Disaster Management/ contingent plan of Agriculture Department.

It is our experience that hot and dry weather condition generally starts in this District from Mid. March and continues up to May with the temperature varying between 35.0° & 41.5° Celsius. Average normal rainfall of this district is **1282.15** m.m. Monsoon generally commences in this District from Mid. June & stays up to Mid. October.

Drought/Flood generally hits this district more or less every alternate year. Existing different irrigation facilities are exploited to irrigate the land under cultivation by about 80% though the irrigation potential is very high. Yet, when drought or dry spell comes the standing crops have to face much moisture stress due to texture & structure of the soil. More or less all the Blocks have drought & flood prone area. The total drought & flood prone area of this district is 51610 & 71950 ha respectively. The plan of action for managing and mitigating natural calamities, be it drought or flood, is given below in details.

To cope up with drought the following actions may be taken:

Delayed monsoon & dry spell or drought.

1. Preparation of short duration HYV paddy seedbed in Govt. Farms @ 1 acre in phases with a view to provide paddy seedlings to the affected farmers on no loss no profit basis.
2. Farmers are advised to transplant Aus crop as an additional coverage with available short duration varieties.

Long dry spell.

1. Rational use of irrigation water in minor installations.
2. Paddy field should be weed free.
3. No top dressing of nitrogenous fertilizer.
4. Field channel should be weed free and clean.

Early flood & plan to cope up with the situation.

1. In such cases re-transplanting of short duration varieties of paddy after receding flood water may be done.
2. Short duration HYV Paddy Seed bed may be prepared in the Govt. Farm in a staggered manner i.e. at an interval of 7-10 days for maximum three times to cover at least 1 (one) acre seed bed as a whole and the paddy seedlings thus raised may be distributed among the affected farmers on no loss no profit basis.
3. After receding flood water nitrogenous fertilizer should be applied as top dressing @ 25Kg./ ha. for quick growth of plants & for this purpose, fertilizer minikit may be supplied to small & marginal farmers, Bargadar and Patta holders.
4. Kalai Seed Minikit may be distributed among the affected farmers.
5. Farmers would be made aware of the above message through different mass media & leaflets.

Late flood & plan to cope up with the situation.

1. In case of late flood from Mid. September to Mid. October & when there will be no scope of re-transplanting paddy due to water logging or submerged condition of land, the affected farmers may be advised to go for Rabi cropping programme by exploiting residual moisture of the land.
2. To sow Pulses and Oilseeds in large areas in addition to normal area.
3. Not to grow wheat in this District this year also (i.e. Wheat Holiday to be observed). To cope up with the loss of cereal crops as far as possible, Rabi/Rabi Summer Hybrid Maize may also be grown as an alternate crop.

OFFICE OF THE DEPUTY DIRECTOR, ARD & PO, NADIA, KRISHNAGAR, W.B.

ACTION PLAN FOR MULTI- HAZARD DISTRICT DISASTER MANAGEMENT PLAN IN RESPECT OF ARD DEPTT., NADIA FOR THE YEAR 2018-19.

Natural calamities like flood, cyclone are very common in Nadia District and are normal feature. Therefore, a detailed work plan for tackling such calamities is imperative in the long-term interest of Animal Resources Dev. of this District.

Considering the above facts, the action plan in respect of Animal Resources Dev. may be divided in three phases:-

- a) **Preparedness in anticipation (Pre Disaster).**
- b) **Immediate action (During Disaster).**
- c) **Delayed action (Post Disaster Management).**

a) Preparedness in anticipation:-

1. Advance planning to keep all departmental staff alert before the onset of monsoon and their subsequent deployment in the eventuality has been made through deployment planning and necessary strengthening.
2. Arrangement for procurement and storage of essential inputs i.e. medicines, vaccines, disinfections etc. to be made to save the affected livestock. (Stock position of Medicine, Vaccine, etc. are enclosed herewith as annexure A)
3. Animals in the endemic zones are being vaccinated against different bacterial and viral diseases as preventive measures.
4. Identification of vulnerable areas and livestock shelters in the safe position is to be settled.
5. Arrangement for opening control rooms at District/Sub-division/Block levels and Veterinary teams will be kept ready to proceed promptly.
6. The Deputy Director of Agriculture (Administration), Nadia and nearest Feed Milling Plant at Kalyani (an organization of Dairypoul) to be requested to keep reserve stock of paddy straw and concentrate feed respectively for anticipated calamity, if any.
7. Arrangement for procurement of paddy straw will be made locally inviting quotation at block level or through existing approved supplier of Haringhata Farm.
8. Administrative authority in the block/sub-division/district level and panchayet functionaries at three tiers and municipal authorities will be contacted in a regular manner to have updating information for calamities and guideline to aware the farmers.
9. Additional deployment of A.R.D. personnel will be arranged in the different areas of affected blocks considering the severity of disaster.
10. Annual supply of medicines will be completed within June, 2016 to the different field units.
11. A proforma of daily report has been handed over to all the BLDOs and Veterinary Officers (DAH/SAHC) for proper system.
12. The District Magistrate/Sub-Divisional Officer/Block Dev. Officers are requested to provide country boats/speed boats top the District/Sub-Division/Block Levels in consultation with the Panchayet Authorities to combat the situation, if any, for the affected animals.

13. Requirement of Fund & Paddy Straw as per District Livestock population:-

In the light of experience generally appropriate measure for the affected bovine in respect of supplying of feeds and dry fodder and animal health care for the affected Livestock population as far as possible.

Total Large animal i.e. Cattle and Buffalo population is 894093, considering relief materials required for 10% of the flood affected animals i.e. 76680 or say 80000. Relief measure to be taken to combat flood like situation and to save the cattle

and buffaloes from starvation fodder and feed should be supplied at least 7 days @ 250 gm of concentrate mixture per day per animal and 2 kg of dry fodder per day per animal.

Requirement of fund for feed and fodder (paddy straw) as follows:-

- i) Cattle feed (concentrate mixture):- 140 MT @ Rs. 16000/- per MT = Rs. 22,40,000.00
- ii) Paddy Straw:- 1120 MT @ Rs. 2600/- per MT = Rs. 29,12,000.00
- iii) Medical (Lifesaving drugs) & Vaccine:- Approximately Rs. 15,00,000.00.

Total requirement of Fund:-

- | | | |
|----|--------------------|-------------------------|
| i) | Feed & Fodder:- | Rs. 51,52,000.00 |
| | Medicine & Vaccine | Rs. 15,00,000.00 |
| | Total | Rs. 66,52,000.00 |

District Level Flood preparation meeting will be held on 5/6/18 in the conference hall of Deputy Director, ARD& PO, Nadia.

The Cattle feed will be procured from the cattle feed plant of Kalyani Feed Milling Plant, W.B. Dairy & Poultry Dev. Corporation Ltd. and in this context concerned will be requested to keep in readiness a buffer stock to combat the flood situation.

Like previous years the paddy straw may be procured by the Block Livestock Dev. Officer from the locality or from the adjacent Block Seed Farms and accordingly they will be informed to keep themselves in readiness.

14. The Veterinary Officer of SAHC will be in-charge of respective sub-division control room and will keep close with the respective SDO.
15. The Veterinary Officer, District Veterinary Hospital/SAHC will combat the flood situation of respective municipal area and the rest municipal and notified areas will be covered by the nearest BLDOs.
16. Further necessary instruction and guidance will be issued from this end time to time as and when required.
17. The Assistant Director, ARD, SPF, Ranaghat and the Office in-Charge of SPF, Krishnagar are requested to keep ready measures to combat disaster in their respective Farms, if occurs.

b) Immediate action (During Disaster):-

1. Control Rooms will be opened at District/Sub-division/Block Level, as per situation.
2. Immediate assessment of requirement of feed and fodder, medicines, vaccines will be collected from the field units and the matter will be communicated to the higher authority for early action.
3. As early as possible Health Camps will be organised in the affected areas with essential medicines, vaccines – and will assess the loss in respect of Animal Resources and keep close vigilance towards epidemic in the affected areas, if occurs.
4. Information in respect of any natural calamity will be furnished through the route chart as noted below:-

Disaster Management Plan 2018

District: Nadia

The disaster is defined by WHO as “any occurrence that causes damages, ecological disruption, loss of human life and deterioration of health and health services on a scale sufficient warrant an extraordinary response from outside the affected community or area.” Among the natural disaster floods accounts for the largest number of events in the world as well as in India followed by cyclone. In Nadia district of West Bengal flood is most commonly occurring natural calamities mostly due to its climatic & geophysical characteristics.

Experiences of disaster in Nadia district:

Like many other districts flood is an annual phenomenon in Nadia district followed by cyclone. The district is intersected by number of rivers like River Ganga, Jalangi&Churni. All rivers are coming from north & going towards south so rainfall in northern region or hilly areas causes over topping of river. So, disaster partially depends on the rain fall & other environmental condition. At the same time water holding capacity of rivers & water channels are decreasing day by day due to silting of river beds. Flood in Nadia district is mainly due to overtopping of river due to heavy rainfall or sudden discharge of huge amount of water from Tilpara barrage or Mython dam.

Flood in Nadia usually occurred during late monsoon while cyclone form in the Bay of Bengal between May to November as such it coincides with monsoon. Experiences in recent past shows that a devastating flood occurred in the month of August' 2015. The flood causes huge loss of crops, houses & cattle's leads to immeasurable human sufferings. In 2015 flood, 16 blocks of the district and 3 municipalities was affected. Badly affected blocks were Nabadwip, Santipur.

Considering the flow of the river & geographical location of blocks – 16 blocks & 59 GPs and 3

Municipal wards found to be flood prone in the district. Conservative estimation shows at least **128073** people living in highly flood prone area. But from the experiences of year 2000- all blocks may be considered flood prone. Also, to mention that there are pockets where flash flood & water logging occurred almost in every year. Diarrhoea was the most common health hazards following flood – due to contamination of drinking water sources & non-availability of safe water to maintain personal hygiene. Others health hazards were ARI, skin ailments, Snake bites etc.

Thus, along with medical treatment of ailments – sanitation of relief camp, disinfection of drinking water sources considered to be another important activity of PHE dept. as well as health dept.

In the year 2016 and 2017 no such disaster occurred in the district Nadia.

So, pre-disaster precautionary measures & preparedness against these two types of natural disaster are taken up in a planned manner at all levels (District, Block & G.P) before the monsoon every year. The concept & interest of disaster rescue & relief has changed to disaster preparedness & response activities. So far preparedness status of any district or area against a specific type of event is prime importance to prevent grave consequence of the event or calamity.

Health Sector Disaster Preparedness:

❖ Pre-Disaster period:

Health sectors importance is clearly seen after the sudden impact of natural disaster. It is essential that health facilities & services continue to function after a disaster strike. As it is a multi-sectorial & multidisciplinary in approach so it is important that health facilities equipped in co-ordination with other relevant sectors like food & supplies, PHE, PWD, Agriculture etc. Thus, to minimize the health hazards district health official work closely with allied sectors & municipal workers to set up a response system which reduces risk of water contamination, water & insect borne diseases, safe disposal of solid wastes as a part of a routine preparedness planning.

During pre-flood season following steps were followed to complete a flood contingency plan.

- Hazard mapping- identification of disaster & specific disaster-prone areas.
- Vulnerability analysis & Health Risk assessment.
- Crisis management committee& medical relief team (district, Subdivision, Block& G.P level)
- Mass causality management plan.
- Preparation of list of staffs, vehicles for emergency management of crisis.
- Storage of drugs & disinfectants at block & GP level.
- Ensuring early warning.
- Identification of flood shelter- ensures safe drinking water & sanitation facility & disinfection of drinking water sources in flood shelters.
- Co-ordination& transfer of information between allied sectors.
- Development of communication channel & reporting- during disaster & post disaster period.
- Continued disease surveillance during post disaster period.

➤**Hazard Mapping-**

Highly flood prone areas are Nabadwip&Santipur block as well as both municipalities. It has been found that people with poor living condition i.e marginal population are living in flood prone areas & they are the worst suffers.

Flood prone blocks of Nadia

FLOOD 2015-2017

Year	Type of disaster	No of block affected	No of GP/M. ward affected	Total population affected	Total No of death.
2015	Flood	16	59	128073	23
2016	NA	0	0	0	0
2017	NA	0	0	0	0

➤ **Vulnerability analysis & Health risk assessment -**

It is being increasingly realised that 'probable risk' must be taken into account to deal with any disaster. Poor communities in peri-urban areas of Santipur & Nabadwip Municipalities or marginal people of Nabadwip, Santipur, Kaliganj & Nakasipara blocks are vulnerable to disease due to marginal condition in which they live. Thus, the community also needs to be sensitized through PRI or NGO on relative risk. At the same time experiences of the district shows that there is a 'acceptable risk' by the community after a careful consideration of potential losses & benefits in these areas. Records available for flood as on 18/08/2015 are as follows-

Sl.No	Blocks/ Municipality	Diarrhoea		Fever		ARI		Snake Bite		Drowning		Accidents

Data shows that the disease already prevalent in these areas flare up following flood or cyclone. No new disease has so far found which was uncommon in the area.

➤Crisis management committee & Medical relief team-

In the district, as per state guide line there is a crisis management committee headed by District Magistrate & another allied department are member. Similarly, crisis management committee formed at SD & Block level. DRO, SDRO& BRO from dept. of Relief take a leading role respectively at district, Sub division & block level.

➤Mass casualty management plan-

Considering the experiences of last devastating flood disaster in 2000, Ranaghat SDH, Bethuadahari RH & Nadia District Hospital, Saktinagar has been identified for mass casualty management. It was decided that up to 10% bed strength may be increased in all identified hospitals if mass casualty occurred. Accordingly, bed, Linen etc to be provided well in advance & some staffs to be deployed. All BMOHs, ACMOHs & Superintendent of hospitals were informed regarding the details of arrangement of Mass Casualty Management Plan. In mass casualty preferably affected people from Santipur, Ranaghat-II, Hanskhali&Chakdaha to be send to Randghat SDHospital, Kaliganj, Tehatta-II to Nakashipara BPHC & patients from remaining blocks will be send to District Hospital, Nadia.

Based on experiences of diseases burden following flood disaster following drugs & disinfectants were identified as essential for the disaster

Disaster Management - contingency plan'2018

District: Nadia

- Experiences in last 10 years shows that like West Bengal, Flood is almost an annual phenomenon followed by cyclone in Nadia district.
- There was a devastating flood in the 2000 causing flood in all 17 blocks & municipalities of the district.
- 6(Kaliganj, Nakashipara, Krishnagar-II, Nabadwip, Santipur & Chakdah) out of total 17 blocks & 2(Nabadwip & Santipur) out of 10 municipal areas found to be flood prone.
- Among flood prone areas Nabadwip & Santipur block as well as both municipality found to be highly Flood prone.
- People living in 105 GP out of total 187 GP identified as flood prone & 471 rescue camp has been identified in these areas.
- Record shows that diarrhoea is the commonest health hazards following flood disaster.
- During pre-disaster period –preparedness meeting plan to be held in the district as well as Subdivision & block level. Like district block Disaster Contingency plan- similar plan also to be prepared in flood prone blocks)
- Identified flood medicine to be sent to blocks with instruction to send specified drugs & disinfectants to flood prone GP office.
- For mass causality management 3 hospitals being identified- District Hospital, Ranaghat SDH & Bethuadahari RH.
- Arrangement for additional cot, linen etc will be planned.
- List of vehicles for transportation of patients in mass causality.
- One day workshop on disaster management for doctors & other health staff both at district & block level proposed.
- Both at Block, Sub Division & District level RRT – to be revised within May 12.
- Control room during flood planned at CMOH officer.
- List of Contact No & e mail Id of all concern prepared.
- Inter-sectoral co-ordination meeting to be held at different level.
- Outline of budget prepared.

Drugs & disinfectants

- Medicine & disinfectants in a camp with 30,000 population for 30 days Diarrhoea attack rate 10%-12%, ARI 6% - 8%

So about 300 episodes of diarrhoea & 200 episodes of ARI.

- ORS- $300 \times 3 = 900$ pkts, Referral 15-may need IV fluid
 - Metronidazole for 10% episode i.e. 30×15 tab = 450 tablet
 - Norfloxacin for 2% episode i.e. $6 \times 10 = 60$
 - Antispasmodic & anti-emetic for 10% episode @ 5tab $\times 30 = 150$ each
 - Cotrimoxazole for 10% i.e. for 20 persons (approx. 12 child, 8 adult) so, 240 kid & 80 DS.
 - Paracetamol @ $6 \times 20 = 160$
 - Bleaching powder- for camp disinfection 1 pkt of 25kg
- water requirement for drinking $2.5 \text{ lit} \times 30 \text{ days} \times 30000 = 225000 \text{ lit} / 20 = 11000$
- Halogen tablet required -11000(approx).
 - IV fluid & AVS may be kept at PHC (1V fluid for 3-5pt. & AVS for 1-2 pts.)

➤ **Ensure early warning by general administration-**

❖ **During disaster: -**

When disaster strikes medical relief as well transfer of information about the current status including disease surveillance to the HQ as well as allied sectors is essential. Alternate channel of communication may be required to ensure daily up to date information.

❖ **Post disaster period: -**

➤ **Disease surveillance-**

As it has been proved that the diseases common in the area are only flare up following any disaster. Thus, surveillance of communicable disease during disaster & post disaster is important to have an idea about the type & burden of the disease for further planning. There is a uniform format provided by the state to have data daily during disaster & post disaster period. This surveillance continued at least 6-8 weeks following disaster.

➤ **Disinfection of water sources-**

Poor hygiene is the major cause of food-borne disease in disaster situation. Kitchen sanitation is of utmost importance. A survey of all public water supplies should be made. The first priority of ensuring water quality is microbial containment.

কী করবেন

ভূমিকম্প

- ভূমিকম্পের আভাষ পাওয়া
মাত্রই ঘর থেকে বেরিয়ে আসুন।
- ঘর থেকে বেরোনোর সময় না পেলে ঘরের কোনায় কোনো মজবুত
পিলারের কাছে দাঁড়ান।
- খোলা মাঠে বা ফাঁকা জায়গায় গিয়ে দাঁড়াবেন।
- টিভি, ফ্রীজ, গ্যাস বন্ধ করে রাখুন। কেবলমাত্র ব্যাটারীচালিত রেডিও
ব্যবহার করুন।
- বাড়ি করার সময় ভূ-কম্প রোধক প্রযুক্তি ব্যবহার করুন।

কী করবেন না

- কাঁচের দরজা, জানালা, আলমারী থেকে দূরে থাকুন।
- বাড়ি থেকে বেড়িয়ে এসে কোনো উচু ভাঙা বাড়ি বা ইলেকট্রিক পোলের
সামনে দাঁড়াবেন না।
- ভূমিকম্প চলাকালীন চলন্ত গাড়িতে থাকবেন না।
- ভূমিকম্পের সময়ে সিঁড়িতে বা ঝুলবারান্দায় থাকবেন না।
- ভাঙা জিনিষপত্র বাইরে খালি জায়গায় ছুঁড়ে ফেলবেন না।

Disaster Management
& Civil Defence

কী করবেন

বন্যা

- সুরক্ষিত উঁচু জায়গায় আশ্রয় নিন।
- ব্যাটারীচালিত রেডিও ব্যবহার করুন।
- দুর্যোগবর্তা শুনলে শুকনো খাবার, জল, জ্বালানীর আয়োজন করে নিরাপদ জায়গায় সরিয়ে রাখুন।
- ওষুধপত্র, জল পরিশোধনকারী ট্যাবলেট, টর্চ, দেশলাই, হ্যারিকেন মূল্যবান কাগজপত্র প্লাস্টিকে মুড়ে হাতের কাছে রাখুন।

কী করবেন না

- বাসি খাবার খাবেন না।
- কুয়ো বা পুকুরের জল না ফুটিয়ে খাবেন না।
- গুজবে কান দেবেন না ও গুজব ছড়াবেন না।
- কোনো ধরনের বৈদ্যুতিক যন্ত্রপাতি ব্যবহার করবেন না।
- জানালা দরজা খোলা রাখবেন না।

বজ্রপাতের ক্ষেত্রে নিরাপত্তা

বাইরে

ঘরের ভিতর আশ্রয় নিতে হবে।
সম্ভব হলে পাকা বাড়ির ভিতরে আশ্রয় নিন।

খোলা জায়গায় অথবা মাঠে কাজ করার
সময় আশ্রয়ের জায়গা না থাকলে যতটা
সম্ভব নীচু হয়ে গুটিসুটি মেরে বসে পড়ুন,
তবে মাটিতে শুয়ে পড়বেন না।

যদি যানবাহনের মধ্যে থাকেন তাহলে
জানালা বন্ধ রাখতে হবে।

খোলা জায়গায় কোনও বড় গাছের নীচে
আশ্রয় নেওয়া যাবে না। গাছ থেকে
কমপক্ষে ১৩ ফুট দূরে থাকতে হবে।

ঝুলে থাকা তার অথবা ছেঁড়া বৈদ্যুতিক
তার থেকে দূরে থাকুন।

জলাশয় থেকে দূরে থাকতে হবে।

ওভারহেড বৈদ্যুতিক তার এবং খুঁটি
থেকে নিরাপদ দূরত্বে থাকুন।

মাছ ধরা বন্ধ রাখতে হবে।

ঘরের ভিতর

বৈদ্যুতিক যন্ত্রপাতির প্লাগগুলি লাইন থেকে
বিচ্ছিন্ন রাখতে হবে।

বাড়িতে যথাযথ বজ্র নিরোধকের
ব্যবস্থা করুন।

ছাদ, জানালা এবং বারান্দা থেকে
দূরে থাকুন।

বৈদ্যুতিক এবং ইলেকট্রনিক্স যন্ত্র ব্যবহার
থেকে বিরত থাকুন।

কোনও ব্যক্তি বজ্রাহত হলে কী করবেন?

- দ্রুত চিকিৎসকের সাহায্য নিন এবং অ্যাম্বুলেন্স-এ খবর দিন।
- বজ্রাহত হওয়া ব্যক্তিকে স্পর্শ করা নিরাপদ। কেউ বজ্রাহত হলে দ্রুত প্রাথমিক চিকিৎসা শুরু করান।
- স্যাঁতস্যাঁতে ঠান্ডা আবহাওয়ায় আহত ব্যক্তিকে সরাসরি রাস্তায়/মাটিতে না শুইয়ে ব্যক্তি ও মাটির মাঝে একটি সুরক্ষার স্তর রাখুন, এতে হাইপো থারমিয়া-র (শরীরের তাপমাত্রা অত্যধিক কমে যাওয়া) সম্ভাবনা কমানো যায়।
- শ্বাস-প্রশ্বাস বন্ধ হয়ে গেলে মুখে মুখ দিয়ে বাতাস ভরে শ্বাস ফিরিয়ে আনার চেষ্টা করুন।
- লক্ষ্য করুন কোনও বজ্রাহত ব্যক্তির আঘাত/পুড়ে যাওয়া/শারীরিক ক্ষতি/শ্রবণক্ষমতা হ্রাস/দৃষ্টিশক্তি হ্রাস পাওয়ার মতো সমস্যা হচ্ছে কিনা, হলে দ্রুত প্রাথমিক চিকিৎসা দিন।
