have to walk in water, walk where the water is not moving.
- Use a stick to check the firmness of the ground in front of you.
- Do not drive into flooded areas. If floodwaters rise around your car, abandon the car and move to higher ground if you can do so safely. You and the vehicle can be quickly swept away.

**After a Flood, Do these**

- There is a possibility of spread of water borne diseases after flood, hence medical treatment should be taken immediately.
- Sprinkle medicines in the stagnant dirty water.
- Inspect your house for any cracks or other damage. Check all the walls, floor, ceiling, doors and windows, so that any chance of house falling down can be known and you can be aware about the immediate danger.
- Keep listening to weather forecast on radio and television. Move to your residence only when instructed by the competent authority. It is not safe to believe that the
- problems have ended after the flood water have receded.
- Inform the competent authority/officer for restoration of the necessary connections like gas, electricity, telephone, drainage, etc.
- Beware of the various insects or poisonous snakes that may have been dragged inside the house along with the floodwater.
- Destroy the food commodities that have been affected by floodwater.
- Check properly all the electric circuits, floor level furnace, boilers, gas cylinders, or electric equipments like motor pump etc. Check whether any inflammable or explosive item has not entered along with the floodwater.
- Switch off the main electric supply, if any damage is noticed to the electric equipments.
- Sewerage system should be checked and any damage should be repaired immediately so as to curtail spread

<p>of diseases.</p> <ul style="list-style-type: none"> <li>• Empty the water clogged in the basement slowly with help of water pump so that damage to infrastructure can be minimized</li> <li>• Check gas leakage which can be known by smell of gas or by hearing the sound of leakage; immediately open all windows and leave the house.</li> <li>• Boil drinking water before use and drink chlorinated water.</li> <li>• Eat safe food.</li> <li>• Rescue work should be undertaken immediately after flood situation as per the instructions.</li> </ul>	
--	--

**b) Operational Guidelines of what to do in the event of a Cyclone.**

c)

<b>Do's</b>	<b>Don'ts</b>
<p><b>Do's if you are in a cyclone prone area</b></p> <ul style="list-style-type: none"> <li>• Make plans to secure your property.</li> <li>• Install straps or additional clips to securely fasten your roof to the frame structure.</li> <li>• Trees and shrubs should be well trimmed.</li> <li>• Clear loose and clogged rain gutters and downspouts.</li> <li>• Secure loose objects like boats, drums, etc.</li> </ul> <p><b>In case of a cyclone</b></p> <ul style="list-style-type: none"> <li>• Listen to the radio or TV for information.</li> <li>• Secure your home, close storm shutters, and secure outdoor objects or bring them indoors.</li> <li>• Turn off utilities if instructed to do so.</li> <li>• Avoid using the phone, except for serious emergencies.</li> <li>• Ensure a supply of water for sanitary purposes.</li> </ul> <p><b>You should evacuate under the following conditions:</b></p> <ul style="list-style-type: none"> <li>• If you are directed by local authorities to do so.</li> <li>• If you live in mobile home or temporary structure— such shelters are hazardous during cyclones no matter how well fastened to the ground.</li> <li>• If you live in high rise buildings—Winds are stronger at higher elevations.</li> <li>• If you live on the coast, on a floodplain, near a river, or an inland waterway.</li> <li>• If you feel you are in danger.</li> </ul> <p><b>if you are unable to evacuate, go to a wind safe room.</b></p> <p><b>If you do not have one, follow these guidelines:</b></p>	<ul style="list-style-type: none"> <li>• Keep curtains closed. Do not be fooled if there is a lull; it could be the eye of the storm. Winds will pick up again.</li> </ul>

<ul style="list-style-type: none"> <li>• Stay indoors during the cyclone and away from windows and glass doors.</li> <li>• Close all interior doors - secure and brace external doors.</li> <li>• Take refuge in a small interior room, closet or hallway on the lowest level.</li> <li>• Lie on the floor under a table or another sturdy object.</li> </ul>	
---	--

### Operational Guidelines of what to do in the event of an Earthquake

Do's	Don'ts
<p><b>Points To Remember:</b> prepare yourself</p> <ul style="list-style-type: none"> <li>• Insure your house against damage.</li> <li>• Before you buy a flat, check legality of the construction – ask for copy of the ‘Building Use permit’ or ‘occupation certificate’.</li> <li>• Ensure all cabinets, wall hangings are anchored to the walls.</li> <li>• Sensitize your neighbours about the earthquake risk they face and organize repair work if required.</li> <li>• Get your building reviewed by a competent and registered structural engineer.</li> <li>• Structural retrofitting should be done only under supervision of a structural engineer.</li> <li>• Ensure all clearances before construction of new building.</li> <li>• Check if the land is not prone to flooding.</li> <li>• Check the soil is not soft and is not liquefiable and build on solid natural ground.</li> <li>• Get your building plans approved from the relevant authorities.</li> <li>• Ensure there is good connection between roof and walls, foundation and walls, at wall corners.</li> <li>• Enforcement of building byelaws.</li> <li>• Strengthening of public buildings.</li> </ul> <p><b>When You Know there is an Earthquake</b> do this!</p> <ul style="list-style-type: none"> <li>• If already inside, then stay indoors! Get under a heavy desk or table and hang on to it.</li> <li>• If fire breaks out, drop on the floor and crawl towards the nearest exit.</li> <li>• If you are out doors during the earthquake, keep away from buildings, trees and electricity lines. Walk towards open places, in a calm and composed manner.</li> <li>• If you are driving, quickly but carefully move your car as far out of traffic as possible and stop. Stay inside the car until shaking stops.</li> <li>• If you are in a school, get under a desk or table and hold on to it.</li> <li>• If you are near an exit, leave the building as soon as possible.</li> <li>• If you are in high-rise building, staircase do drop cover and hold sit or lie besides under mentioned furniture.</li> </ul> <p><b>After An Earthquake</b></p>	<ul style="list-style-type: none"> <li>• <b>Do not panic</b></li> <li>• Do not stop on or under a bridge or overpass or under trees, light posts, power lines, or signs.</li> <li>• Do not be afraid of the aftershocks.</li> <li>• Do not enter into the unsafe or risky houses or building</li> </ul>

- |   |  |
|---|--|
| <ul style="list-style-type: none"> <li>• Listen to radio or TV and other media for Government Announcements.</li> <li>• Check for injuries to yourself and those around you. Take first aid where you can.</li> <li>• Extinguish fires, if any.</li> <li>• Examine walls, floors, doors, staircases and windows to make sure that the building is not in danger of collapsing.</li> <li>• Inspect for Gas leaks — if you smell gas or hear blowing or hissing noises, open a window and quickly leave the building. Don't light your kitchen stove if you suspect a gas leak.</li> <li>• Do not keep telephone lines busy unnecessarily.</li> <li>• Switch off electric lines.</li> </ul> |  |
|---|--|

## CHAPTER 8:

### RECONSTRUCTION, REHABILITATION AND RECOVERY MEASURES

Recovery encompasses both short-term and long-term efforts for the rebuilding and revitalization of affected communities. Recovery planning must provide for a near-seamless transition from response activities to short-term recovery operations—including restoration of interrupted utility services, re-establishment of transportation routes and the provision of food and shelter to displaced persons. Planners should design long-term recovery plans to maximize results through the efficient use of resources and incorporate national recovery doctrine.

Damage assessment mechanism:- Damage Assessment is a preliminary onsite evaluation of damage or loss caused by an accident or natural event. Damage assessments record the extent of damage, what can be replaced, restored or salvaged. It may also estimate the time required for repair, replacement and recovery.

Damage assessment is an integral part of facilitating effective and efficient response by government agencies and other organisations. Good damage assessment would start the ball rolling for effective response and relief operations such as evacuation, sheltering, search and rescue, mass casualty management, etc.

Damage assessment would be conducted as soon as possible after the disaster, but assessors must put their own safety first. The **Initial Situation Overview (ISO)** is carried out to obtain as quickly as possible a broad picture of the extent of damage caused by the impact. It is typically carried out and submitted within the first 8 hours after the event and focuses on issues such as casualties, displacement of the population and damage to lifelines and critical facilities. It is largely based on observations reported by key organizations and officials through general reconnaissance rather than detailed field assessment. The ISO often involves observation from an aircraft, sometimes satellite photographs, and various other reports. The information from the Initial Situation Overview allows national/local officials to determine immediate actions necessary to respond to the effects of the hazard.

### 1. Restoration of basic infrastructure

Short term - Restoration of Basic Infrastructure including roads, bridges, drinking water supply, electricity, communication network and roads/ paths leading to the villages; Restoration/ Repair of the lifelines/critical buildings – repair/reconstruct the lifeline buildings /critical buildings which are necessary for treating the affected people or rehabilitation in these buildings as shelters.

### 2. Reconstruction and Repairs

### 3. Recovery program (both short and long term)

The nodal departments are to be assigned the responsibilities of reconstruction and restoration activities, perform these activities diligently and restore the minimum basic infrastructure in the area which is vital for sustaining human life in the area. These departments are PWD, Health & family welfare, Electricity Boards, Development authority, Roads and Buildings, water supply and sanitation departments.

82

### **Reconstruction /Rehab/Prevention/Mitigation Plans**

#### **Irrigation :**

#### **A. SHORT TERM MEASURES:**

1. Procurement of sand, sand bags and empty bags as flood fighting materials and storing them at pertinent locations well in advance.
- 2.

#### **Agriculture :**

#### **TENTATIVE REQUIREMENTS OF INPUTS FOR EARLY & LATE FLOOD AND DRAUGHT**

WBSSC Ltd. will be requested to be prepared for supply of required quantity of seeds of specific varieties as follows-

#### **Public Health Engineering :**

## **CHAPTER 9:**

### **FINANCIAL RESOURCES FOR IMPLEMENTATION OF DDMP**

District Disaster Response Funds and District Disaster Mitigation Funds are proposed to be created at the District Level as mandated by Section 48 of the DM Act. The disaster response funds at the district level would be used by the DDMA towards meeting expenses for emergency response, relief, rehabilitation in accordance with the guidelines and norms laid down by the Government of India and the State Government.

All State Government Departments, Boards, Corporations, PRIs and ULBs would prepare their DM plans, including the financial projections to support these plans. The necessary financial requirements would be made a part of their annual budgetary allocations and ongoing programmes and used for mitigation and preparedness measures. They will also identify mitigation projects and project them for funding in consultation with the SDMA/DDMAs to the appropriate funding agency. The guidelines issued by the NDMA vis-a-vis various disasters should be considered while preparing mitigation projects.

Other financing options for restoration of infrastructure / livelihoods. Like utilization of flexi fund within Central Sponsored Scheme for mitigation/restoration activities in the event of natural calamities in accordance with the broad objective of the Central Sector Scheme.

DDMA should also look at other options of new financial tools like catastrophe risk financing, risk insurance, micro-insurance etc. to compensate for massive losses on account of disasters.

Opportunities of CSR investments should also be explored and elaborated under this section by the DDMA for increasing district resilience.

## **CHAPTER 10:**

### **PROCEDURE AND METHODOLOGY FOR MONITORING, EVALUATION, UPDATION AND MAINTENANCE OF DDMP**

Evaluating the effectiveness of plans involves a combination of training events, exercises etc. to determine whether the goals, objectives, decisions, actions and timing outlined in the plan will result in an effective response. Indicative guidelines for monitoring and evaluation of the plan are as given below:

1. Review of the plan take place once in a year .

## **CHAPTER 11:**

### **COORDINATION MECHANISM FOR IMPLEMENTATION OF DDMP**

Dealing with a major disaster requires resources from outside the district. When the capacities of a district administration are overwhelmed, higher levels are called upon to assist. Likewise, assets and capabilities in the corporate and non-governmental sectors available around the district may be brought to bear.

There are many actions undertaken by participants in disaster management that support this goal, both pre-disaster (to forestall or reduce potential damage) and post-disaster (to recover from actual damage) and ideally these activities would reduce the potential effects of a disaster significantly. For achieving this objective, the plan should have a pre-established and practiced mechanism for Inter, intra and extra agency coordination.

Communication is the most important tool for effective coordination. Generally, Emergency Operation centre (EOC) is the enabler of communication and coordination. EOC communication and coordination plan (EoC-SoP) should specify procedures for interfacing with different stakeholders during all phases of emergency, as stated in the DDMP framework.

Pre-Disaster meetings to review the DDMP with all stakeholders should also be planned.

## CHAPTER 12:

### STANDARD OPERATING PROCEDURES (SOPs) AND CHECK LIST

#### Standard Operating procedures (SOPs)

Standard Operating Procedures (SOPs) are a common method of implementing instructions. SOPs provide response protocols for carrying out specific responsibilities. They describe who, what, when and how SOPs are appropriate for complex tasks requiring step-by-step instructions for performing a task. It is necessary to prepare and annex - SOPs for all relevant hazards to one's district – like – Earthquake, Flood, Cyclone, Landslide, Tsunami, Manmade disasters (CBRN, Stampede etc.) .

Hazard or incident specific annexes usually identify hazard specific risk areas and evacuation routes, specify provisions and protocols for warning the public and disseminating emergency public information and also specify the types of protective equipment and detection devices required by responders.

The annexes have work aids for items including maps, charts, tables, checklists, resource inventories and summaries of critical information. As indicated previously, hazard-specific annexes follow the basic plan's content organization. Hazard-specific operations information includes:

- I. Assessment and control of the hazard (natural and manmade including mass gathering at places of congregation).
- II. Identification of unique prevention and CIKR protection activities to be undertaken to address the hazard or threat, as appropriate
- III. Selection of protective actions
  - V. Implementation of protective actions
  - VI. Implementation of short-term stabilization actions
  - VII. Implementation of recovery actions.

**Example of implementation instruction** – evacuation annex may be made clearer by attaching maps with evacuation routes marked. Similarly, location of shelters may be marked on maps supporting the mass care annex.

2. (i) Resource Management annexure – Give resource(s) list. Describes the means, organisation and process by which district will find, obtain and allocate resources to satisfy needs that are generated during different phases of disaster cycle. The list will also include resources (equipment and personnel) for fire response.
- (ii) This annexure will also include list of contact / access numbers of all important resources (including man, material and machineries). The list of equipments, assets including human

resources details/skill of persons etc of both public and private sector to be uploaded by the district authorities on the Indian Disaster Resources Network at the website [www.idrn.gov.in](http://www.idrn.gov.in).

**(iii) Helipads / Runways:**

Details of runways and helipads (non-classified) with geo-coordinates, their status (operational/non-operational etc.) and specification should be incorporated into the resources list. Details of department/ministry holding information on runways / helipads falling under classified category should be reflected in the resource management annexure.

**(iv) On-Line Application:**

Online application should be developed for mapping crucial real time information, reflecting exactly what is happening, what is most needed, and precisely where. Such applications should be integrated with the State portal and tested from time to time.

3. **Communication annex** – describes total communication system and how it will be used.
4. **Warning annex** – describes warning system in place and responsibilities and procedures for using them.
5. **Emergency Public information annex** – provides the procedures for giving public accurate, timely and useful information and instructions through the emergency period
6. **Evacuation annex** – describes the provisions that have been made to ensure the safety and orderly evacuation of people threatened by hazards that the district faces.
7. **The mass care annex** – deals with the actions that are to be taken to protect evacuees and other disaster victims from the effects of disasters including providing temporary shelters, food, medical care, clothing, drinking water and other essential needs.
8. **The health and medical annex**- describes policies and procedures for mobilising and managing health and medical services during all phases of disaster cycle.
9. **Mutual aid / partnerships with other agencies annex** – MoU with corporate sectors, telecom service providers, pharmaceutical industries, heavy machinery users / manufacturers, NGOs etc.

## **10. Damage assessment annex**

**In case of CIKR and the places of congregation the responsible owner/agency/organisation/trust would prepare on-site and off-site DM plan, as per the available guidelines, in consultation with DDMA.**

## **SAMPLE / EXAMPLE**

### **SOP for Earthquake (without warning situation)**

Earthquakes can neither be predicted nor prevented. When an earthquake strikes, the district team must be ready to respond. To survive, the administration and neighbourhood community members should be prepared with 'survival plans'. Preparing for an earthquake takes time and effort. The basic approach should be: (a) Avoid injury to self and help others; (b) minimize damage to CIKR installations and property; (c) Be prepared to survive and function for at least 72 hours after an earthquake without help from external aid.

#### **Special Hazards / Precautions:**

1. Earthquake impact can cause damage to critical infrastructures including telecom, power transmission, water supply, gas or oil pipelines resulting in pipe rupture or blast from ignition of accumulated associated well gas and vaporization of crude oil pool.
2. Each agency must immediately shut down all operations and supply in pipeline / transmission lines as per their on-site emergency response plan.
3. Depending upon the intensity, <6 Magnitude evacuation may be required for both within the facility as well as for neighbouring community to assemble in designated open ground/ muster point.
4. Fire fighting, search and rescue teams to be kept in standby for any emergency rescue operations.
5. Emergency coordination team to monitor the situation.
6. Only after proper safety inspection, critical infrastructure facilities may be asked to resume their operation.

#### **Emergency Response Resource Requirements:**

- 1. Emergency Communication**
  - i. Sat phones for wide area communication
  - ii. Wireless for local area communication
- 2. Fire management services:**
  - i. Mobile fire protection system
- 3. Specialised resources (Pre-contracted under MoU)**
  - i. SAR
  - ii. Specialised equipment's for SAR
- 4. Manpower:**
  - i. Additional fire fighters / support personnel

**5. Medical**

- i. Ambulances
- ii. Doctors
- iii. Nurses
- iv. Stretchers
- v. Pharmacy supply / First aid kits

**6. Law and Order**

- i. Police

**INCIDENT ACTION PLAN (IAP):**

It is important that activities indicated in the IAP are connected with the functional responsibility matrix given under the plan activation section in basic plan.

<b>S.No.</b>	<b>Task / Function / Activity</b>	<b>Department/ Officer Responsible</b>	<b>Time</b>
1	Raise alarm	Civil Defence	
2	The staff to follow ‘drop-cover-hold’ procedures and assemble at pre-designated safe muster points	Schools, Colleges	During Earthquake
3	Emergency Alarm/Notification/ Notify Authorities & external agencies (Refer Emergency Contact in Appendix)		
4	Issue instructions to shut down all operations immediately on CIKR	Electric connections shut down by- WBSEDCL,	During Disaster
5	Assess situation, make evacuation plan and evacuation	All line Department, Schools, Colleges	During and after situation
6	Activate special resources for SAR including JCBs, Earth-movers, Steel cutters	PWD, Municipalities	After Earthquake
7	Establish Unified Command (for liaison with responding agencies)	District Authority	
8	Coordinate and mobilize specialized medical teams with		During & After Earthquake

	mobile operation theatres	Health Department	
9	Coordinate and mobilize transport and logistics	Motor Vehicle Dept.	
10	Assess Hazards – potential for leakage and consequent explosion		
11	Cordon off the area – Establish —hazard zone and secure area from unauthorized entry.	Police	
	<b>Community Evacuation Plan</b>		
12	Trigger alarm/early warning siren and evacuate community to pre-designated open ground	Schools, Colleges	During Earthquake
13	Ensure speedy coordination for evacuation	Schools, Colleges	
14	Attend the injured with first aid and transport them to hospital	Volunteers	
15	Assure the people by sharing the real impact of incident and seek their cooperation	Media	
16	Provide temporary shelter with water, food and sanitation facilities	District Authority	
	<b>Conduct damage assessment</b>		
17	Only after thorough check-up and formal clearance, community can be permitted to return to their habitation		

### **SOP for Flood and Flash Flood (with warning situation)**

#### **Preparing for Flood/Flash Flood**

Describe vulnerability of your district to flood / flash flood in couple of lines with impact assumptions.

#### **Precautions:**

1. Flooding can disrupt continuity of Governance and the life of the community
2. Flooding can lead to disruption in electrical supply and communication and cause damage to roads, bridges and other infrastructure.
3. Depending upon the level and quantum of water inundation evacuation required for community to move to safe zones.
4. Search and rescue teams to be kept in standby for any emergency rescue operations
5. Emergency coordination team to monitor the situation
6. Ensure that drainage channels / —*nalla*"s" are de-silted and bunds are periodically maintained.

#### **Emergency Response Resources:**

##### **Specialist Resources**

1. Search and rescue teams (divers/swimmers, Emergency Medical )
2. Specialized equipment- like boats, life jackets (helicopters), etc.

##### **Manpower**

1. Support Personnel

##### **Medical Support**

1. Ambulances (complete with emergency medication)
2. Doctors
3. Nurses
4. Stretcher Bearers
5. Oral Rehydration Satchets (ORS)

**Law & Order Agencies**

1. Police

**Other Essentials**

1. Water storage tanks
2. Chlorine tablets
3. Temporary shelters with sanitation facilities
4. Temporary common kitchen or food packets

**Incident Action Plan (IAP)**

It is important that activities indicated in the IAP are connected with the functional responsibility matrix given under the plan activation section in basic plan.

Task / Function / Activity	Department/ Officer Responsible	Time
Raise alarm / Mass messaging / Community siren system		
look out for regular updates from Indian Meteorological Department (IMD) and Central Water Commission (CWC) for forecast and follow up action.	District Authority, EOC	Entire period
Alert all ESF to start working on their role	District Authority	During Flood
Raise alarm if water level is reaching <b>critical level</b> of jeopardizing safety of infrastructure	Irrigation	
<p>Assess situation, make evacuation plan and move community to safer zones</p> <p>Activate special resources</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Search and rescue (divers/swimmers, boats, life jackets, searchlights, nylon ropes)</li> <li><input type="checkbox"/> Specialized equipment (helicopters, sandbags, crowbars, spades, portable motor pumps)</li> </ul> <p>Establish Unified Command (for liaison with responding agencies) close/cordon flooded roads and area from entry.</p>	<p>Panchayat Institution, Schools</p> <p>Civil Defence</p> <p>Army/BSF</p> <p>District Authority</p> <p>Police</p>	
Assess situation hour to hour in close contact with IMD/CWC and other agencies	Irrigation	
Conduct damage assessment		
Only after thorough check-up and formal clearance, community can be permitted to return to their habitation	Panchayat Institution	

**(Note: The list is indicative and needs to be expanded)**

### Introduction

The Disaster Management Act, 2005 (DM Act, 2005) lays down institutional and coordination mechanisms for effective Disaster Management (DM) at the national, state, and district levels. As mandated by the Act, the Government of India (GoI) created a multi-tiered institutional system consisting of the National Disaster Management Authority (NDMA), headed by the Prime Minister, the State Disaster Management Authorities (SDMAs) by the Chief Ministers and the District Disaster Management Authorities (DDMAs) by the District Collectors and co-chaired by elected representatives of the local authorities of the respective districts. **These bodies have been set up to facilitate the paradigm shift from the hitherto relief-centric approach to a more proactive, holistic and integrated approach of strengthening disaster preparedness, mitigation and emergency response.**

**Airports Authority of India, being a public sector undertaking of Government of India (GoI), under the Ministry of Civil Aviation has prepared its Disaster Management plan with the twin objective of**

- 1.) Provide assistance to the National Disaster Management Authority (NDMA) and State Disaster Management Authority (SDMA) by making available its resources to the National Executive

Committee or State Executive Committee for the purposes of responding promptly and effectively to any threatening disaster situation or disaster.

- 2.) Use the resources available with Disaster Management Authorities at all levels to effectively manage the aviation Disasters, happening at the airport or off the airport.

Aviation is not new to disasters as in spite of the continuous efforts to improve safety and indeed air travel is one of the safest mode of travel, aircraft accident do happen. To prevent the air disasters and to mitigate the risk of such disasters, each airport has prepared the Airport Emergency Plan as per the guidelines of ICAO, DGCA and BCAS. This plan also outlines the role of Civil Administration in managing the aviation disaster. AAI needs to take advantage of the enhanced Disaster Management infrastructure being created by Govt. through NDMA, SDMA, District Disaster Management Authority (DDMA) and National Disaster relief Force (NDRF) etc.

An airport is the vital logistic facility to facilitate the fast movement of men and material required by the Govt. to manage the disasters affecting the people. Therefore, it is of utmost importance that airports remain operational and, in case affected by natural disasters, are put into operation quickly. Disaster Management Act 2005 (section 36 & 37) defines the role and responsibility of the Ministries or Departments of Govt. of India in Disaster Management and ask them to:

## **Chapter - 01**

### **Document Preparation, Publication & Amendments**

From time to time amendments will be issued to this Airport Disaster Management Plan. To maintain a correct and up to date copy of the Airport Disaster Management plan, it is important that instructions given in amendment notices are carried out.

- a) Proposal for amendment or additions to this plan should be made by The Airport Director in co-ordination with DDMA/ Deptt. of Disaster Management and Civil Defence, Govt. of West Bengal.
- b) Proposed amendments of minor nature e.g. telephone numbers, address etc. which do not affect the procedural matters will be dealt with administratively by The Airport Director and promulgated as per the distribution list.
- c) The workability of this plan will be reviewed after every two years through conducting drills along with the stake holders.

### **Enquiries**

Enquiries/clarifications/suggestions, if any, should be addressed to:

Airport Director Airports Authority of India Cooch Behar Airport, West Bengal-736101 Email : apdcoochbehar@aai.aero Telephone : 03582-222518
--

### **Responsibility for documentation and publication**

---

- i) Disaster Management Plan is to be prepared by the Airports and will be sent for approval of SDMA, NDMA and DGCA. The Airport Director, AAI is responsible to publish and maintain this Plan.
- ii) The Executive Director (Aviation Safety), AAI on behalf of the Chairman, AAI will ensure that the policies and procedures as approved by NDMA are incorporated in this Plan.

#### **Authority/Responsibility for amendments**

- i) The Executive Director (Aviation Safety) is responsible for incorporating amendments to the ADM Plan.
- ii) Holders of hard-copies of Plan are responsible for ensuring that the Plan is kept up to date. This includes inserting new chapters or chapter amendments in a timely manner and complying with any instructions on amendment advice.
- iii) The user of Plan will be responsible for verifying the currency of documentation in the Plan.

#### **Review**

- i) The Airport Disaster Management Committee on behalf of AAI will conduct a yearly review of this Plan to ensure accuracy and updating of all its contents and reference data. The results of such audit and action taken there upon will be documented and presented to The Executive Director (Aviation Safety), AAI for consideration and to be submitted to NDMA/ SDMA for approval.
- ii) Incorporating Changes: The Airport Disaster Management Committee on behalf of AAI will ensure that the:
  - Changes being incorporated are duly approved by the competent authority.
  - Relevant pages in the Plan are revised.
  - Amendment/advice is issued in time to all concerned in respect of new chapter(s) and the same is inserted in the Plan.
  - Master- copy of the Plan is updated.

#### **Interpretation of words**

- i) In the interests of simplicity, any reference to the masculine gender can be taken to mean either male or female.

#### **Effective date**

- i) Effective date of an instruction is indicated at the foot of the page.
- ii) New edition will be indicated by date at the foot of the page with the help of Document ID.

#### **Change of history**

**This is first edition of the Plan. Subsequent changes will be indicated on ‘Record of Amendments and Corrigenda’**

#### **Format**

---

- i) Amendment-documentation being inserted in the Plan must contain headers and footers that are consistent with those residing in this document.

#### **Controlling the Plan**

- i) The Chairman AAI will be the controlling authority of this Plan. At the station level Airport Director Cooch Behar Airport will be the controlling authority.

#### **Distribution of the Plan**

- i) The hard copies of Airport Disaster Management Plan will be circulated to Executive Director (Aviation Safety), Executive Director (Operation), Executive Director (Engg), Executive Director (ATM), Executive Director (CNS), General Manager (FS) Airports Authority of India. The approved Plan and the subsequent amendments will also be published on AAI website and **Infosaarthee**.

## **Chapter - 02**

### **Scope of Airport Disaster Management Plan**

The purpose of AAI DMP of Cooch Behar Airport is to spell out the procedures for coordinating the response of different agencies and services, both on and off the airport, to cope with various aircraft related and non-aircraft related emergencies anticipated at the airport. The procedures to deal and manage different types of emergencies anticipated at the airport are drawn up clearly in Cooch Behar Airport Emergency Plan.

The plan address disaster management functions of airport in co-ordinations with Deptt. of Disaster Management and Civil Defence, Govt. of West Bengal / DDMA. The Disaster Management Act 2005 envisages that every ministry or Govt. of India undertaking shall prepare a DMP as per the guide lines of NDMA to deal with various disasters. AAI being a public sector understanding Govt. of India, under the Ministry of Civil Aviation (MOCA) has prepared its DM plan with the twin objective of:

Provide assistance to the national disaster management authority (NDMA) and Deptt. of Disaster Management and Civil Defence, Govt. of West Bengal by making available its resources to the DM agencies at all levels for the purpose of responding promptly and effectively to any threatening disaster situation.

- a) Use the resources available with NDMA / Deptt. of Disaster Management and Civil Defence, Govt. of West Bengal at all levels to effectively manage the aviation disasters, on site or off site the airport.

This Disaster Management Plan for the **Cooch Behar Airport, West Bengal** has been prepared by encompassing the guidelines of NDMA vis-à-vis the facilities available at the airport and by incorporating the disaster management infrastructure being provided by the respective DDMA, SDMA, NDRF, etc.

The Disaster Management Plan for the **Cooch Behar Airport, West Bengal** has been prepared by the office of **the Airport Director, Cooch Behar Airport, West Bengal** and shall be forwarded to the

---

concerned DDMA/SDMA authority for their concurrence and shall also be forwarded for the due approval to the Director General of Civil Aviation (DGCA)/Ministry of Civil Aviation (MoCA).

The possible disasters that could occur at **Cooch Behar Airport, West Bengal** have been identified here and an elaborate plan has been drawn which includes the emergency control measures, plan of coordination and interaction with various agencies. The possible disasters that could strike at this airport and for which the disaster management plan has been prepared are as follows:

Disaster Type	Natural	Man-made	Hybrid	Whether airport services would be affected or Not
Tropical Cyclones	Yes	No	No	Yes
Storm	Yes	No	No	Yes
Floods	Yes		Yes	Yes
Environmental Pollution	Yes	No		Yes
Chemical, Biological, Radiological & Nuclear	No	Yes	No	Yes
Landslide	No	No	No	No
Earthquake	Yes	No	No	Yes

A designated authority is required to avoid any delay in notifying an emergency. The person at the site will be authorized and be automatically responsible to promptly identify, classify and declare the emergency and notify the authority at the airport and outside the airport. The designated authority in this plan is the Operational In-charge.

For any disaster happening at the airport, the designated authority shall be responsible to provide the initial response and activate the DM mechanism as per the Disaster Management Plan for the respective airport.

#### **Airport Emergency Managing Committee:-**

To ensure co-ordinated action, an Airport Emergency Managing Committee will be constituted. The airport director will be the chairman of this committee. The committee will comprise of members from various departments in airport including the following. Airport Administration

- Air Traffic Control
- Apron control
- Airport Rescue and Fire Fighting Services.
- CNS
- Engineering (Civil & Electrical)
- Airport Security Services (ASU,BCAS)
- Maintenance Department
- Representative from Airlines
- Transportation Department
- Member from DDMA./SDMA./NDRF.

Also member from Airport Authority of India and district administration will be part of the committee. Airport emergency managing committee will design the procedure the emergency action plan, evacuation plan and procedures for implementation based on local needs and facilities available.

For effective implementation of emergency action; coordination among the various agencies involved in emergency control centre will be expected. **Emergency control centre** will be established as “supreme command post” for emergency action, for direct action and coordination at ground level “Mobile Command Post” will be established. Emergency action committee will select officer’s in-charge for emergency control centre.

### **Plan Format:**

This plan shall detail the action plan prepared as per the guidelines of the DDMA/ Deptt. of Disaster Management and Civil Defence, Govt. of West Bengal. This shall include the following aspects:

- (i) Preparedness
- (ii) Capacity Development
- (iii) Education & Awareness Generation
- (iv) Training & Community Participation
- (v) Providing Critical Infrastructure
- (vi) Response & Recovery

The approach followed will emphasize preparedness and disaster-specific risk reduction measures, including technical and non-technical measures that are environment and technology friendly and sensitive to the special requirements of the passengers and airport community.

The objective of disaster response is to carry out following tasks, all within the constraints of available resources:

#### **Mitigation of accidents at source**

- (i) Prevention of deterministic health effects in individuals
- (ii) Providing first-aid and treatment of injuries
- (iii) Reducing the probability of stochastic effects in the population
- (iv) Reduction of psychological impact on the population
- (v) Protection of environment and property

There shall be holistic and integrated approach at all levels covering all components which are as follows:

- (i) Prevention
- (ii) Mitigation
- (iii) Preparedness
- (iv) Response
- (v) Relief
- (vi) Rehabilitation
- (vii) Reconstruction
- (viii) Recovery etc.

The strategy can be made effective by adoption of a three-step approach, namely, identifying the potential risks and assessing their impact, building the necessary capabilities to respond effectively, and continually evaluating and testing our preparedness, which includes identifying lessons learnt from mock-exercises and real-life events.

The plan shall be an ‘all hazards’ approach in handling any disaster at various levels of administration with specialists involved to advice on various issues. Specialists may be engaged to assist/advice on the issues as follows:

- (i) Roles & responsibilities
  - (ii) Training
-

- (iii) Planning
- (iv) Equipment's & SOPs
- (v) Intervention levels for various actions by members of rescue and relief teams
- (vi) Action level to control the consumption of contaminated food items in the affected areas

**Chapter-03**  
**Plan Objectives**

- To save lives of affected air passengers by effective medical response with treatment of injured in aircraft disaster
- Providing medical emergency support function & infrastructure equipment in a state of readiness for response with special arrangement for mass causality management involving large number of person
- Preparation of guidelines, contingency plan including SOP's to meet the situation
- Prevention & reduction of disaster impact by undertaking prevention mitigation, risk reduction measures by structural & non-structural measures
- Preparation for effective response aimed to save lives minimize the loss of property damage pick recovery from disaster impact
- In the event of a major disaster or protracted emergency, this plan shall give guidance in the tasking of responsible/lead agencies in the implementation of the following strategic and operational objectives:
  - a. Ensure a collaborative and coordinated response to the disaster among all the stakeholders
  - b. Ensure food availability/security and good nutrition to affected populations in times of disaster
  - c. Ensure Hygiene Promotion, Water Supply, and proper Sanitation
  - d. Ensure Adequate Health Services and Health Systems Infrastructure is adequate

## **Chapter - 04**

### **Airport Designated Authorities, Role & Responsibility**

**When Natural Disaster occurs, the organisations / units involved and their roles and responsibilities are as follows.**

#### **1. Action By AAI , Air Traffic Services**

Air Traffic controller shall as soon as the warning is received ATC will put on the

- Siren - for general alert to all the agencies working at the airport
- Crash bell/Fire bell - to alert the fire station for fire and rescue operation
- Declares Emergency depending on the situation, on R/T or Hot Line or Phone directly connected to Fire control room
- Inform immediately to the West Bengal State Disaster Management Authority for necessary action
- Advise aircraft in flight to divert to an alternate destination if needed
- Inform the Airport Director about the gravity of situation and effect on operation
- Take NOTAM action and resumption of ATC operations according to the nature and situation of Disaster

**When full emergency is declared the following information shall be included by ATC to Fire Watch Tower:**

Flight No.	
Type of Aircraft	
Name of the owner of aircraft	
Number of occupants	
Fuel on Board	
Nature of trouble	
Runway to be used & Subsequent change of R/W	
Expected Time of Arrival (ETA)	

- Carryout Runway inspection

**ATC officer will inform**

Manager (Terminal)

- In-charge Airport Security (ASG)
- Airport Director
- Metrological duty officer
- Will monitor the movement and progress of safety services and their activities.
- Inform Civil Hospitals and Ambulance services.
- Inform listed doctors to reach the crash site as per the procedure
- Inform City Police (hot line)
- If required by Airport Safety services call City Fire brigade on hotline or any other assistance required. Take NOTAM action & resumption of ATC operations according to the nature and situation of disaster.
- Originate signal & report to all concerned
- Cancellation of NOTAM.
- Guide ATC for sorting out the air Traffic.
- Assess the situation for more help for RFFS and responding agencies.
- Ensure all actions are taken by Tower
- Keep Airport Director informed about the gravity of situation and effect on operations.

- Coordinate TM operations/security on the crash site.
- Investigations, Photography, etc. & restoration of ATC operations. Seal the records with the help of CNS In-charge.
- Make arrangement for video Photography.
- Concerned Airlines.

#### **Responsibilities of Airport Director:**

Keep informed to the following Officials:

- RED
- Member (OPS)
- Chairman AAI
- District Collector / DDMA
- ED (ATM)
- GM (ATM)
- Director (Air Safety) DGCA

#### **2. Action By Rescue & Fire Fighting.**

- Fire Watch Tower / Control Room In-charge shall relay the warning on P.A. system to all fire crew and to the Office-In-Charge of the Fire Service
- Fire Watch Tower / Control Room shall keep surveillance of the aircraft movement areas and report to the ATC immediately of any FOD
- Office-In-Charge (Fire) during any storm warning should inspect their all rescue & fire fighting vehicles & fire crew
- Conduct fire suppression & rescue operations, if needed
- Assisting in providing emergency medical assistance, if needed
- Assist in emergency operations like search operations, inspection, personnel accountability & protective action implementation
- Co-ordinate activities with local community emergency response agencies, if necessary

#### **FIRE SERVICE EQUIPMENTS & INFRASTRUCTURE AVAILABLE.**

<b><u>Type of Vehicle / Equipments</u></b>		<b><u>QTY (Nos./Pairs)</u></b>	<b><u>REMARKS</u></b>
01.	Fire tenders	02	
02.	Air Field ambulance	01	
03.	Helmet	06	
04.	Large Axe	01	
05.	Shovels	00	
06.	Fire Beaters	00	
07.	Crow Bar	02	
08.	Hack Saws	01	

---

09.	Sledge Hammers	00
10.	Bolt Cutters	01
11.	Door Opening Tool Set	00
12.	Lifting & Pulling Machine	00
13.	Towing Steel Cable 50 Metres	00
14.	Hydraulic Power Units	01
15.	Hydraulic Jacks 50Tons	00
16.	Chisels	00
17.	Sand Bags	00
18.	Coffin Bags	00
19.	Rescue Line and Ropes 30 20-50 metres	02
20.	Inflatable Lights	02
21.	Lifting Bags	00
22.	Walkie – Talkies	08
23.	Mega Phones	02
24.	Cordless P.A. System (C.F.T.-RB)	01

**Individual Protection Kit**

01.	Fire Fighting Boots	02 pair
02.	Insulating Gloves	02 pair
03.	Proximity Suit	02
04.	Delivery Hoses	10
05.	Fireman Axe	10

**Alarm and Warning Equipment**

01.	Manually operated sirens	01
02.	P.A System/ public address systems	01
03.	Rotating beacons/flash lights/mega phone	01/0/02

**Actions by In-charge Airport Security (ASG):**

As soon as the information is received about Crash /Accident/any disaster inside the airport.

- Inform all gates to allow entry of Fire brigade /Ambulance and doctors and other responding agencies to the incident site.
- Dispatch one squad or mobile or any other vehicle to site. Do not cross-runway without ATC permissions, in case of operational area.
- Cordon the Crash site/assist the fire & rescue operations.
- Assist for evacuation.
- Assist to the crowd control and regulation of traffic flow
- Guard the bag and baggage and other property on the site in coordination of police.
- He shall coordinate with Traffic police to keep the Traffic lanes free for the movement of ambulances and other emergency vehicles on the city side

**Action by City Police: -**

- As all access control etc. within the airport is the responsibility of Airport Security (ASG) even then the city police will be informed and they shall arrive at the crash site.

**The duties of Police Services, if disaster occurred inside the airport:-**

- Assists the airport security & fire brigade at crash site.
- Maintain law and order.
- Traffic Control to & from the airport in order to facilitate the carriage of injured to hospitals.
- Prepare a list of passengers as per their requirement.
- Take care of any VIP passenger, if on board and his security etc as demand fit.
- Help the airport management/Airlines to handle the situation.
- Police authorities may dispose of the dead bodies of passengers in accordance with their procedures and in consultation with Airlines/Owner of the aircraft concerned.

**The duties of Police Services, if Aircraft accident occurred outside the boundary**

- The Superintendent of Police dispatches a police squad to the site.
- This squad on reaching will take over supervision of the site.
- Prevent public interference with rescue operations
- Guard property, bag and baggage, aircraft
- Maintain law& order & facilitate transportations of casualties
- Protect the wreckage and trail of aircraft till the investigations are over & wreckage taken over by the concerned airline.
- Assist outside responding agencies.

**Role and Responsibility of City Fire Services:**

- Reach at the Rendezvous point or disaster site of the airport as soon as possible and co-ordinate/Assist with Airport Fire Services for further action.
- In case of fire, start firefighting with suitable media and also take care of surrounding environment.
- Search and identify the risk and nullify the sources.
- To search and evacuate the affected population from the site of the disaster by using their available special equipment etc.

**3. Action by Terminal Manager**

- Shall inform the Airport Director / Operational In-charge
- Carry out functions of Crisis Management Center (CMC) until the arrival of airport director

**4. Action by Engineering Deptt.**

- The Role of Engg Dept. would be highly desirable during Rescue & Salvage operation from building. Arrangement for additional emergency lighting, skilled
-

labor and heavy duty equipment like chains, bulldozer etc. should be made from its own resources or by contract

- Periodic inspection of Airport and building area that maybe precursor to disaster is highly desirable.

**5. Action by CNS Deptt.**

- Additional communication channel should be established among all responding agencies
- Provision of WLL Telephone may be provided to meet the situation.

**6. Action by Finance & Accounts**

- Allocation of additional funds for prevention of disaster, mitigation, capacity building and preparedness plan. Plan contingency reserved fund must be kept under budgetary heads

**7. Action by E & M Workshop**

- Efforts shall be made to provide maximum possible transportation facilities along with repair team. M.T. vehicles shall be made available at command post. Adequate nos. of vehicles transportation arrangements, POL, manpower, equipment & other resources which would be required to mobilized quickly

**8. Action by all Airlines**

All airlines concerned shall on receipt of the storm warning take the necessary action to ensure that

- Their helicopters are to be moored from all sides
  - For the propeller driven aircraft; blades should be properly secured
  - For their jet engine aircraft; all the turbine blades should be secured.
  - No loose chokes should be left on the apron
  - That container should be fully fastened to prevent them from flying around and damaging the aircraft and ground installation
-

- All the mobile ground equipments should be parked at the designated points when not in use and hydraulic / manual jacks should be applied to prevent them from rolling during the storm
- Ground equipments including dolly-trolleys, trestles and step ladders should be checked for serviceability and proper braking
- Choke should be position on both sides of all the wheels so as to arrest side way / forward movements
- The temperature permitting parking brakes be kept “ON” during the storm warning
- Those high rise vehicles be parked and moved in low down position, immediately after use should be removed away from the aircraft
- No equipments should be left unattended in the airside
- The equipment should be position at the aircraft parking stand only on the need bases, and during other period it should removed to the designated equipment staging area and should be properly secured
- That no loose pieces of cargo should be left on apron or out in the open
- In case any damage to the aircraft, installations and equipment and observed report it immediately to the operational in-charge (ATM)

**9. Action by Aviation Services / Ground Handling Agency**

- The Cooch Behar Airport aviation services concerned (Ground Handling / Fuelling Agency) shall provide the necessary ground support and assistance as directed by the action group
- Provide sufficient staff to manage the contingency, if required
- Provide help at the crash site for evacuation of casualties
- Ground handlers to ensure that, the area is clear off any equipment to be used by the ground handlers
- Fuelling agencies to ensure that the supply to the area is cut off and the zone is the isolated

**10. Action by IMD Deptt.**

---

- i) It undertakes observations, communications, forecasting and weather services. Also can use INSAT for weather monitoring and communicate to the concerned agencies.
- ii) Keep watching continuously the weather condition during disastrous situation to alert various agencies and to avoid worst situation which will be occurred due to pre disaster.

### **Chapter - 05**

#### **Action Plan**

This Airport Disaster Management Plan shall detail the action plan as per the guidelines of Deptt. of Disaster Management and Civil Defence, Govt. of West Bengal. This shall include the following aspects:

Sl. No.	Task	Activities	Responsibility
<b>Earthquake</b>			
1.	Prevention	Earthquake resistant design and construction of Public utility structure.	AAI
		Periodical Inspection and maintenance of building.	Civil maintenance
		Monitoring of seismic activities.	IMD
2.	Mitigation	Campaign for Earthquake safety tips.	Concerned section
		Identification and removal of unsafe buildings/ structure	Concerned section
		Departmental action plan(SOP)	Concerned section
3.	Preparedness	Routine drills/training, inspection/ testing of all rescue and fire fighting equipments	Fire Service
		All periodical exercise	Air traffic management / Terminal Management /Fire services
		Runway inspection	ATC
4.	Response		
		Fire fighting / rescue/medical assistance.	Fire services in coordination with ATC
		Speedy and safe evacuation	Concerned section
		Providing transport Facilities	Airlines/ MT section/ Responding agencies
		Assist other responding agencies	Concerned section/ Security Manager
5.		Rescue operation	Fire services /City fire brigade/ responding Rescue team

	Relief	Relocation of passengers/causality to temporary shelter, bed hygiene related facility /hospital /lighting	Airlines/ Terminal management/ emergency medical services/HR / Finance section
		Providing Water/food	HR
		Providing transport Facilities	Airlines/ MT section/ Responding agencies
6.	Rehabilitation and Reconstruction	Identification of suitable project	Concerned section
		Project dealing and approval	Relevant technical authority
7.	Recovery	Rebuilding infrastructure	Relevant technical authority
		Claim for Insurance	AAI
		Developing policies and practices to avoid similar situations in future	Concerned section
Cyclone/ Flood			
1.	Prevention	Forecasting and warning alerts	IMD
		Building design as per standards to resist wind/water	Relevant technical authority
		Proper drainage system	Relevant technical authority
		Improvement of building sites by raising the ground level to protect against flood and storm surges.	Relevant technical authority
		Communication and utility lines should be located away from the coastal area or installed underground.	Relevant technical authority
		Maintenance of fire appliances/ rescue equipment.	Fire services/MT
2.	Mitigation	Declaration of weather/storm standby	ATC
		Departmental action plan(SOP)	Concerned section
3.	Preparedness	Pre monsoon/cyclone meeting for preparedness	APD
		Maintaining Alert crew all the time for quick response.	Concerned Section
4.	Response	Fire fighting / rescue/medical assistance.	Fire services in coordination with ATC
		Speedy and safe evacuation	Concerned section
		Providing transport Facilities	Airlines/ MT section
		Assist other responding agencies	Concerned section
		Inform to DDMA and other related agencies	APD
5.	Relief	Rescue operation	Fire services /City fire brigade/ responding Rescue team
		Relocation of passengers/causality to temporary shelter, bed hygiene related	Airlines/ Terminal management/ emergency

		facility /hospital /lighting	medical services/HR / Finance section
		Providing Water/food	HR
		Providing transport Facilities	Airlines/ MT section/ Responding agencies
6.	Rehabilitation and Reconstruction	Identification of suitable project	Concerned section
		Project dealing and approval	Relevant technical authority
7.	Recovery	Rebuilding infrastructure	Relevant technical authority
		Claim for Insurance	AAI
		Developing policies and practices to avoid similar situations in future	Concerned section
Aircraft Crash inside the Airport			
1.	Prevention	Inspection / maintenance of Navigation aids	CNS/Electrical
		Runway inspection	ATC
		Weather status	IMD
		Follow up Air Traffic rules ( Annex 2, 11, Doc 444)	ATC
		Markings/Lightings guidelines as per CAR and Annex 14	ATC/Civil/Electrical
		Serviceability of communication facilities	CNS
		Serviceability of Aircraft	Concerned Airline
2.	Mitigation	Declaration of Emergency	ATC
		Departmental action plan(SOP)	Concerned section
3.	Preparedness	Routine drills/training, inspection/ testing of all rescue and fire fighting equipments	Fire Service
		All periodical exercise	Air traffic management / Terminal Management /Fire services
		Maintaining Alert crew all the time for quick response.	Concerned Section
4.	Response	Fire fighting / rescue/medical assistance.	Fire services in coordination with ATC
		Speedy and safe evacuation	Fire service
		Providing transport Facilities	Airlines/ MT section
		Assist other responding agencies	Concerned section
		Inform to DDMA and other related agencies.	APD
		Security of Accident site	ASG
5.	Relief	Rescue operation	Fire services /City fire brigade/ responding Rescue team
		Relocation of passengers/causality to temporary shelter, bed hygiene related facility /hospital /lighting	Airlines/ Terminal management/ emergency medical services/HR / Finance

			section
		Providing Water/food	HR / Concerned Airlines
		Providing transport Facilities	Airlines/ MT section/ Responding agencies
6.	Rehabilitation and Reconstruction	Identification of suitable project	Concerned section
		Project dealing and approval	Relevant technical authority
7.	Recovery	Rebuilding infrastructure	Relevant technical authority
		Claim for Insurance	AAI / Concerned Airlines
		Investigation, developing policies and practices to avoid similar situations in future.	Concerned section/ agency
Aircraft Crash outside Airport within Response Area			
1.	Prevention	Inspection / maintenance of Navigation aids	CNS/Electrical
		Follow up Air Traffic rules ( Annex 2, 11, Doc 444)	ATC
		Weather status	IMD
		Serviceability of communication facilities	CNS
		Serviceability of Aircraft	Concerned Airline
2.	Mitigation	Declaration of Emergency	ATC
		Departmental action plan(SOP)	Concerned section
3.	Preparedness	Routine drills/training, inspection/ testing of all rescue and fire fighting equipments	Fire Service
		All periodical exercise	Air traffic management / Terminal Management /Fire services
		Familiarization of response area	Airport Fire Service
		Maintaining Alert crew all the time for quick response.	Concerned Section
4.	Response	Fire fighting / rescue/medical assistance.	Fire services in coordination with ATC/ City Fire Brigade/other responding agencies
		Speedy and safe evacuation	Fire services / City Fire Brigade/other responding agencies
		Providing transport Facilities	Airlines/ MT section / other responding agencies
		Assist other responding agencies	Concerned section
		Inform to DDMA/ Deptt. of Disaster Management and Civil Defence, Govt. of West Bengal and other related agencies	APD
		Security of Accident site as per AEP	ASG
5.		Rescue operation	Fire services /City fire brigade/ responding Rescue team
		Relocation of passengers/causality to temporary	Airlines/ Terminal

	Relief	shelter, bed hygiene related facility /hospital /lighting	management/ emergency medical services/Other responding agencies
		Providing Water/food	HR / Concerned Airlines
		Providing transport Facilities	Airlines/ MT section/ Responding agencies
6.	Rehabilitation and Reconstruction	Identification of suitable project	Concerned Authority
		Project dealing and approval	Relevant technical authority
7.	Recovery	Rebuilding infrastructure	Relevant technical authority
		Claim for Insurance	AAI / Concerned Airlines
		Investigation, developing policies and practices to avoid similar situations in future.	Concerned section/other agency
CHEMICAL DISASTER			
1.	Prevention	Advanced notification to the airport, if DG in cargo.	Consigner
		Storage and Handling according to the prescribed national rules, guidelines DGCA regulation, ICAO Annex 18 and doc 9284.	Airlines, Cargo
		Periodical Inspection and maintenance of building.	Cargo
		Permission of Central Govt.	Airlines, Cargo
		Protection of environment and property	Concerned agencies
2.	Mitigation	Campaign for Chemical safety tips.	Concerned section
		Identify and isolate the affected area	Terminal Management/ CISF/ Fire/ Concerned Agencies
		Periodical inspection and audit of Cargo building.	Concerned section
		Prohibit eating, drinking and smoking in the incident area	Concerned sections
		Preparation of DM plan for oil depot.	Concerned oil Industries.
3.	Preparedness	Routine drills/training, inspection / testing of all rescue and fire fighting equipments	Fire Service
		All periodical exercise as per fire order	Air traffic management / Terminal Management /Fire services
4.	Response	Maintaining Alert crew all the time for quick response.	Concerned Section
		Fire fighting / rescue/medical assistance.	Fire services in coordination with ATC
		Established AOCC	APD
		Speedy and safe evacuation	Concerned section
		Providing transport Facilities	Airlines/ MT section/ Responding agencies
		Assist other responding agencies	Concerned section/ Security Manager
		Inform to DDMA ( collector /DRO)	APD

		Security of Accident site as per AEP	SECURITY
5.	Relief	Rescue operation	Fire services /City fire brigade/ responding Rescue team
		Relocation of passengers/causality to temporary shelter, bed hygiene related facility /hospital /lighting	Airlines/ Terminal management/ emergency medical services/HR / Finance section
		Providing Water/food	HR
		Providing transport Facilities	Airlines/ MT section/ Responding agencies
6.	Rehabilitation and Reconstruction	Identification of suitable project	Concerned section
		Project dealing and approval	Relevant technical authority
		Rebuilding infrastructure	Relevant technical authority
7.	Recovery	Claim for Insurance	AAI/Airlines/Oil Industries
		Developing policies and practices to avoid similar situations in future	Concerned section
BIOLOGICAL DISASTER			
1.	Prevention	Prevention of deterministic health effects in individual	Concerned sections
		Maintain Good House-keeping	Concerned sections
2.	Mitigation	Identify and isolate the affected area	Terminal Management/ SECURITY/ Fire
		Campaign for Biological safety tips.	Concerned section
		Inform to DDMA and related agencies immediately.	APD
		Inspect the airport premises immediately when suspected, with specialized agencies.	APD/Terminal Management
		Prohibit eating, drinking and smoking in the incident area	Concerned sections
3.	Preparedness	Lectures and trainings on Biological Disaster handling	Training Centre
		Use of Monitoring instruments and safety equipments.	Responding agencies
		Study Contingency Plans	Concerned sections
		Maintain alert crew	Terminal Management/ Fire Service
		All periodical exercise as per fire order	Air traffic management/ Terminal Management/ Fire services
4.	Response	Sealing/Security of Affected site as per AEP	SECURITY
		Maintaining Alert crew all the time for quick response.	Concerned Section
		Fire fighting / rescue/medical assistance.	Fire services in coordination with ATC/ Special rescue team

5.	Relief	Established AOCC	APD
		Speedy and safe evacuation	Concerned section/Special rescue team
		Providing transport Facilities	Airlines/ MT section/ Responding agencies
		Maintain Law and Order	Concerned section/Police/ Other Agencies
6.	Rehabilitation	Assist other responding agencies	Concerned section/ Security Manager
		Inform to DDMA/DDMO (collector/DRO)/ Local Authorities	APD
		Security of Accident site	SECURITY
7.	Recovery	Developing policies and practices to avoid similar situations in future	Concerned section
<b>RADIOLOGICAL/NUCLEAR DISASTER</b>			
1.	Prevention	Advanced notification to the airport, if DG in cargo.	Consigner
		Permission of Central Govt.	Airlines, Cargo
		Storage and Handling according to the prescribed national rules, guidelines DGCA regulation, ICAO Annex 18 and doc 9284.	Airlines, Cargo
		Protection of environment and property	Concerned agencies
2.	Mitigation	Campaign for Radiological and Nuclear safety tips.	Concerned section
		Identify and isolate the affected area	Terminal Management/ SECURITY/ Fire
		Prohibit eating, drinking and smoking in the incident area	Concerned sections
		Inform to DDMA/DDMO and related agencies immediately.	APD
		Inspect the airport premises immediately when suspected, with specialized agencies.	APD/Terminal Management/ Specialized team.
3.	Preparedness	All periodical exercise as per fire order	Air traffic management / Terminal Management /Fire services
4.	Response	Maintaining Alert crew all the time for quick response.	Concerned Section
		Fire fighting / rescue/medical assistance.	Fire services in coordination with ATC/ Special rescue team
		Established AOCC	APD
		Speedy and safe evacuation	Concerned section/Special rescue team
		Providing transport Facilities	Airlines/ MT section/ Responding agencies

		Maintain Law and Order	Concerned section/Police/Other Agencies
		Assist other responding agencies	Concerned section/ Security Manager
		Inform to DDMA/DDMO ( collector /DRO) /Local Authorities	APD
		Security of Accident site	SECURITY
5.	Relief	Rescue operation	Fire services /City fire brigade/ responding Special rescue team
		Relocation of passengers/causality to temporary shelter/hospital as per safety procedure	Airlines/ Terminal management/ emergency medical services/ Special rescue team
		Providing Water, food , bed etc , hygiene related facility	HR
		Providing transport Facilities	Airlines/ MT section/ Responding agencies
6.	Rehabilitation and Reconstruction	Identification of suitable project	Concerned section
		Project dealing and approval	Relevant technical authority
7.	Recovery	Rebuilding infrastructure	Relevant technical authority
		Claim for Insurance	AAI/Airlines/Oil Industries
		Developing policies and practices to avoid similar situations in future	Concerned section
		Rebuilding infrastructure	Relevant technical authority
		Claim for Insurance	AAI/Airlines/Concerned Agencies

EPIDEMICS			
1.	Prevention	Prevention of deterministic health effects in individual.	Concerned sections
		Prevent poor sanitary conditions which may contaminate food and water.	Concerned sections
		Protect the environment/buildings from breeding conditions for the insect vector.	APD
		Maintain Good House-keeping.	Concerned sections
2.	Mitigation	Structuring the health services at airport	APD
		Medical inspection for arriving passengers.	Medical team
		Check up and diagnose the victims.	Medical team
		Identify and isolate the affected area	Terminal Management/ CISF/ Fire
		Prohibit eating, drinking and smoking.	Concerned sections
		Use PPE while handling passengers/ person/visitors	Concerned section

3.	Preparedness	Campaign for Epidemic safety tips.	Concerned section
		Inspect the airport premises immediately when suspected, with specialized agencies.	APD/Terminal Management
		Use of Monitoring instruments and safety equipments.	Responding agencies
4.	Response	Improving the sanitary condition wherever observed.	Concerned section/ Civil/Terminal
		Follow disposal procedure of waste, disinfecting the water source.	Concerned section
		Assist other responding agencies	Concerned section/ Security Manager
5.	Relief	Relocate the passengers to a safe and hygienic area.	Airlines/ Terminal management/ Medical team
		Arrange for hygienic Water/food/sanitation facilities	HR
6.	Rehabilitation and Reconstruction	Reduction of psychological impact	APD
7.	Recovery	Developing policies and practices to avoid similar situations in future	Concerned section

### **Chapter - 06**

#### **Role & Responsibilities of Deptt. of Disaster Management and Civil Defence, Govt. of West Bengal in Airport Disaster Management Plan:**

As per section 40(1) of disaster management act 2005, each deptt. should prepare a disaster management plan in conformity with the guidelines laid down by the SDMA.

SDMA shall provide assistance to mitigate the disaster situation at airports by utilising all the available emergency resources. Its activities includes:

- Drawing of mitigation, preparedness & respond plan
- Assessing the damage from any disasters
- Providing emergency communication to effected area
- Transportation, personnel & relief goods to and from the affected area providing shelters and other immediate essential relief
- Keeping all health infrastructure equipments, hospitals & personal in a state of readiness for response with special arrangement for causality management involving large number of affected persons
- WBSDMA is deputing QRT team for quick response. It has emergency operations centres (EOCS) whether it is required to set up 24x7 hours.

#### **Role of State Disaster Management Authority, West Bengal (SDMA)**

- 1) Provide assistance to the SDMA, state relief commissioner, collectors and local authorities in Cooch Behar Airport Disaster Management activities.
- 2) Carry out relief and rehabilitation activities at Cooch Behar Airport under the supervision of the commissioner and the collector.
- 3) Co-ordinate preparation and the implementation of Cooch Behar DM plan with other departments, local authorities, communities, and stake holders.

#### **Responsibility of the State Disaster Management Authority, West Bengal (SDMA)**

- Promoting an integrated and coordinated system of disaster management including prevention or mitigation of disaster by the State, local authorities, stakeholders and communities
- Collect / cause to be collected data on all aspects of disasters and disaster management and analyze it and further cause and conduct research and study relating to the potential effects of events that may result in disasters
- Act as a repository of information concerning disasters and disaster management
- Lay down the policies and plans for disaster management in the State
- Promote or cause to be promoted awareness and preparedness and advice and train the community, and stakeholders with a view to increasing capacity of the community and stakeholders to deal with potential disasters
- On the expiry of a disaster declaration, the Authority shall, where necessary, act as an agency for facilitating and coordinating rehabilitation and reconstruction activities by departments of the Government

#### **Role and responsibility of The Chief Executive Officer – SDMA, West Bengal**

CEO of SDMA, West Bengal shall perform a nodal role across different phases of disaster management like:

- Coordinate and monitor activities relating to prevention and mitigation of disasters, including capacity-building
  - Coordinate and monitor rehabilitation and reconstruction activities
  - Monitor the progress of the preparation and updating of disaster management plans and coordinate the implementation of such plans
-

- Prepare and submit periodically a report to the Authority on the activities undertaken by the Authority
- Delegate his powers and functions to officers and employees of the Authority

### **Utilisation of Airport Service by SDMA, West Bengal / NDRF**

Process of distribution of relief materials (perishable items like food, medicines etc, non perishable items like clothes, tents, tarpaulin, utensils, shelter items etc) to the affected area by air dropping of relief materials which needs to take help from Air Force, Army Helicopters in coordination with **Airports Authority of India**. For this pre agreement with the concerned deptt. is required to carry out relief operation without losing precious time.

### **Specialized Teams:**

Specialized teams will be raised, specially trained for the nuclear/radiological emergency/disaster and fully equipped at the state as well as central levels. Persons will be trained extensively in the subjects of radiation, radioactivity, radiation protection, use of monitoring instruments, use of PPEs, shielding, decontamination, waste disposal etc.

### **Resources Available with State Disaster Management Authority, West Bengal**

Sl. No	Equipments	Quantity	Remarks
01	Folding bed		
02	Computer		
03	Printer		
04	UPS		
05	Torch		
06	Standing Tube Light		
07	Helmet		
08	Stretcher		
09	Inverter		
10	Battery		
11	Bosch Electric Drill Machine		
12	Bosch Electric Hexo Cutter		
13	Bosch Electric Concrete Cutter		
14	Shovel (Belcha)		
15	Shade (Pharwa)		
16	Spade (Kata)		
17	Big Hacksaw (Ara)		
18	Big Hammer		
19	Arrow (Gaiti)		
20	Rope		
21	Lock Cutter		
22	Wood Cutter		
23	Mike		
24	Ramba		

- Accountable to any absence related to disaster management of the department. Take the lead to emergency function plan and standard operating procedure (SOP).
- Constitute the quick response team (QRT) as per the need.
- Set up control room as per the need of the department.
- Organised regular awareness programmes in the department.
- Organised the periodic mock drill at least twice a year as per the suitability of the department.

## **Chapter - 07**

### **Role of Medical Authority**

Facility for safe disposal of contaminated waste, de-corporation and managing patients exposed to radiation and primary trauma care is the responsibility of the identified district hospital. They will maintain essential stock of medical supplies. Facility for safe disposal of contaminated waste, de-corporation and managing patients exposed to various hazards and primary trauma care is the responsibility of the identified district hospital. They will maintain essential stock of medical supplies. Risk and resource inventory of protection and detection equipment, decontamination and decorporation agents, casualty treatment kits will be prepared at all levels of the medical management planning process. Contaminated articles may have to be disposed following the guidelines of hospital waste management rules. People affected with acute haemopoietin, gastrointestinal, coetaneous and CNS syndrome which requires special care would be shifted to the nearest Radiation Injury Treatment Centre. Names, addresses, destinations, and telephone numbers of those individuals are to be recorded who cannot be persuaded to stay at the incident scene. The civic authorities will make arrangements for dead body identification and management. Apart from that, there are various DM agencies available in the neighbourhood of the airport which are to be identified and their role and the coordination procedures should be well documented in the respective Airport DM Plan. The respective airport may provide assistance to their DDMA, SDMA and other DM agencies by making available its resources to the DM agencies at all levels for the purpose of responding promptly and effectively to any impending disaster or subsequent to a disastrous event.

### **Quick Reaction Medical Team:(QRMT)**

District health authority will constitute **Quick Reaction Medical Team (QRMT)** for pre-hospital medical care and to assist the specialized teams of NDRF and SDRF in providing necessary help in decontamination, triage and administration of de-corporating agents, basic and advanced life support etc. QRMTs will consist of RSOs, medical doctors, nurses and paramedical staff and would be equipped with monitoring instruments/equipment, PPEs, decontamination agents, other materials, critical care vans with resuscitation and life support system. QRMTs will form part of the regular mock-drill/simulation exercise or table top exercise conducted by DDMA.

### **National Crisis Management Committee (NCMC)**

Comprising high level officials of the Govt of India headed by the Cabinet Secretary, will continue to deal with major crises which have serious ramifications. The emergencies including those requiring close involvement of the security forces and/or intelligence agencies such as terrorism (counter-insurgency), Law and Order Situations, Serial Bomb Blasts, Hijacking, Air Accidents, Chemical, Biological, Radiological and Nuclear Weapon Systems, Mine Disasters, Ports and Harbour emergencies, Forest Fires, Oilfield Fires and Oil Spills will continue to be handled by the extant mechanism i.e. NCMC. It will be

---

supported by the Crisis Management Groups (CMG) of the Central Nodal Ministries and assisted by NEC as may be necessary. The Secretary, NDMA will be a permanent invitee to this Committee.

**ACTION LEVEL TO CONTROL THE CONSUMPTION OF CONTEMNENT FOOD ITEMS  
IN THE AFFECTED AREA**

<b>Operational Objective</b>	<b>Activity</b>	<b>RESPONSIBLE AGENCY</b>	<b>CONTACTS</b>
Aid workers, volunteers and other responders possess appropriate qualifications attitudes and experience	Ensure that aid workers that have relevant technical qualifications and knowledge of local cultures and customs, and/or previous emergency experience are use.	Principal Secretary Sec (Tourism) DSP(T) DM, COOCH BEHAR	
Hygiene is Promoted	Users are involved in the management and maintenance of hygiene facilities. Ensure that systems/personnel for identification of key hygiene risks of public health importance are in place	Health & Sanitation Dept.	
Solid waste is managed	Solid wastes (including medical wastes) are collected and disposed of safely. Ensure involvement of people from the affected population in the design and implementation of the solid	State Health dept.	

---

	waste program me.		
Food is secure	<p>An analysis is conducted of how affected persons access food and the impact of the disaster on current and future food security.</p> <p>Access and analyze food security elements in relevant geographic locations and livelihood groupings, distinguishing between seasons, and over time, to identify and prioritize needs</p>	State Health Dept.	

## **Chapter-08**

### **Standard Operating Procedures (SOPS)**

These procedures are meant to enable coordination for effective and efficient response to national disaster emergencies to minimise loss of life and its extended collateral effects. They are to be read as a guide and in conjunction with the laws, regulations and procedures governing disaster and emergency response agencies.

In order to combat the potential threat and to mitigate multiple risk, it is imperative that a co-ordinated intervention through key stake holders is put into place. The procedures shall be updated and revised every year incorporating the new insight experience and understanding of vulnerability and risk perceptions and disaster that take place with the passage of time.

Organize proper training of officers and staff so that they can help in rescue, evacuation and relief work at different stage of disaster. A prompt, well-coordinated and effective response mounted in the aftermath of disasters not only minimizes loss of life and property but also facilitates early recovery.

### **Concept of Operation**

---

Upon activation of this plan, the command and control of the disaster emergency will be overseen at the co-ordination centre known as the Joint Operation Centre (JOC). The co-ordination will be established SDMA/NDRF office. The Director of the National Disaster Operations Centre is authorized to mobilize any portion of these procedures to respond and recover from the effects of disaster emergencies or the imminent threat of a disaster emergency.

## **Chapter - 09**

### **Levels of Operation in Disaster Response**

#### **Level 1**

Localized emergency events dealt within the regular operating mode of the protective, emergency and health services in the district.

#### **Level 2**

Disaster Emergency events that overwhelm the capacity of the resources in the municipal/ district, but which do not overwhelm the capacity of the provincial resources to respond and recover (such zones of impact can be declared Affected Areas).

#### **Level 3**

Disaster Emergency events that requires the mobilising of national resources to respond and recover (such an event may be designated as a national disaster). This will prompt seeking of assistance from other external partners.

#### **Level 4**

A Disaster Emergency event that overwhelms the existing national response capacity, thus prompting the President to declare a national disaster to seek foreign/international assistance to support the country in the response and recovery initiatives

The response of the NDOC and other collaborating response agencies depends on the severity of the disaster emergency and the type of assistance required.

## **Chapter – 10**

### **Aviation Infrastructure**

The airport infrastructure which, if damaged by earthquake, can cause multiple loss of life, damage to aircraft, stoppage of operations should be identified. The following airport facilities are most sensitive:

<b>Sr. No.</b>	<b>Infrastructure</b>	<b>Reason</b>	<b>Hazard</b>	<b>Mitigation</b>
----------------	-----------------------	---------------	---------------	-------------------

---

A.	Terminal Building	High density of people movement	Injury/Loss of life of passengers and staff due to collapse of building, Stampede, Fire electric light failure	Earth quake resistant construction by following the appropriate building codes, Building evacuation Plans, multiple wide exits and signages, wide staircases, Fire plan, alternate/emergency power, identified open areas Prior arrangements to restart TB
B.	Control Tower and ATC facility (at the airport or away from the airport)	Multi storied, damage will result in stoppage of operations	Injury/Loss of life of staff; fire, Stoppage of operations, Difficult rescue operations	Earth quake resistant construction by following the appropriate building codes, Evacuation Plans, alternate tower operations
C.	Electrical installation such as power stations	Will cause electrical disruption of airport operations, chances of fire	electrical disruption of airport operations, chances of fire	Alternate power source, Robust construction by following building codes
D.	Runway and apron	Damage to runway will hamper operations including relief flights	Damage to aircraft landing or taking off during earthquake Stoppage of operations	Prior arrangements to repair runway
E.	Navigational facilities	Will hamper aircraft operations	Delay/ disruption of flight operations	Prior arrangements to repair nav aid buildings and equipment
F.	Culverts and Flyovers	Culverts below the runway, taxiway etc. which are used by aircraft, Flyovers used by aeroplanes or the vehicles, passengers	High weight of aeroplanes, high volume of airport users and their vehicles	Construction as per Annex 14 and airport design manual. 1 National building code 2005 and other relevant standards
G.	Refuelling facilities and fuel farms	Prone to fire During earthquake or otherwise	Proximity to airport important installations can cause fire risk to persons and property	Follow the standards between the fuel farm and airport critical facilities. Develop new standards in coordination with NDMA and Oil companies.
H.	Fire Station	Critical	Fire building	Fire resistant design and

---

		airport Emergency Service	collapse may result in loss of life of FROs and damage to fire tenders. Non availability of Fire Services.	construction of Fire Station
--	--	---------------------------------	---	------------------------------

## **Chapter – 11**

### **First Responder's Response**

This Airport Disaster plan specifies jobs of all the functionaries who have assigned roles during the emergencies. Actions should be balanced and commensurate with the level of severity and should not create unnecessary anxiety and panic among the people.

**Broadly,**

- First-aiders (Fire Fighting & Rescue Services) will perform the actions involving mobilizing and operating the incident command, overseeing victims triage area.
- ASG will cordon the site, managing and controlling the perimeter.
- ATC & Terminal Management will provide notification & activation of the special teams, provide traffic and access control.
- Terminal Management in co-ordination with Airlines will provide protection to at-risk and special population, providing resources support and requests for assistance, providing public information, and outreach and communication activities.
- AAI will hand over the scene to SDMA, West Bengal and other specialized agencies which will be sent by DDMO and on their arrival, AAI will continue to play the supporting role.

### **Response to Chemical Biological Radiological & Nuclear emergencies and Disasters (CBRN)**

Whereas the airport emergency services are capable of providing greater response in case of Chemical disasters, in case of Biological, Nuclear & radiological emergencies, only the essential activities mentioned below are carried out in the proximity of the incident site prior to the arrival, or consultation with the qualified radiological health professionals:

1. Alert the staff, passengers and general public (if so required) by sounding the emergency siren and making an emergency announcement.
  2. **Inform the local police, City Fire Station, DDMA, NDRF and medical authorities as per the pre coordinated Airport DM Plan**
-

3. **Identify and isolate** the affected area. Seal off the inner zone of 400 m radius from the blast site as 'No Entry Area' except for emergency measures.
  4. **Cordoning:** For a suspected RDD incident, an initial inner-cordoned area (safety parameter) of 400 m is recommended. This will be extended based on actual radiological monitoring, beyond the initial area, to a place where the actual dose rate is 100 MicroAge/hr at 1 m from the ground. AAI's first responders which in all probability will reach at the site before other agencies like Police, NDRF etc. should have some simple portable monitoring instruments which will warn them as they approach the radiation source (say a blast of RDD).
  5. **First-aiders** will perform the actions involving mobilizing and operating the incident command, overseeing victims triage, cordoning the site, managing and controlling the perimeter, providing notification and activation of the special teams, providing traffic and access control, providing protection to at-risk and special population, providing resources support and requests for assistance, providing public information, outreach and communication activities. AAI first responders will hand over the scene to DDMA and other specialized agencies on their arrival and continue play the supporting role.
  6. **Restrict entry to the area of the incident.**
    - a) If contaminated is suspected, keep all the persons in a separate area until the radiological assessor arrives or, if possible, monitor them and decontaminate as necessary. Provide respiratory protection (if airborne contamination is suspected) and avoid inadvertent ingestion.
    - b) Establish and supervise an access and de-contamination point as near as possible to the safety perimeter (upwind, inside the safety perimeter) where the ambient dose rate is close to background Position in the upwind direction of the incident especially where fire is present.
    - c) The area downwind direction of the fire, especially if smoke and ash are involved, will be cleared of people, even if they are residents.
    - d) Perform life-saving rescue and emergency first aid for serious injured without waiting for radiation monitoring, even if radioactive contamination is suspected.
    - e) While responding to any fire, fire personnel will be cautioned that radioactive material may be present.
    - f) Keep to an absolute minimum, any contact with radioactive material and suspected contamination material. Clothing and tools used at the scene will be disposed off as radioactive material and do not attempt to move or clean up any material involved.
    - g) Identify assembly locations for persons trapped in radiological areas, airport personnel and casual public for their accounting activities include. Evacuate the persons to the predetermined areas. Detain all persons to:
    - h) People affected with acute haemopoietin, gastrointestinal, coetaneous and CNS syndrome which requires special care would be shifted to the nearest Radiation Injury Treatment Centre.
-

- i) Contaminated articles may have to be disposed following the guidelines of hospital waste management rules.
- j) Record names, addresses, destinations, and telephone numbers of those individuals who cannot be persuaded to stay at the incident scene.
- k) Prohibit eating, drinking and smoking in the incident area.
- l) The civic authorities will make arrangements for dead body identification and
- m) Management.

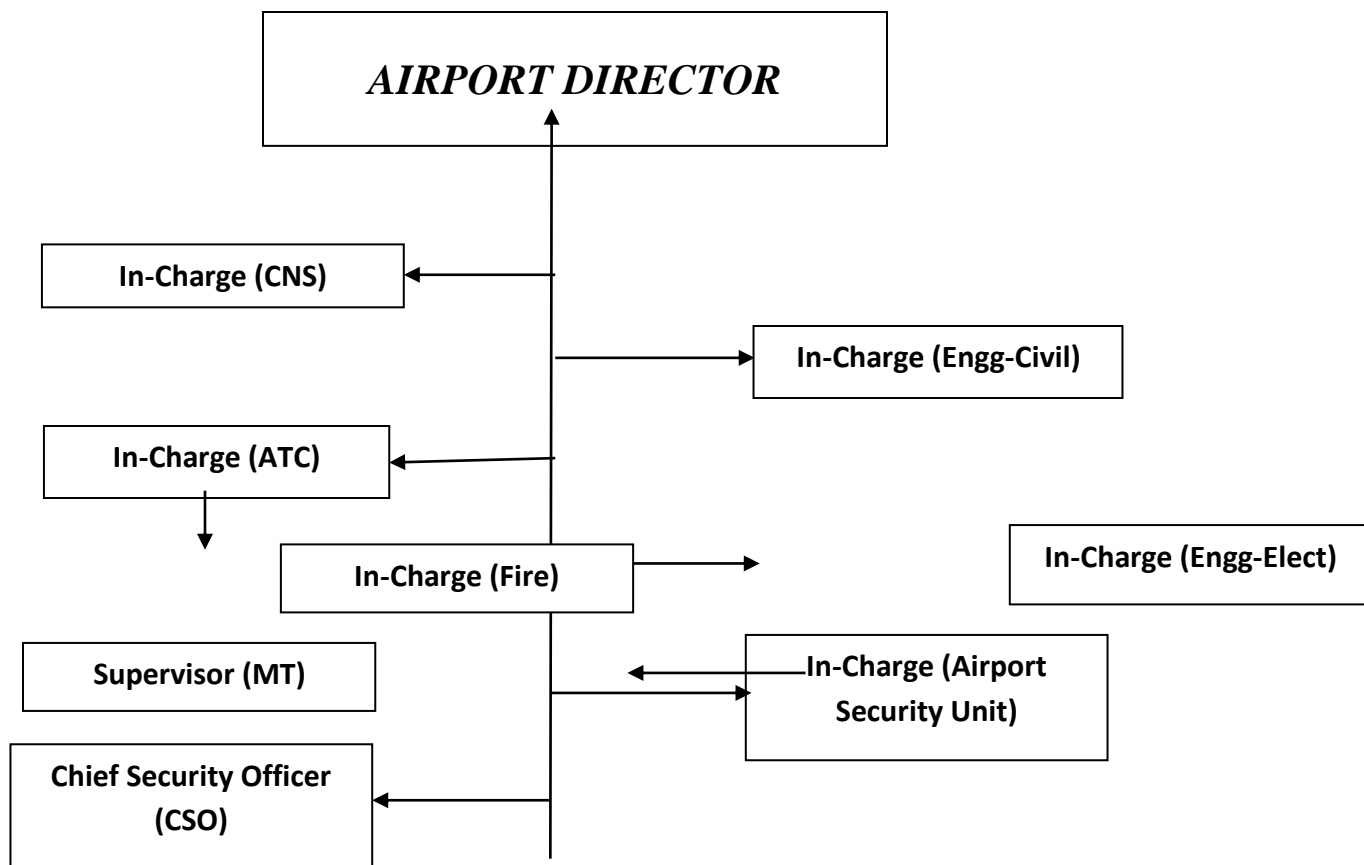

## Chapter – 12

### Incident Command System

These SOPs adopt the incident command system for a standardized on-site and off-site all hazard incident emergency response. This will enable to implement a flexible and scalable framework.

An incident is an occurrence, either caused by human natural phenomena. It requires actions to prevent or minimise loss of life or damage to property at the environment. It is a primary command and control system delineating job responsibility and organisational structure for the purpose of managing day to day operations for all types of emergency incidents

#### Organisational structure of Cooch Behar Airport

---

<b>Staff</b>	<b>Office</b>	<b>Mobile</b>	<b>Residence</b>

### **Chapter - 13**

#### **Logistic Supports and Exercises**

Logistics management is the process of planning, preparing, implementing, and evaluating all logistics functions that support an operation or activity. Resources are described by kind and type. All local resources must be committed before assistance is requested from neighbouring jurisdictions, district, states or the central government.

A catastrophic event may severely hinder the ability of the local government to respond because many of the local government's staff members may also be adversely affected and its facilities may no longer be available; communications may be severely disrupted; the number of people needing assistance may be very large; debris, high water, blocked roads, etc. may impede movement; equipment loss and other factors may impair functional capabilities. However, the logistical support of resources is an extremely critical factor in the successful management of disaster response and recovery efforts.

**Organization and Assignment of Responsibilities:** The provision of effective logistics support can be very complex and especially challenging in a catastrophic event, so volunteer staffing should be identified, trained and exercised/employed in advance of a catastrophic disaster. At a minimum, the EOC Logistics Section staffing should include:

---

1. Logistics/Resource Management Section Chief - APD
2. Deputy Section Chief- as designated by APD
3. Services and support Branch Chief: All concerned section head

## **Chapter – 14**

### **Evacuation Plan & Disaster Risk Reduction**

#### **Evacuation Plan**

Prompt evacuation of casualties may be required to be carried out from the incident site, and of people living or working in the vicinity of the site who are likely to get exposed or come under severe threat of contamination, during a chemical attack. The evacuation plans will be prepared and categorized in two broad groups:

- I. Evacuation from the Incident site
- II. Evacuation of the Community under Possible Threat of a disaster

Some components of the civil aviation authorities need to be upgraded and equipped with modern facilities for the management of enhanced need of evacuating a large number of casualties.

The support zone, casualty collection centre and ambulance parking area will be provided with collective protection. Prompt removal of victims from the hot zone shall be ensured. Casualties from the hot zone of the incident site will be transported to the designated earmarked health care facility after providing BLS, necessary triage and decontamination procedures.

The evacuation planning will include information of the defined route, the availability of NBC filter-fitted ambulances (in case of CBRN Disasters) with specialized paramedical staff, and specialized facilities available with earmarked hospitals, keeping in view the prevalent and forecasted meteorological conditions and level of contamination.

#### **Disaster Risk Reduction**

Number of explanation have been given in reference to the term disaster however, in simple terminology the disaster would imply, then occurrence arising with little or no warning which causes or threatens serious disruption of life and perhaps causes death or injury large number of the people and require therefore a mobilization of effort in excess of that normally provided by the statutory emergency service. This means that additional efforts would be needed to meet disasters which may directly or indirectly affect the aircraft operation. The disasters are broadly categorized under three heading i.e., natural, manmade and hybrid.

The Platform shall be the co-ordination mechanism for mainstreaming DRR into development policies, planning and programmes in line with the implementation of the Framework for Action. The Platform shall aim to contribute to the establishment and the development of a comprehensive national DRR system as appropriate in India. The National Platform shall:

- a. Work to establish baseline information for DRR, including disaster and risk profiles, national policies, strategies, capacities, resources and programmes;
  - b. Identify trends, gaps, concerns and challenges and setting forth accepted priority areas in DRR;
-

- c. Advocate for the urgent need for developing or adopting policies and legislations for DRR;
- d. Benchmark progress made in promoting DRR and it's mainstreaming into development policies, planning and programmes;
- e. Develop result-oriented work plans of National Platforms for DRR to coordinate the DRR activities.
- f. Coordinate joint efforts among members of National Platforms for DRR to reduce the vulnerability of people at relatively high risk;
- g. Monitor, record and report of disaster risk reduction actions at national and community levels.
- h. Document lessons learned and good practices, and share the findings (including promoting twinning of National Platforms for DRR) at national, regional and international levels; and
- i. Work towards better integration of DRR into national planning, policies and programmes in development and humanitarian assistance.

## **Chapter – 15**

### **Media Management**

Airport Director / Corporate Communication team has to take the lead to handle all press matter. They are the single point media interaction. They will be responsible for developing the overall information management plan, with emphasis on strategies to manage the information flow.

## **Chapter – 16**

### **Term Planning**

All identified activities under the action plan for disaster management are implemented under the following three types of Term Planning as listed below:

- I. Short-Term Plan (0-3 Years)
- II. Medium-Term Plan (0-5 Years)
- III. Long-Term Plan (0-8 Years)

#### **I. Short-Term Plan (0-3 Years)**

- MoU between Cooch Behar Airport and the City Fire brigade
  - Monitoring of all disaster alert warnings issued by the IMD
  - Aerodrome surface markings/lightings as per standards
  - Storage and Handling according to the prescribed national rules, guidelines the DGCA regulation, ICAO Annex 18 and doc 9284
  - Protection of environment and property
  - Prevention of deterministic health effects in individual
  - Developing policies and practices to handle similar situations in future
  - Implementation of financial strategy for allocation of funds for various projects
  - Provision for temporary decontamination facilities and sensitization programmes for the airport community about self-decontamination procedures
  - Testing various elements of the emergency plan through table-top exercises and mock-drills
  - Overall capacity development including human and resource development, training, education and knowledge management. Special training to be conducted at training centre
-

**II. Medium-Term Plan (0-5 Years)**

- Equipping first responders with all material logistics and backup support
- Identifying infrastructure needs for formulating mitigation plans
- Establishment of physical and collective protection, detection technologies, decontamination agents and associated manpower
- Imparting adequate knowledge on various types of disasters, their properties, possible modes of dispersal, use of PPE etc. Special training should be conducted at training centre
- Knowledge on various types of CBRN agents etc., different modalities and methods of decontamination and sources of their availability and principles of triage for CBRN casualties. Special training should be conducted at training centre.
- Imparting adequate knowledge on Chemical agents and their properties, possible modes of dispersal, use of PPE, different modalities and methods of decontamination and sources of their availability, principles of triage for chemical casualties
- Awareness programmes for first aid and self-decontamination procedures
- Continuation and upgrading of HRD activities
- Frangible structures in operational area
- Testing of DM plan in Mock exercise

**III. Long-term Plan (0-8 Years)**

- Disaster resister design and construction of public utility structure
- Identification and removal of unsafe buildings /structure. Re - constructed , if needed
- Secure communication network for first responders; build redundancy in communication networks by in-built repeaters optimally positioned for incident communication, and a self-healing grid for telecommunication and other utility networks
- Development of simulation models for testing the efficacy of plans for continuous improvement at training centre

**Chapter – 17****Preparedness Level****Training / Drills / Exercises & Documentation:****Training:**

Regular training would be provided to all personnel who have a role in planning and operational response to an emergency.

The training objectives are:

- To familiarize personnel with the contents and manner of implementation of the plan and its procedures
  - To train personnel in the performance of the specific duties assigned to them in the plan and in the applicable implementation procedures
  - To keep personnel informed of any changes in the plan and the Implementing procedures
  - To maintain a high degree of preparedness at all levels of the Emergency Response Organization
  - Train new personnel who may have moved within the facility Organization
-

- \*Test the validity, effectiveness, timing and content of the plan; and
- Update and modify the plan on the basis of experience acquired through Exercises and drills.

**Mock Drills and Exercises:**

Mock drills constitute another important component of emergency preparedness and refer to the re-enactment, under the assumption of a Mock scenario of the implementation of response actions to be taken during an emergency. Mock drills and integrated exercises have the following objectives.

- To test, efficacy, timing, and content of the plan and implementing Procedures
- To ensure, that the emergency organization personnel are familiar with their duties and responsibilities by demonstration
- Provide hands-on experience with the procedures to be implemented during emergency; and
- Maintain emergency preparedness

The frequency of the drills would vary depending on the severity of the hazard. However, drills would be conducted **once in a two year**. Scenarios may be developed in such a manner as to accomplish more than one event objective. Drills and exercises will be conducted as realistically as is reasonably practicable. Planning for drills and exercises would include:

- Basic objectives
- Dates, times and places; Participating organizations
- Events to be simulated
- Approximate schedule of events
- Arrangements for qualified observers; and
- An appropriate critique of drills/exercises with participants

Evaluation of drills and exercises would be carried out which include comments from the participants and observers. Discrepancies noted by the drill observers during the drill shall be pointed out.

The individual responsible for conducting the drill or exercise would prepare a written evaluation of the drill or exercise. The evaluation would include assessments and recommendations on:

- Areas that require immediate correction;
- Areas where additional training is needed;
- Suggested modifications to the plan or procedures; and
- Deficiencies in equipment, training, and facilities.
- Records of drills, exercises, evaluations, and corrective actions would be duly maintained

**Documentation**

- The serviceability status of safety vehicles, tools & equipments , communicational facilities, air traffic related facilities etc are to be checked and documented and forwarded to RHQ and CHQ. Also the proficiency reports of all the sections are to be documented and sent to RHQ & CHQ
  - Records of drills, exercises, evaluations and corrective actions would be duly maintained by all concerned sections
  - Incident, Accident returns shall be documented and sent to RHQ and CHQ
  - Training, meeting with other responding agencies to be documented
  - Airport familiarization of outside rescue team to be carried out and documented
  - Participation of outside responding agencies in full scale mock up exercise and to be documented
  - MoU between Cooch Behar Airport and Cooch Behar City Fire Brigade to be documented and updated as and when required
  - Directions from Ministry of Home Affairs, National Disaster Management Authority, Government of India, etc. can be implemented by documentation
  - Lessons learnt from any disaster event in other states and countries
  - Recommendations from all departments in their Annual DM Report also are considered on review
-

- 
- Upgrading of DM plan periodically or as when required

### **Chapter - 18**

#### **Alert System and Reporting**

The Emergency Response Plan (ERP) will have an adequate mechanism for proper planning and coordination with different responders, emergency functionaries and logisticians. It is important to have an inbuilt alert system that will activate the definitive specialized response. For this purpose, a well-rehearsed and standardized alert system will be evolved. Communication and Networking act as a key for an effective response to any disaster.

The information network will also include effective communication network to quickly analyze and identify contaminants at the incident site.

#### **Alert Mechanism-Early warning and Reporting**

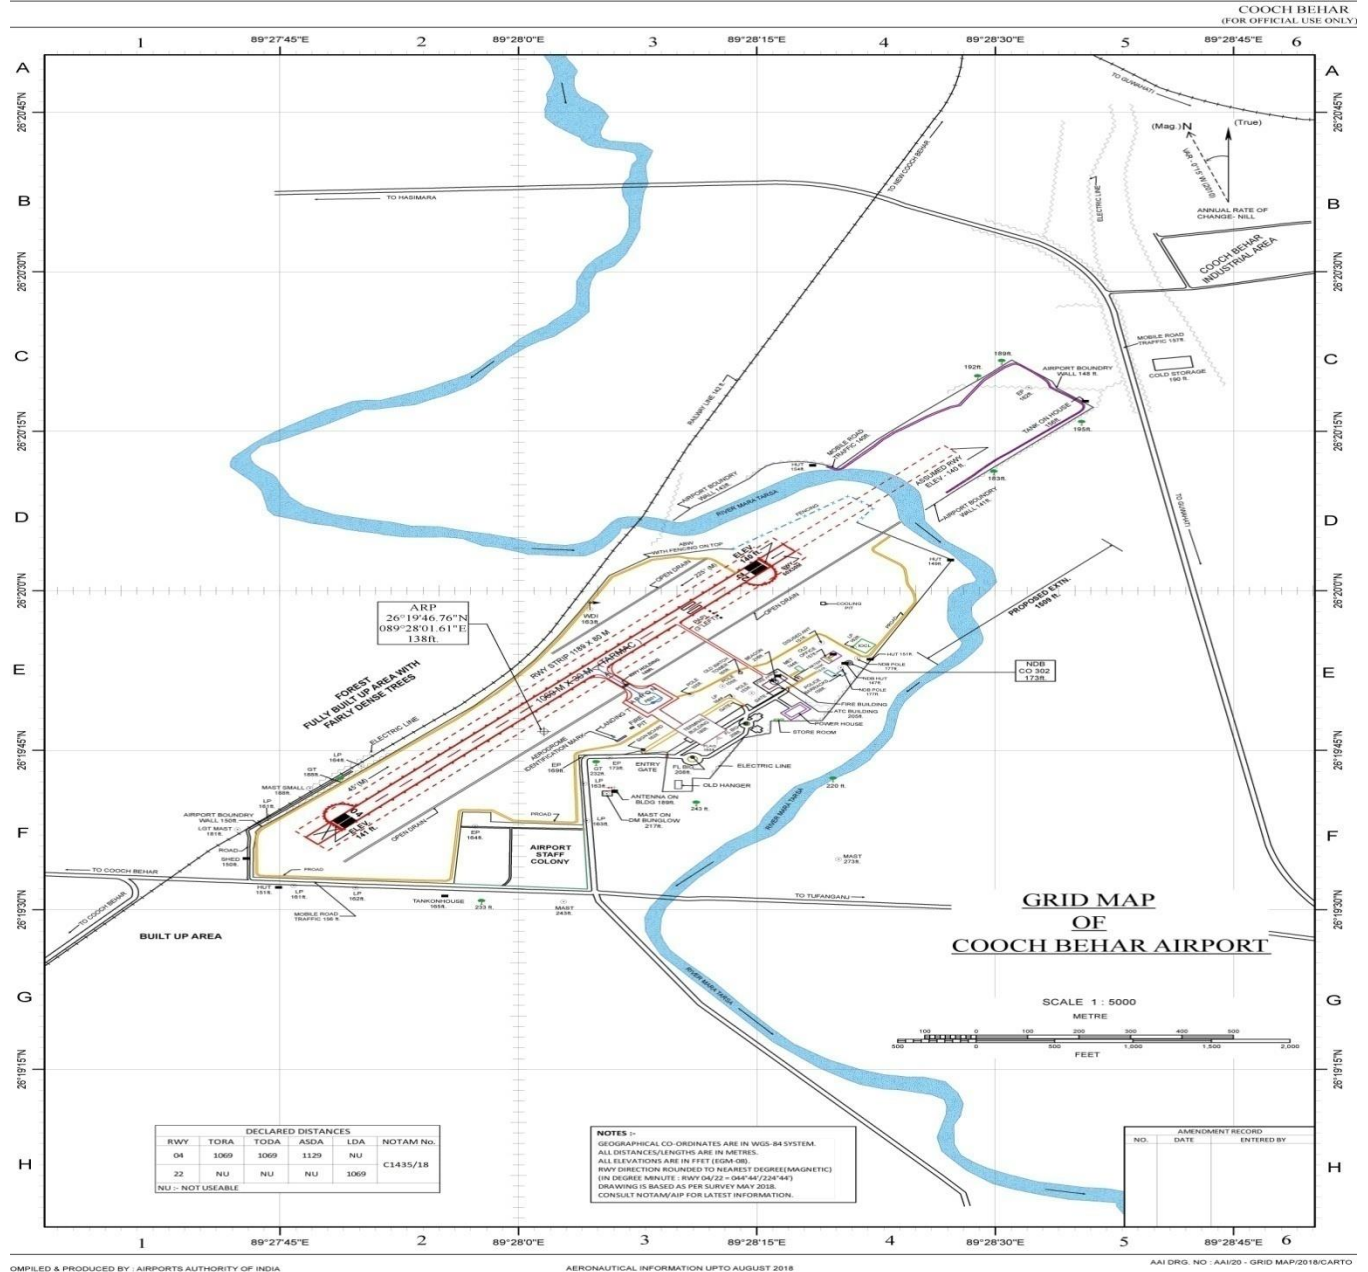

<b><u>Disaster</u></b>	<b><u>Agencies</u></b>
Earthquakes	IMD,ISR
Cyclones	IMD
Drought	Agriculture Department
Epidemics	Health & Family Welfare Department
Industrial & Chemical Accidents	Industry, Labour & Employment Department, DISH
Radiological/ Nuclear	Specialized CBRN team ( in NDRF)
Aircraft crash / Airport Fire	ATC, Fire & Emergency Services, other agency

#### **Early Warning, Detection & Monitoring:**

**Detection and monitoring is the responsibility of SDMA, West Bengal. Mechanism for detection and monitoring may be deployed for specific hazards at the airport.**
