

Disaster Management Plan 2017

Disaster Management Plan
Office of the District Magistrate
Kalimpong
2017

FOREWORD

This hand book on District Disaster Management Plan (DDMP) of Kalimpong Disaster Management section for information, guidance and management in the event of any disaster for the year, 2017 has been prepared. It contains the core concept of Disaster Management comprising preparedness, prevention, early warning system, Disaster Impact, quick response, mitigation, recovery and relief.

The booklet comprises a discussion on the Hazard ,Vulnerability, Capacity and Risk Assessment, Institutional Arrangement for Disaster Management, Prevention and Mitigation Measures, Preparedness Measures, Capacity Building and Training Measures, Response and Relief Measures, Reconstruction, Rehabilitation and Recovery Measures, Financial Resources for implementation of DDMP, Procedure and Methodology for Monitoring, Evaluation, Updating and Maintenance of DDMP, Coordination Mechanism for Implementation of DDMP and Standard Operating Procedure and Check list, etc. including vulnerability assessment of the weak areas, of the District. The shelter point of the Kalimpong Municipality area and three blocks have been provided. The past history of the land slide under this District has been highlighted. The basic reasons of land slide in hill areas also have been added in this booklet. The action plans of the respective block and other line departments have been included in this booklet too. I extend my sincere thanks to Shri Nirmalaya Gharami W.B.C.S (Exe) Sub Divisional Officer, Kalimpong Sadar and Shri Abul Ala Mabud Ansar W.B.C.S(Exe) O/C DM Section and Dr. R.P. Sharma Engineer of this Office who has prepared all technical portion of the booklet, along with the officer and staff of the Disaster Management Section of this office, without whose help these booklet would not have been completed in due time.

**Dr. Vishwanath I.A.S.
District Magistrate,
Kalimpong**

INTRODUCTION

DISASTER MANAGEMENT PLAN

Disaster: - A serious disruption of the functioning of society, causing widespread human, material or environmental losses which exceed the ability of the affected society to cope in short run using its own resources.

In Kalimpong hill areas two types of natural Disaster occurs frequently i.e. 1. Earth quake 2.Landslides.

Earthquake: - Entire Kalimpong Hill areas fall under high damage risk Zone IV.

Preparedness for Earthquake.

PRE DISASTER:-

1. Ensure that the proper structural design and engineering practices as per the norms laid down by the BIS code are followed while allowing construction of a house.
2. Sensitize the people to evaluate structural soundness of building strengthening /retrofitting, etc.
3. Common people should be made aware of the importance of safe shelter in the areas vulnerable to earthquake.

DURING DISASTER:-

1. Rescue and Evacuate people to the earmarked safety shelters immediately.
2. Arrange a patrolling group who will take care of the property left by the people.
3. Arrange for prompt First Aid and medical care (ton injure).
4. Movement of all vehicles be stopped to the site or diverted to other route.
5. Enough food stock, drinking water and common medicine may arrange.
6. To announce the latest bulletin to the community at periodic interval.

POST DISASTER:-

- 1. Rescue and evacuation process to be initiated immediately for stranded persons.**
- 2. Be prepared for aftershocks. Strong aftershock can cause havoc damage to the building and weak structure may collapse.**
- 3. To Remove debris and to restore roads and power supply.**
- 4. To Provide relief and safe drinking water to the affected population.**
- 5. To Check outbreak of any epidemics.**
- 6. Mobile Health units to be mobilized.**
- 7. Help from voluntary organizations may be welcomed.**
- 8. Damaged and unsafe structures should be demolished.**
- 9. Damage assessment to be carried out.**
- 10. To Arrange for speedy disposal of dead bodies.**
- 11. Trauma Counselling group to be setup, if required.**
- 12. Appropriate rehabilitation measures to be sorted out and taken by way of :-**
 - a. Temporary Shelter**
 - b. Physical Rehabilitation.**
 - c. Social Rehabilitation.**
 - d. Psychological Rehabilitation.**
 - e. Economic Rehabilitation.**

II LAND SLIDES:-

A land slide is an event in which surface mass of slope forming materials of earth move down ward and out ward at basal discontinuity when gravitational force overcomes the sheer resistance of the mass. Such movement includes creeps, flows, falls, topples and slides etc. The size of slides varies enormously from 1cum to 10000 cum and displacement measures in meters to tens of kilometers.

Landslides and associated phenomena are the most pervasive of natural problems which have been accelerated by illogical human intervention vis-a- vis environmental degradation which undermine the socio-economic development of the region. Landslide was a minor physical phenomenon in Kalimpong District a hundred and fifty years ago which has become rampant now-a-days leading to great loss of life and heavy damage to land and property. At present, therefore suggestion of remedial measures and their active implementation is of vital concern for this extremely sensitive region, today, in fact, landslide is the most pervasive of natural hazard that undermine the economic and cultural of hill areas. The diversity in slope components, geometry, site and situation, micro regional susceptibility to degradation process, micro geology, micro climate, depth of soil, its physical and chemical properties, vegetation with differential canopy and root system, unplanned growth of settlement, road and water systems etc., have led to recurring landslides.

LANDSLIDE HAZARD MITIGATIVE MEASURES:-

1. Based on the criteria, landslide hazard zonation map should be prepared for all the vulnerable areas.
2. Construction activities like houses, roads, etc should be avoided over old, dormant and suspetiable slide as well as on steep slopes.
3. In hilly terrain number of loops of road over a steep slope should be reduced.
4. Urban development in mountain and hilly terrain should be monitored keep in mind slope stability factors as building activities impose unfavorable changes in the slope surface, below and above.

- 5. Very minor slope failure phenomenon should not be neglected.**
- 6. Unstable slope and area above such slope should be avoided for any agricultural practice which requires sufficient quantity of water.**
- 7. Deforestation should be totally banned over the vulnerable slope. Plantation activities with indigenous species should be undertaken on bare slope surface.**
- 8. Initial slope failure should be brought to the notice of the concerned authority.**
- 9. The toe of any slide mass shall not be disturbed and any type of water seepage in to the slide mass must be stopped. The Crescent shaped pucca drain should be constructed on the top and slides of the slide mass.**
- 10. To adopt on structural measures like construction of breast wall, sausage wall, rock bolting, etc should be encourage stabilize the slide mass.**
- 11. Always remain alert about landslide during rainy season and during earthquake in the area.**
- 12. If any tree is cut its trunk and root should be removed and the void thus created should be filled up with local soil by tamping.**
- 13. In case of any landslide movement debris should be cleared speedily to rescue any person trapped inside and to restore communication.**

In Kalimpong District Chuba, Tashiding, Sindebong khasmahal, Dalapchan area have slip zone and Kataray, Dalep, Pedong are very sensitive landslide prone areas. Therefore, emphasis should be given by all line departments to these areas in case of any emergency.

I.BLOCK PROFILE :

- a) Demographic Detail: The population of Kalimpong-I Dev. Block is 74,664 according to the 2011 census (Provisional).

Ethnic groups: Nepali/Gurkha, Lepcha, Sherpa, Bhutia, and small percentage of Bihari , Marwari and other communities.

Languages spoken: Nepali, Lepcha , Bhutia, Sherpa, English, Hindi

Major religions followed: Hinduism, Buddhism, Christianity, Islam.

- b) Household detail: Total no. of households: 15,302 (Provisional, as per 2011 Census)
c) Population detail:

	Total	Male	Female
Population	74,664	37,690	36,974
Scheduled cast population	5737	2857	2880
Scheduled tribe population	26000	13047	12953
0-6 population	7088	3639	3449

II)Topographical detail:-

a) Area: 321.16 Sq. km.

b) Land holding/ cropping pattern:

Big Farmers	Marginal Farmers	Small Farmers	Agricultural Labour
200 Nos.	3334 Nos.	1236 Nos.	4546 Nos.

Type of crop- Rice, Wheat , Maize

c) Livelihood pattern:

Cultivation	12461
Agricultural labour	4546
Non-agricultural labour	19501
Petty business	958
Others	9303

d) Literacy rate:-

	Total	Male	Female
Literacy rate	55301	29669	25632

e) Drinking Water Sources:- i) Neora Valley Project

ii) PHE, Water Works

iii) Other local sources

f) Irrigation facilities and sources:-

g) Irrigation projects-

h) Minor irrigation Project :-

i) Non-irrigation rainfall land:

j) Infrastructure:

k) Communication facilities: All the Gram Panchayats are approachable through

i) PWD roads

ii) NREGA roads and footpaths

l) Financial Institutions:

III. Vulnerability Analysis:

A) HISTORY OF DISASTER:

Kalimpong District, comprising of vast mountain terrain is vulnerable to landslide and earthquake being situated at the fault line of Eurasian and Gondwana plates. It falls in Zone IV (High Risk Zone) of Earthquake vulnerability map. Seismologists have predicted the earth quake of major magnitude may occur at any moment. Since time immemorial the inhabitants have known to feel the tremor of minor magnitude occasionally. Compounded by the heavy rainfall and Geomorphologic habits the landslides of major and minor scale keep occurring every year during monsoon.

On 12th July, 1996 a major landslides had occurred at Geshok Busty, a small hamlet about 80 Kms. from Kalimpong town. Twenty-five people had perished under debris on that fateful day. Apart from that, major landslides have been occurring in Kalimpong-I Block area every year resulting in the loss of public property, Government assets, Agricultural damages, Livestock, etc. Again in the year 2006, a major landslide or so to say the sinking of the vast area resulted the exodus of the whole village population at Gairigaon, Sindebong. This was due to accumulation of mud water created out of faulty agricultural pattern of the rice cultivation as the Geologist of the G.S.I later assumed after the preliminary survey. In the year 2009, the area was struck by Cyclon 'Aila' which caused a huge damage in the region. 64 nos. of houses were reported damaged along with other infrastructure. On 18.09. 2011, when a major earthquake of Richter scale of 6.9 hit the entire northern region of West Bengal, Sikkim and Nepal, large area under this Block was also hugely affected. Around three thousand five hundred houses were reported damaged. Other than that, a large number of educational institutions, religious structures and roads were damaged. One person was reported dead and several injured. Estimated loss was around four thousand one hundred and forty five lakhs. Before last year on the night of 30th June 2015, a very heavy rainfall triggered a large landslide in different Gram Panchayats of Kalimpong-I Dev. Block. But the worst affected area was 8th Mile , Nursery Gaon under Kalimpong Gram Panchayt. Three family members out of four were swept away by the landslide. But only two of the three dead bodies could be found.

So, it may be concluded that area under the Kalimpong –I Block is very much vulnerable to landslide and earthquake.

B. SEASONALITY OF HAZARD:

The main season of occurrence of the landslide is during the monsoon when the South west monsoon ascends on the hills second week of June and lasts upto the first week of October. During this period the average rainfall recorded is between 350 m.m. to 600 m.m. every month in average at Kalimpong.

C. Inhabittance : (2011 Census)

	TOTAL	15,302

D. Distance of village from Risk Points

IV. Risk Analysis:

a. Risk and Vulnerable group: By analyzing Vulnerability Assessment Framework it is concluded that landslide and earthquake is the major concern for the hills effecting all Economic, Social strata of the people in general. The people living in the sinking areas of Bhalukhop, Nimbong, Samthar, Pabringtar, Kalimpong, Sindepong, are more vulnerable in comparison to others.

b. Risk Prone Infrastructure and assets: A number of houses of the area has been damaged by the Earthquake of 18.09.11, especially the old houses built of mud and stone. These houses are very much risk prone.

V. Mitigation Strategy:

a. **Short term:** Schemes like House building Grant Scheme, Economic Rehabilitation Grant Scheme, Ex-Gratia Payment in case of death, and the relief items provided by the Government like Special G.R, Clothing, Tarpaulins, and Utensils etc. are provided to the victims to reduce the effect of the Disaster.

b. Long term:

i) Awareness generation among the mass through Disaster Risk Management Programme , National School Safety Programme and Familiarisation exercise (FAMEX)

- ii) Strengthening of jhora protection wall by utilizing modern technology through NREGA schemes.
- ii) Drainage Improvements
- iii) Construction of community cum Shelter buildings at proper places.
- iv) Improvement of Communication System.

VI. Response Plan:

The control room for relief and rescue will be Kalimpong-I Head Quarter. The better network control room at each G.P. will be open and manned 24 hours of the day. All staffs of Block H.Q are assigned with the responsibility of manning Control Room and Relief duty. Likewise all G.P. staffs are also assigned with specific duty charts for Relief duty.

Civil Defense Volunteers are available in almost all Gram Panchayat of the Block who will act accordingly during any disaster. The displaced families are sheltered in the temporary rescue shelters. Health care and Primary aid is provided by the Health and Family Welfare Department. At the site of incident Relief Control Room, Health care Control Room is setup for monitoring the operation.

The separate Cell is setup for search/ evacuation / Rescue purpose with the help of volunteers.

Separate cell is setup for Carcas and Dead bodies disposal.

All these operations will be supervised by the Block Development Officer with the subordinates.

All these operations will be closely monitored and will be evaluated for better preparedness to meet the disaster with the Knowledge of better prevention and mitigation.

DISASTER MANAGEMENT PLAN 2017-18 UNDER KALIMPONG II DEV. BLOCK, ALGARAH

I. Block Profile :

a. Demographic detail

Birth rate	Death	Male	Female	Total	Still birth
1.41%	0.28%	400	350	750	Nil

b. Household detail

Normal Household	Institutional Household	Total
12974	2	12976

c. Population detail(as per census 2011) :

Male	Female	Total
33657	32181	65838

	Male	Female
S.C.	1534	1657
S.T.	13379	12715
OBC	11917	11340

II. Topographical Detail :

A	Area	71401 acre
B	Land Holding/Cropping Pattern	Data unavailable
C	Livelihood Pattern	APL – Unit 53815 BPL-29500
D	Literacy Rate	Male 69%, Female 55%, Total 62%(as per census 2001)
E	Drinking Water Sources	P.H.E. and other local Jhora based DWS especially DWS under NREGA
F	Irrigation Facilities and Sources	Minor irrigation carried on by Irrigation Dept. and under MGNREGA
G	Minor Irrigation Project	<i>Separate sheet enclosed</i>
H	Non Irrigated/Rain-fed Land	Data unavailable
I	Infrastructure	Roads constructed by PWD,PMGSY,MGNREGA
J	Communication Facilities	BSNL landline, Mobile phone coverage in almost whole Block
K	Financial Institutions	1) C. B. I, Algarah, 2)C. B. I., Lava, 3)DDCCB,Pedong,4) U B K G B, Pedong, 5)S.B.I.,Pedong, 6)U B K G B, Gitdabling, 7)GPSKUS,Kagay, 8)GPSKUS,Lingsay, 9)GPSKUS,Paiyong
L	Availability of Highland	N.A
M	Resource Inventory	Maintained at the Block level as well as G. P. level(<i>detail at sl.no. C</i>)
N	Identified Safe Shelter Places	<i>List enclosed separately .</i>
O	Storing/Godown Facilities	1 no. godown at Block level
P	Industries	Nil

Y	River Carrying Capacity	N.A.

III. **Vulnerability Analysis :**

a. History of Disaster

25th May, 2009 – Super cyclone “Aila” struck the whole block which destroyed 100 nos. of houses completely and damaged 313 nos. of houses partially. It also caused damages to crops and public property such as School, Culverts, Bridge, Road, D.W.S.S. etc.

20th August, 2009 – Due to incessant rainfall landslide occurred at Lava taking the life of one infant.

16th June, 2011 – Landslide at Gitdabbling and Lolay destroyed 21 nos. of houses.

18th September, 2011 – Earthquake measuring 6.8 struck the whole block resulting in wide scale damage to both public and private property. 887 nos. of houses were fully destroyed and 2719 nos. partially damaged. A number of government offices, schools, religious institutions, roads, protection walls bore the brunt of the tremor. 1 person lost life.

30th June, 2015- Heavy to very heavy rainfall occurred taking the life of 6 persons, 01 from Paiyong GP, 01 from Lava Gitbeong GP and 04 from Lingsekha GP the bodies of whom 04 casualties of said GP were not found till date. The said calamity destroyed 594 houses fully, 123 houses severely and 151 nos. houses partially.

b. Seasonality of Hazard

1) April & May – Hailstorm, Cyclonic Wind and gale wind,

2) June to August – Landslide,

3) November to March – Accidental Fire.

c. Inhabitation

100% people live on slopes, 80% reside on slopes with steep gradient. A majority of Lingsay, Lingsekha, Kagay and Gitdabbling G.Ps have no access to jeepable road.

d. Distance of Village from Risk Points:

All vulnerable villages as shown with safe shelter points are in close proximity to Risk Points i.e. within 1 km radius.

IV. **Risk Analysis :**

a. Risk and Vulnerable Group :

Normally majority of BPL families are the vulnerable groups. They live on top of unstable slopes, near untrained jhoras or any where land is available without regard for safety. Major risks are from landslide which is a yearly hazard and earthquake. However, cultivation is largely affected due to hailstorm during the period March April every year.

b. Risk Prone Infrastructures and assets :

Sl.No.	Name of Risk Prone building/road/bridge	Location	Classification
1	Kasyone G.P.Office	Phurun	RCC building
2	Gitdabbling High School	U/Beyong	RCC building
3	Kataray bridge	Pedong GP	RCC footbridge
4	Reshi khola bridge	Kagay GP	Wooden suspension bridge
5	Prasanti Nagar bridge	Pedong GP	RCC jeepable bridge
6	Gorkhay Pul	Lingsekha GP	Suspension bridge
7	Rangbang khola bridge	Lingsay GP	Suspension bridge
8	Old Goskhan line pul	Pedong GP	Footbridge
9	Changay Pul	Kagay GP	Wooden bridge
10	Ghatay Khola pul	U/Menchu,Sakyong GP	Wooden bridge
11	Dhobi KHOLA PUL	Kashyone GP	Wooden jeepable bridge

V. **Mitigation Strategy** :

a. **Structural Mitigation** :

Construction of protection walls, strengthening of jhoras, training new jhoras and cleaning of sewage system before onset of monsoon should be given top priority.

b. **Non Structural Mitigation** :

Presently disaster awareness of all stake holders is going on under Disaster Risk Management Programme and National School Safety Programme. Formation of Gram Panchayat Disaster Management Committee and Gram Sansad level Disaster Management Committees is also going on. School students and teachers are being made aware about different types of hazards including landslide, earthquake, fire, etc. Community based disaster preparedness, mock drill and development of a comprehensive mechanism to tackle emergency should be carried on. Strict building plans including earthquake resistant building plans should be strictly adhered to.

VI. **Response Plan** :

a. Flood/Cyclone :

Not applicable except for Cyclonic Wind. The only response plan is to stay in a safe place till the wind subsides.

b. Earthquake :

- i) Separate Quick Response Teams of officials and MGNREGA labourers have been formed at each G.P.
- ii) Shelter points have been identified and informed to villagers subject to inspection in case of tremor.
- iii) Search and Rescue aids such as shovel,spade,crow bar,helmet,etc stocked at different Gram Panchayats. Requirement of slab-cutter,gas cutter,etc.has been forwarded to higher authority.
- iv) Tarpaulines and warm blankets,etc. have been stocked at different GPs.
- v) Do's and Don'ts regarding earthquake have been circulated to GPs.

c. Landslide :

- i) Separate Quick Response Teams of officials and NREGA labourers have been formed at each G.P.
- ii) Shelter points have been identified and informed to villagers.
- iii) Search and Rescue aids such as shovel,spade,crow bar,helmet,etc stocked at different Gram Panchayats. Requirement of slab-cutter,gas cutter,etc.has been forwarded to higher authority.
- iv) Tarpaulines and warm blankets,etc. have been stocked at different GPs.
- v) Do's and Don'ts regarding landslides have been circulated to GPs.
- vi) Many of the risk prone jhoras have been trained and strengthened under different government schemes including MGNREGA.
- vii) Efforts have also been made to relocate people from vulnerable areas to safer places.

d. Fire

- i) Quick Response Teams have been formed at each G.P.
- ii) The nearest Fire Station (PH.No.03552255450) is located near Rockville Academy, Kalimpong which is approx.18km away from Block Hq.
- iii) Fire Station nos. circulated to Gram Panchayats.
- iv) Requirement of Fire Extinguishers of 'A' and 'B' type to be requisitioned for schools and government offices.

e. Draught : Not applicable.

f. Accidents : Liaison maintained with police out-post at Algarah, Ramphu, Pedong and BMOH, Pedong.

B. Database of important persons and their contact numbers at Block level & GP Level

Separate sheets attached

C. Inventory of Relief Equipments :

- 1)Fork – 10 nos,
- 2) Spade-10 nos,
- 3) Shovel-10 nos,

- 4) Sledge Hammer (10 kg)-10 nos,
- 5) Sledge hammer (5 kg)-10 nos,
- 6) Crow bar-10 nos,
- 7) Reflector Jacket-10 nos,
- 8) Helmet (Fiber)-10 nos,
- 9) Generator (Portable)-1nos,
- 10) Motorised Chain-saw-1 nos,
- 11) Stretcher-1 nos,
- 12) Gloves-3 pairs,
- 13) Boots-3 pairs,
- 14) Ropes with bag including keramantle rope-4 nos,
- 15) Halogen Flash Light/Search Light-1 nos,
- 16) Ladder-1nos,
- 17) Dust Mask-50 nos,
- 18) Ear Plug-17nos,
- 19) Lock Cutter-1nos,
- 20) Drill Machine (Electric Driven) Model Hitachi VTP18-2 nos,
- 21) Safety Goggles-2 nos,
- 22) Safety vest-6 nos,
- 23) Life Jacket-6 nos.

List of Minor Irrigation Project /Protection Wall undertaken by MGNREGA of

Kalimpong-II Development Block, Algarah.

Sl. No.	Name of Gram Panchayat	Name of the Project
01	Lingsay	(1).Construction of Protection Wall at Sanskrit Patsala. (2).Protection Wall at Manorath Jhora. (3).Protection Wall at High School Area.

02	Sakyong	(1). Construction of protection work near H.B.Rai House –FP/77475 (2).Construction of protection work at Chandra Jhora at TendrabongFP/7499. (3).Construction of protection work below Nakri House-FP/7447
03	Lingsekha	(1).Construction of Irrigation Canal from R.K. Jhora to Lower Chuba. (2).Construction of Protection work at Dhokray Jhora.
04	Kagay	(1). Construction of protection work at Bich Pabak Primary School-FP/2246. (2).Construction of protection work and irrigation canal from Paireni Jhora to Burathoki Gaon-K/4445. (3.) Construction of protection work at Bewaka Sisu Mandir-OP/2245.
05	Sangsay	(1).Construction of protection work at Anupam Jhora at (2).Construction of Drain at Sarkey Jhora to upper Munsong-FP/5405. (3).Construction of protection work at Bangay Bheer at Golay Gaon-FP/5098.
06	Pedong	(1).Construction of Protection Wall at Dewsa Jhora. (2).Construction of Wall and Drain at Prem Jhora. (3).Construction of Wall at Satya Narayan Mandir
07	Dalapchand	(1).Construction Irrigation canal from PHE Line to PWD Jhora (2).Construction of Protection Work at Gumba Jhora
08	Kashyone	(1).Construction of Irrigation canal from Pem Bdr. Tamang Jhora to Bhalu Marg. (2).Construction of protection work near Ramdas Tamang House. (3).Construction of protection work at Tamang Jhora.
09	Paiyong	(1).Construction of protection wall and Drain at G.P. Office at East Lower Paiyong. (2).Construction of protection work at Pitlay Jhora. (3).Construction of protection work at Bhatray Jhora.
10	Gitdabling	(1).Construction of protection work at MGNREGA Road in Tugong. (2).Construction of protection work at Gairi Jhora. (3).Construction of Drain at MGNREGA Road from Line Tar to W Golai.
11.	Lava-Gitbeong	1. Construction of protection work and Drain at Check Dam Jhora. 2. Construction of Drainage system and protection work at Triveni Toll.

GORUBATHAN DEVELOPMENT BLOCK

INTRODUCTION

AIMS

The aim of preparing the Gram Panchayat-wise Disaster Management Plan is to be prepared to combat both natural and manmade calamities at the Block level. The idea is to be able to tackle disaster situation effectively with limited resources that will be at the disposal of the Block Development Officer and thereby minimizing the casualties or hardships that people may have to face. One constraint during emergency situation is time. Preparedness of different govt. and non govt. agencies with pre-determined roles and responsibilities will help in minimizing loss of precious time. Moreover, if a list of resource lying with different agencies is prepared and incorporated in the Disaster Management Plan it will be of great help to all concerned. A readily available resource inventory will not only help in cutting disaster response time but it will also help in making optimum and effective use of resources.

OBJECTIVES

- ❖ To preserve life
- ❖ To protect properties both public and private
- ❖ Disaster preparedness
- ❖ Mitigation of disaster
- ❖ Identification of different agencies

HISTORY OF GORUBATHAN

BLOCK AT A GLANCE

LOCATION	Gorubathan Block is situated in 26° 57'21.7"N Latitude and 88°41'49.4" E Longitude.		
ALTITUDE	328 M		
AREA	109644.55 Acres/442.72 Sq.Km.		
	It is bordered by neighbouring country Bhutan in the eastern side, Sikkim Sate in the northern side with dense forests of Rachel range, Kalimpong Block-I & II in the western side and the vast plain area of Jalpaiguri District in the southern side		
POPULATION	The Block has got a total population of 60,663as per 2011 Census.		
POPULATION DENSITY	140/sq.km (360/sq.m)		
FOREST AREA	29169 Hectares.		
AVERAGE RAINFALL	326.6mm in the year 2012-13 & 441.4mm in the year 2013-14		
TEMPERATURE	37° C (Maximum) & 5° C (Minimum)		
AGRICULTURAL AREA	8293 Hectares.		
MAJOR CROPS	Cardamom, Beetle Nuts, Broom Sticks, Paddy, Millet, Ginger, Maize etc.		
TOTAL G.P	11 Nos.		
MAJOR RIVERS	Jaldhaka & Chel		
POLICE STATION	Gorubathan & Jaldhaka		
IMPORTANT BANKS	CBI, Gorubathan, DDCCB, Gorubathan & UBKGB (4 Nos.) POST OFFICES Post Office (2 Nos.), Branch Post Office (7 Nos.)		Sub-
HATS & MARKETS	Sombarey Hat (Estd. 1905) at Gorubathan. Sombaray Hat (Estd. 1949) at Kumai. Local Hats (7 Nos.)		

LEPCHA NAME OF THE PLACES IN GORUBATHAN:-

A foothill hamlet in the south-east corner of Darjeeling District under Kalimpong Sub-Division, Gorubathan is demarcated by river Jaldhaka with neighbouring country Bhutan in the eastern side, Sikkim State in the northern side with dense forest of Rachela Range, Kalimpong Block I&II in the western side and the vast plain areas of Jalpaiguri District in the southern sector. Gorubathan is abounded with all natural gifts like virgin forests, hills, plateaus, streams, floras and faunas etc. In politically Gorubathan is divided into 11 Gram Panchayats. The climate is moderate and it is neither too hot in the summer and nor too cold in the winter season. How the nomenclature 'Gorubathan' was started is still controversial but due to vast grazing land and rearing of huge cattles in the open plain land of this area in earlier time must have started calling the place as Gorubathan (herds of cattle) in Nepali language by the local people. Some say that this place must have been dominated by the Gurus (priests) with their deity and supernatural powers in earlier times and subsequently started calling Gorubathan. Lepchas who are the original people of the Darjeeling Hills claimed that Gorubathan is word derived from Lepcha Language "Gobathoak" which means to confront the enemies from two sides. It is said that Lepchas Last King Pano Gaebo Achyok had built Dalim fort to protect his Kingdom east from Bhutanese and South from Bengal. Another meaning of the Gobathok means Goba represents the name of Gaeboo or thok means to block. Gaeboo Achyok built Dalim Fort to block the enemies. Whatever may be the reason behind the nomenclature, Gorubathan was part and parcel of Bhutanese kingdom from 1871 AD to 1864. In course of extension of territory they captured it from the Last Lepcha King Gaeboo Achyok who had built fort at Dalim and Longsyol in seventeenth century. As per the local fable the Bhutanese brutally killed the Lepcha King and his Queen whose spirit could be seen wandering in the Fort areas till later period. The Bhutanese kingdom had extended their territory in the entire hilly regions upto Kalimpong in the northern sector and upto Buxaduars in the southern sector. Gorubathan was one of their border territories in the western sector for watching the advancing enemies. However a fierce battle took place between the soldiers of British East India Company and Bhutanese armies to capture the Fort of Dalm Gari and ultimately killed the Bhutanese armies and destroyed the Fort with their mighty canons beyond recognition in the year 1865. From the period the dominance of Bhutan in this region was come to end and the British took their strong hold. The British cleared many dense forests of this area and judging the suitable climatic condition started planting tea bushes which had a great market in Europe in those days. They brought cheaper labours like Adhibasis, hard workers from Ranchi and Nepal and engaged them to clear the dense forest. Gradually the communicable roads were made by the British and this place saw the first light of development.

Total population of the Gorubathan is 60663 according to 2011 census .Today habituated by Nepalese, Lepchas, Bhatias, Adivasis, and Bangalese. Gorubathan is becoming the centre of tourism, educational institutions etc. Main income source of the people are crops like tea, nuts, black cardamom, brooms, ginger and other fruits and vegetable. Vast banks of Chel river made Gorubathan naturally more beautiful. Ruins of Dalim fort built by Lepchas Last King Gaeboo Achyok are located six km far from the Gorubathan's main centre. Dalim

Tar is nearby village. Gorubathan Haat is considered a largest haat in Darjeeling District. Beautiful tea gardens, forests, green hills, plains and some historical places could make Gorubathan's popularity. Gorubathan has everything but need to flourish it in the field from where every people can feel the term incredible India.

LEPCHA NAME	MEANING	PRESENT NAME
Gubathok	To confront the enemies from two blocks.	Gorubathan
Da Hlim	Meaning goes in different thing, Dahlim means plateau type of land or once there may be a water pond which now lost its dignity.	Dalim
Ahalay	Ahalay means most hot temperature type of place.	Ahalay
Mual	Mual in Lepcha means place where river had changed her channel, Present Mal Busty where once the channel of Chel River was passes through.	Mal Busty
Fugo	It is the kind of plants found in Mayel Lyang's foothills which is used mostly in the Lepchas holy occasion , present Fagu means where this plants grows in much number.	Fagu
Sukhyam	Means such a land where volume of the rain is always high during monsoon or always rainy land.	Sakam
Nim	Means to sing or in melodious voice, it is said that present Nim village where cowboys use to play a flute in melodious voice.	Nim
Tumlabong	Tumlabong is a kind of tree found in the Darjeeling hills and the Sikkim Himalayas.	Tumlabong
Noam	Noam means place where found salt, Noam situated in foothill of Nim, Pokhreabong and Mangzing hills which said that people use to go down from adjacent hills to take salt from the Noam.	Noam
Pokreangbong		Pokhreabong
Mongzing	Mong zing is one of the plants grows in the Mayel Lyang which looks similar to Mong (millets which traditionally grown by Lepchas to make fermented beer "Chi") but it is non useble grows mostly in the month of October and November found mostly in present Manging	Manging
Pubong	Bamboo growing area	Pubung

Rambvik	Rambvik means God's messenger. It is said that Gaeboo Achyok's mother was once met by Rumvik and Rumvik told her about the birth of stronger son like Gaeboo Achyok at present Rambee.	Rambee
Longshyol	Means place where fort is built by carrying stone from another place. It is said that Longshyol Fort was built by King Gaeboo's army by carrying stone from nearby Git River	Lungsel
Samabeong	Deforesting (it is said that British East India company cleared the forest to plants tea in the region	Samabeong
Rongo	Rongo means place where Rong people became very excited and happy/ it is said that once Gaeboo Achyok's Guerilla army defeated the Bhutanese army who was sent by then Bhutan's King to attacked the Dalim Fort but they had to kneeled before the Lepcha army, after defeating the Bhutanese Lepcha army celebrated a victory festival in place is still called Rongo.	Rongo
Pu theng	The place where kind of bamboos grows in large number	Paten
Godak	Owned land	Godak
Sam Shel	Place from where people can communicate easily	Samsing
Dam Ding	Means to make alert army by making command	Damdim
Todey	Means the top most land	Todey
Tangda	Place near the corner or bottom of the country(Present Tangta was situated in the nort east part of th Gaeboo Achyok's Kingdom).	Tangta
Da Ring	Da ring means reflecting of sunlight by pond water in beautiful mode. It said that Present Doring there was a small lake in the village which water reflects beautifully in the sunny days which could seen from neighboring villages	Doring

10	2015	Landslide	21 (Fully) and 110 (Partially) Houses were damaged	

LIST OF HAZARDS

Landslide- With the exception of the Block Headquarters i.e., Gorubathan-I (which is vulnerable to flood may occur due to uneven increase of water level of Chel River during Monsoon season), the whole part of the Block is vulnerable to landslide. Every year landslide destroys property both private and public worth lakhs of rupees. Roads are cut off causing traffic disruption and public discomfort. Agriculture fields are washed away causing huge losses of agriculture product.

Flash floods- Gorubathan is essentially a hill block. However, there are some parts which are prone to flash flood. Landslide at higher reaches lead to soil erosion and silt deposition lower down the river which makes the river change its course flooding the nearby houses. The magnitude of the floods is good enough to causes people to seek shelter elsewhere during heavy rainfall.

Soil erosion- In spite of department like Social forestry, Soil Conservation, etc. in many places soil erosion runs amok causing landslide and leading to flooding of rivers. Reasons may be illegal felling of trees, unscientific earth work excavation under MGNREGA in rural areas. Plantation of trees and other plants thereby giving maximum green coverage to the already exposed land surface may be one way to fight soil erosion. Further, earth work excavation with proper protection works and clear cut drainage system should be made to avoid undesirable soil erosion.

Earthquake- As we know that a part of Darjeeling, Gorubathan too falls in the seismic zone IV and there was a major quake occurred on 18.09.2011 (epicentre = mangan) which caused massive physiological damage as well as nearly 70 people died in Sikkim. In 2015, there was a massive earthquake occurred in Nepal (Richter scale measure 7.8) causes huge losses of human lives as well as physiological and buildings.

Hailstrom- there has not been any significant case of hailstorm in recent years.

Accidental Fire- Accidental fire occurs and again but due to lack of access to fire servie, the nearest fire station is at Mal Bazaar 20 Kms from the Block office, usually nothing is left to be salvaged. Many of the villages are not accessible by road

RISK ASSESSMENT

Risk is defined as the expected loss due to a potential hazard. Risk is

- Combination of hazard and vulnerability :
- The probability that a physical event will affect a vulnerable people resulting in a disaster ;
- Risk analysis involves determining the probability of the event happening, and the level of vulnerability of the people that may be affected by the event.

Risk Analysis:

The process of risk analysis involves the following:

Hazard mapping: Hazard mapping is the process of establishing geographically the area particularly susceptible to hazard.

Vulnerability Analysis: this involves the process of estimating the vulnerability to potential disaster hazard of specified elements at risk.

Resource assessment: it is needful of the resource a 'Capacities' existing to improve disaster planning resources assessment.

Defining levels of acceptable risk: To gather information through various process of resource assessment to enable a responsible course of action.

Risk and Vulnerable Group: The inhabitants of upper reaches of hilly terrain, as well as foothills constitute a major vulnerable section as they are prone to sudden onslaught of Earthquake periodical landslide during monsoon

The following is a GP wise Risk Assessment

Gram Panchayat-wise Risk Assessment:

Gorubathan-I GP

Disaster	Hazard	Vulnerability	Probability	Historical	Remark
Landslide	NA	NA	NA	NA	NA
Cyclonic wind	Occasional threat	Bhuttabari F.V. with a population of 750	Trees falling on houses	25 trees were uprooted in 2002. Some houses were damaged but no one was hurt	
Flood	The Chel river	Mayalu Busty and parts of Sombaray Bazaar & Mal Busty.	The Chel changing its course	Had changed course in 1998 & in 2015	
Earthquake	Potential threat	The whole Gram Panchayat	House damage and loss a life	2011	

Gorubathan-II GP

Disaster	Hazard	Vulnerability	Probability	Historical	Remark
Landslide	Yearly occurrence	1. Nim Golai	1. Houses might be buried, fear of road to Kalimpong via Lava being cut off.	1. In 2015 the Lava road had been cut off for 72 hrs.	
		2. Badey	2. House damage	2. Reoccurrence of landslide	
		3. Phaperkheti			
Cyclonic wind	Occasional threat	The whole Gram Panchayat	Trees falling on houses and loss of life	2009	
Flood	NA	NA	NA	NA	
Earthquake	Potential threat	The whole Gram Panchayat	House damage	2011	

Ahalay GP

Disaster	Hazard	Vulnerability	Probability	Historical	Remark
Landslide	Occasional threat	Mission Hill area	House damage	No recent history	
Cyclonic wind	Occasional threat	Some parts of the Gram Panchayat	Trees falling on houses and loss of life	No recent history	
Flood	Yearly occurrence	L/Fagu T.E	Flooding of houses on the banks of the Dudhay Khola	In 2006, 37 Nos. of houses were affected when the turbid water of the river entered people's houses	
Earthquake	Potential threat	The whole Gram Panchayat	House damage and loss of life	2011	

Pokhrebong GP

Disaster	Hazard	Vulnerability	Probability	Historical	Remark
Landslide	Yearly Occurrence	Rambhi, Apatey	House damage and there is a fear of being cut off from the rest of the Block.	1. In 1996, 23 Nos. of houses were damaged and 7 cattle were killed 2. In 1996, 20 houses were damaged.	Vulnerability of the G.P is further increased due to a lack of jeepable road.
Cyclonic wind	Occasional threat	Some parts of the G.P	Trees falling on houses	In 2002, 5 Nos. of houses were damaged	
Flood	NA	NA	NA	NA	
Earthquake	Potential threat	The whole GP	House damage and triggering of landslide as well as loss of life	2011	

Nim GP

Disaster	Hazard	Vulnerability	Probability	Historical	Remark
Landslide	Yearly occurrence	1. Phurkee Bhir 2. Pasting	House damage and road to Nim Busty cut off	On 31 st of June and 1 st July of 2015, there was a huge landslide in Nim GP (like Kolbong, Samabeong.). 1 woman died in the landslide.	Active Landslide zone and precautionary measure like relief shelters has to be selected before monsoon.
Cyclonic wind	Occasional threat	The whole G.P	Trees falling on houses	2009	
Flood	NA	NA	NA	NA	
Earthquake	Potential threat	The whole G.P	House damage by triggering landslide	2011	

Dalim GP

Disaster	Hazard	Vulnerability	Probability	Historical	Remark
Landslide	Yearly occurrence	1. L/Raigaon	Houses damage and loss of agricultural land	Active landslide of great magnitude	
Cyclonic wind	Occasional threat	Some parts of G.P	Trees falling on houses	In 2002, 4 Nos. houses were damaged.	
Flood	Yearly occurrence	Garitar surrounded by Mal river, Dheray Khola and Sakham Khola	There is a danger of the whole village being washed away or flooded by the three rivers	In 2004-5, 12 families shifted to safer places permanently.	
Earthquake	Potential threat	The whole G.P	house damage, triggering of landslide and loss of life	2011	

Samsing GP

Disaster	Hazard	Vulnerability	Probability	Historical	Remark
Landslide	Yearly occurrence	Gumti gaon, Tinkataray, Chiplay Dara & Bhalukhop	1. There are already cracks on the slopes and the walls of houses. There is a danger of a huge landslide	1. In 2000, 4 Nos. of houses were damaged	
			2. House damage	2. In 2000, 6 Nos of houses were damaged	
			3. The whole village is situated on an unstable slope with huge cracks. There is a danger of a huge landslide.		
Cyclonic wind	Occasional threat	Some parts of the G.P	house damage and loss of life	2009	
Flood	NA	NA	NA	NA	
Earthquake	Potential threat	The whole G.P	House damage and loss of life	2011	

Kumai GP

Disaster	Hazard	Vulnerability	Probability	Historical	Remark
Landslide	Yearly occurrence	Guduray Gaon	House damage and loss of agricultural land	In 2000, 4 Nos. of houses were damaged	
Cyclonic wind	Occasional threat	The whole G.P	House damage, trees falling on houses and loss of life	In 2002, 27 Nos. of houses were damaged and 3 Nos. of schools were damaged	
Flood	NA	NA	NA	NA	
Earthquake	Potential threat	The whole G.P	House damage and loss of life	2011	

Rongo GP

Disaster	Hazard	Vulnerability	Probability	Historical	Remark
Landslide	Yearly occurrence	Maidan Gaon, Mini Gaon	House damage and loss of life	1. In 2000, 5 Nos. of houses were damaged 2. In 2000, 4 Nos. of houses were damaged	
Cyclonic wind	Occasional threat	Some parts of the G.P	Houses and trees falling on houses	2009	
Flood	NA	NA	NA	NA	
Earthquake	Potential threat	The whole G.P	House damage and loss of life	2011	

Paten-Godak GP

Disaster	Hazard	Vulnerability	Probability	Historical	Remark
Landslide	Yearly occurrence	Gairigaon	House damage and loss of life	In 2000, 5 Nos. of houses were damaged	
Cyclonic wind	Occasional threat	Some parts of the G.P	houses and trees falling on houses	2009	
Flood	NA	NA	NA	NA	
Earthquake	Potential threat	The whole G.P	House damage and loss of life	2011	

Todey Tangta GP

Disaster	Hazard	Vulnerability	Probability	Historical	Remark
Landslide	Yearly occurrence	Gairigaon	House damage, loss of life and wash away the agricultural land	1. In 2000, 5 Nos. of houses were damaged. 2. In 2015, huge land slide washed away agricultural land especially cardamom cultures land.	
Cyclonic wind	Occasional threat	Some parts of the G.P	Houses and trees falling on houses	2009	
Flood	NA	NA	NA	NA	
Earthquake	Potential threat	The whole G.P	House damage and loss of life	2011

District Disaster Management Plan-CMOH

India has been traditionally vulnerable to natural disasters on account of its unique geo-climatic conditions. Floods, droughts, cyclones, earthquakes and landslides have been a recurrent phenomena. About 60% of the landmass is prone to earthquakes of various intensities; over 40 million hectares is prone to floods; about 8% of the total area is prone to cyclones and 68% of the area is susceptible to drought. In the decade 1990-2000, an average of about 4344 people lost their lives and about 30 million people were affected by disasters every year. The loss in terms of private, community and public assets has been astronomical.

Manmade disaster is preventable. But natural disaster itself is not preventable, But the consequence of disaster like damage, mortality and morbidity and/or any kind of public health problems may be prevented or reduced by taking active intervention timely in different phase of disaster like Inter disaster phase, Pre disaster phase, Impact phase, Emergency phase and Re-construction phase etc. For this purpose we are to make Disaster Management Plan in advance in Inter disaster phase and in Pre disaster phase.

Likely health problem in post disaster phase.

Phase	Days	Likely Health Problem
I	0-3 Days	Disposal of dead bodies, Injuries, Drowning, Snakebites.
II	4-10 Days	Cholera, Bacterial dysentery.
III	11 Days-3 Weeks	Pneumonia, Hepatitis, Meningitis, Polio, Measles.
IV	3-6 Weeks	Malaria, Dengue, JE, Plague, Rehabilitation of injuries.
V	>6 Weeks	Psychological Problems, Malnutrition, etc.

Institutional and Policy Framework

i) Medical Teams have been prepared Sector wise consisting of the functionaries like BMOH, Medical Officer, Health Supervisors (M/F), SWO, BSI, SI, BPHN, PHN, Staff Nurse, Health Assistant (M/F) GDA, etc.

In grass root level health functionaries may be assisted by Community Health Guide and Anganwadi Worker and ICDS Supervisor and volunteers from Local Community, Club Members, School teachers, Panchayat Members, G.P. Pradhan, Staff from other departments etc.

ii) All the Health Assistant (M/F), Supervisors should be kept some basic medicine as per the list given by respective BMOHs. Superintendent, Kalimpong SDH must arrange extra space for accommodating injured patient & sufficient medicine stock must be procured from DRS, Darjeeling.

iii) Other health facilities like Dispensary/Hospital of plantations, Railway, Defense, Forests etc. will keep the Medicine and articles as per the list given to them.

PHE will also arrange for provision of safe drinking water to the beneficiaries under their catchment areas.

iv) Records regarding the utilization of Medicine etc. should be maintained in proper register by respective health units.

- v) In respect of Providing Services all the Govt.,NonGovt.Organization should maintain intra sectoral and inter sectoral co- ordination and also with Deptt. of Health to avoid any kind of duplicity and also for better services to affected areas.
- vi) To avoid confusion and panic reaction no one should disclose/expose any kind of information to Media Personnel without consultation with concerned authority by telephonic message or other means.
- vii) Multipurpose health worker should visit field regularly for collecting information and necessary action.
- viii) To overcome the crisis of trained manpower in community including garden, villages some selected person of respective local community may be involved & provided training for working knowledge in different Health unit under Kalimpong Sub-Division.
- ix) Problems of transportation may be solved by civil administration Sub-Divisional Magistrate, Block Development Officer Etc. in extra demand during any kind of emergency.
- x) All kind of leave of staffs during emergency will be cancelled.
- xi) Staff from non-affected area may be shifted to affected area.
- xii) All team leaders should maintain Liason with the Department of Relief, Civil and General Administration, Panchayat etc. for running the activities smoothly during emergency period.
- xiii) From the month of June 2017 to September 2017 all the health units should send the report regarding Public Health problems or weekly basis report on diarrhoea, dysentery, and jaundice should be sent on a daily basis.
- xiv) A holistic and pro-active approach for prevention, mitigation and preparedness will be adopted for disaster management.
- xv) Community involvement and awareness generation, particularly that of the vulnerable segments of population and women has been emphasized as necessary for sustainable disaster risk reduction. This is a critical component of the policy since communities are the first responders to disasters and, therefore, unless they are empowered and made capable of managing disasters,any amount of external support cannot lead to optimal results.
- xvi) There will be close interaction with the corporate sector,non govt organisations and the media in the national efforts for disaster prevention/ vulnerability reduction.
- xvii) Institutional structures/appropriate chain of command will be built upand appropriate training imparted to disaster managers at various levels toensure coordinated and quick response at all levels; and development of inter-State arrangements for sharing of resources during emergencies.
- viii) A culture of planning and preparedness is to be inculcated at all levels or capacity building measures

**Action Plan for Disaster Management of Land-Sliding under Kalimpong Sub-Division
for the year 2017**

- a. Vulnerable location & Shelter points.
- b. Flow Chart about mode of action.

KALIMPONG IRRIGATION DIVISION GTA
PREPAREDENESS PLAN 2017-2018

The following employees shall be ready for establishing with emergency operation central, district control room ,district Magistrate Departmental officers within the District	Mobile No.
Shri Kapil M Dahal E.E (Kpg(i)Div)	7001714123
Shri Dawa Yong Lama S.A.E	9735059008
Shri Abhishek Chettri S.A.E	9635894327
Shri Subash Thapa for Gorubathan	9800177934
Shri Sameer Rai S.A.E for `Jholong	9475961200
The above mentioned staff shall be ready to take control of all the strategic points readily with full knowledge of the District Collector	
5 Nos of officers shall be responsible	
Shri Subash Thapa and Shri Samir Rai A.E of Gorubathan will be ready for reporting of the any breaches in the embankment damage of irrigation Channel either help of help 5. Nos Supervisors under his control	
Shri Dawa Yong Lama SAE shall be responsible for any breaches in the embankment, damage of irrigation channels with the help of 6 Nos of Supervisors under his control	
Plan for providing the following emergency tools all technical assistant in vulnerable areas v.i.z, Ropes ,gunny bags , cement in bags, concrete poles ,jungle knives, cane baskets if the necessary fund is released to the related Deptt before ensuing monsoon	

DISASTAR MANAGEMENT PLAN- 2017

Keeping in view the forth coming monsoon and subsequent disaster in different parts of the road falling under jurisdiction of Kalimpong Engineering Division, the following arrangements have been made from this Department. As this department has no provision for issue of relief materials and other accessories, only restoration of damaged roads and opening of blocked traffic can be done by this Department

- 1 Excavator One(1) no. of departmental excavator of this department can be made available for clearing slips and diversion of road if required. In case of further necessity excavator can be hired from the private party, after getting approval from higher authority of GTA.

- 2 Road Khalasis Considerable number of Road Khalasis has been deputed for the road as shown below. They are always available at the site for clearing of minor blockage of road and clearance of drains during rainy season.

- 3 Major Damages of road In case of major damages and blockage of roads falling under the jurisdiction of this Department, the estimate for restoration work will be prepared and submitted to the higher authority of GTA for approval. In case of emergency situations work can be taken up on work done basis after obtaining verbal approval of the Secretary, Department of Engineering, GTA.

DISASTER MANAGEMENT PLAN, 2017
NEORAKHOLA

Department: Public Health Engineering, Govt. Of west Bengal

Office : Office Of The Executive Engineer, Neorakhola Water Supply and Maintenance Division

Office address : Upper Cart Road, Near Kanpur House, District – Kalimpong, PIN – 734301, Telephone :
03552- 257687, Email : ee_neora@wbphed.gov.in

Area of the work : Operation and maintenance of Neorakhola water supply scheme for bulk supply of drinking water to Army establishments and GTA (for civil population).

Probable cause of disaster : Natural calamities like earthquake, landslide, cloud bursting etc.

Probable effect : Crisis of drinking water in Kalimpong city and Army establishment.

Management plan : Restoration time depends on the magnitude of calamity. It is our aim to restore water supply as quickly as possible. To achieve this we always keep manpower and machinery ready at some pivotal points like Lava and Algara. It may necessary to lay temporary pipeline through private and other department's land to avoid disaster site for which help of district administration may require.

**EXCECUTIVE ENGINEER
DARJEELING DIVISION-II: P.H.ENGINEERING DTE.**

Disaster Management Plan for the year 2017

1. PHE Darjeeling Division II, Kalimpong has the responsibility to deliver approx 8 GLPD water to the inhabitants of Kalimpong Town. In addition to this Division also maintains the 250 mm CISS pipeline having the length of 25 km from Thokchu to Delo Lake. During the monsoon the pipes gets damaged by land slides, falling of trees etc. therefore for immediate restoration estimate has been prepared to the tune of Rs. 2,32,720 (Rupees Two lakh thirty-two thousand seven hundred and twenty) only which includes providing jute yarn, alum, lead wool and bleaching powder. In addition to this man power under Water Works Sub-Division shall be deployed at various points so as to oversee the smooth running of the water distribution system from Thokchu to Deolo Civil Lake and inform the Authority in case of any eventuality. The estimate thus prepaid shall be submitted to the concerned Authority for approval.
2. The Department also looks after the Rural water supply Schemes under Kalimpong Block-I, Kalimpong Block-II and Gorubathan Block III of Kalimpong District, since the formation of the Division in 1981, more than 400 water supply schemes have been completed. During the calamities such as land slides etc. disrupting the daily supply of water. Further also in dry season i.e. prior to monsoon seasons, the damages to pipelines are being caused by forest fire. To mitigate this, an estimate has been prepared to the tune of Rs. 2,34,260.00(Rupees Two lakh thirty-four thousand two hundred and sixty) only which includes supply of polythene pipes of different dia and bleaching powder. In addition to this for proper functioning of these schemes, each block shall be looked after by a Junior Engineer who will be assisted by a work assistant.
3. The contact nos. of the staff members of P.H.E. DD-II, Kalimpong is enclosed herewith so that the concerned persons can be contacted in case of emergency.
4. The total cost for Disaster management Plan for the year 2017 under the P.H.E. DD-II, GTA District Kalimpong comes to Rs. 4,66,980.00 (Rupees Four lakh sixty-six thousand nine hundred and eighty) only.

7. Sewerage system management.
8. Public health services.
9. Health Facilities

CONTACT PERSONS

NAME	DESIGNATION	CONTACT NUMBER
1. Dr. Ankan Simlandi	Superintendent	9647238868(M) 255245 (O), 255415 (R)
2. Mrs. N. Lepcha	Nursing Superintendent	9647839964
3. Mrs. Miki Lamu Sherpa	Dy. Nursing Superintendent	9733118172
4. Mrs. Sudha Thoki (Baraily)	Dy. Nursing Superintendent	9002790959
5. Mr. Mahendra Pariyar	Ward Master	9832548998
6. Mr. Umesh Gurung	Ward Master	9851849286
7. Mr. Prakash Biswakarma	Ambulance Driver	9932685757
8. Mr. Jai Raj B.K.	-----do-----	9832644435
9. Mr. Rabi Pradhan	-----do-----	9851788410
10. Ward Master Office		03552-255363
11. Mr. Ananda Raj Pradhan	Electrician	9832361364

PERSONNEL

1. Hospital Superintendent.....	01
2. Total Number of Medical Officers.....	33(Regular+ Contractual)
• Medical Officer Working in different specialties.....	19-----do-----
• General Duty Medical Officers (GDMO).....	11-----do-----
• Blood Bank Medical Officers.....	01
• Dental Surgeon.....	02-----do-----
• Homeopathy Medical Officer (HMO).....	01
3. Nursing Personnel.....	144
4. Non Medical Technical Personnel.....	26-----do-----
5. Ambulance Driver.....	05-----do-----
6. General Duty Attendant (GDA).....	75-----do-----
7. Sweepers.....	20-----do-----

FACILITIES

- 24 hrs Emergency Unit
- 24 hrs OT/LR Services
- 24 hrs Blood Bank Services
- 24 hrs Emergency X-Ray
- 24 hrs Ambulance Service
- ECG/USG Services
- Clinical Pathology
- H.D.U
- General & Special OPDs
- Dispensary
- 380 functional bed strength
- Gen. Medicine, Gen. Surgery (with burn ward), Gynae-Obstetrics (With PP Unit), Orthopaedics, Paediatrics, Eye, ENT, Dental clinic, LDC (Yoga), Homeopathy, Physiotherapy.
- 24 hrs D.G Support (50kva)
- Ambulance.....03
- Matriyan02

Stretchers cum Trolley.....12

STORES

Store Keepers.....	04
Status of Life saving Drugs.....	Available/ Sufficient
Status of General medicines.....	Sufficient
Status of dressing materials/ Instruments/POP etc for injuries.....	Available
Status of disinfectants.....	Available
Total Numbers of Oxygen cylinders (Type A, B, D) at different units.....	180
Stock Position of Oxygen.....	60-70 cylinders

MAKE SHIFT HOSPITAL

- S.U.M.I Gym Hall/Class rooms/Mill Ground
- Disha centre
- Girls High School Centenary Hall/ School Ground/ Classrooms

POSSIBLE DISASTER PRONE AREAS WITHIN KALIMPONG MUNICIPALITY

AREA	WARD NO.	TYPE OF DISASTER
1. GumbaHatta	VI	Landslide/Fire
