FOREWORD

The district of Hooghly has been identified as the plan district in view to its vulnerability to major natural and man-made disasters such as flood, draught, cyclone, fire etc. The natural disasters especially cyclones and floods affect this district every year. This district experienced flood in the month of July, -August, 2015.

The incessant and heavy rainfall and the consequent copious discharge of water from different barrage/dam hugely disturb the normal life in the catchment areas resulting in huge loss of life and property. The geographic location of the principally-affected areas especially Arambagh Sub-division is such that until and unless some special and long-term measures are taken, they shall continue to be similarly affected by the flood every year. The issue has already been discussed at the higher level and the State Government is learnt to be taking necessary initiative for the long-term solution of the problem.

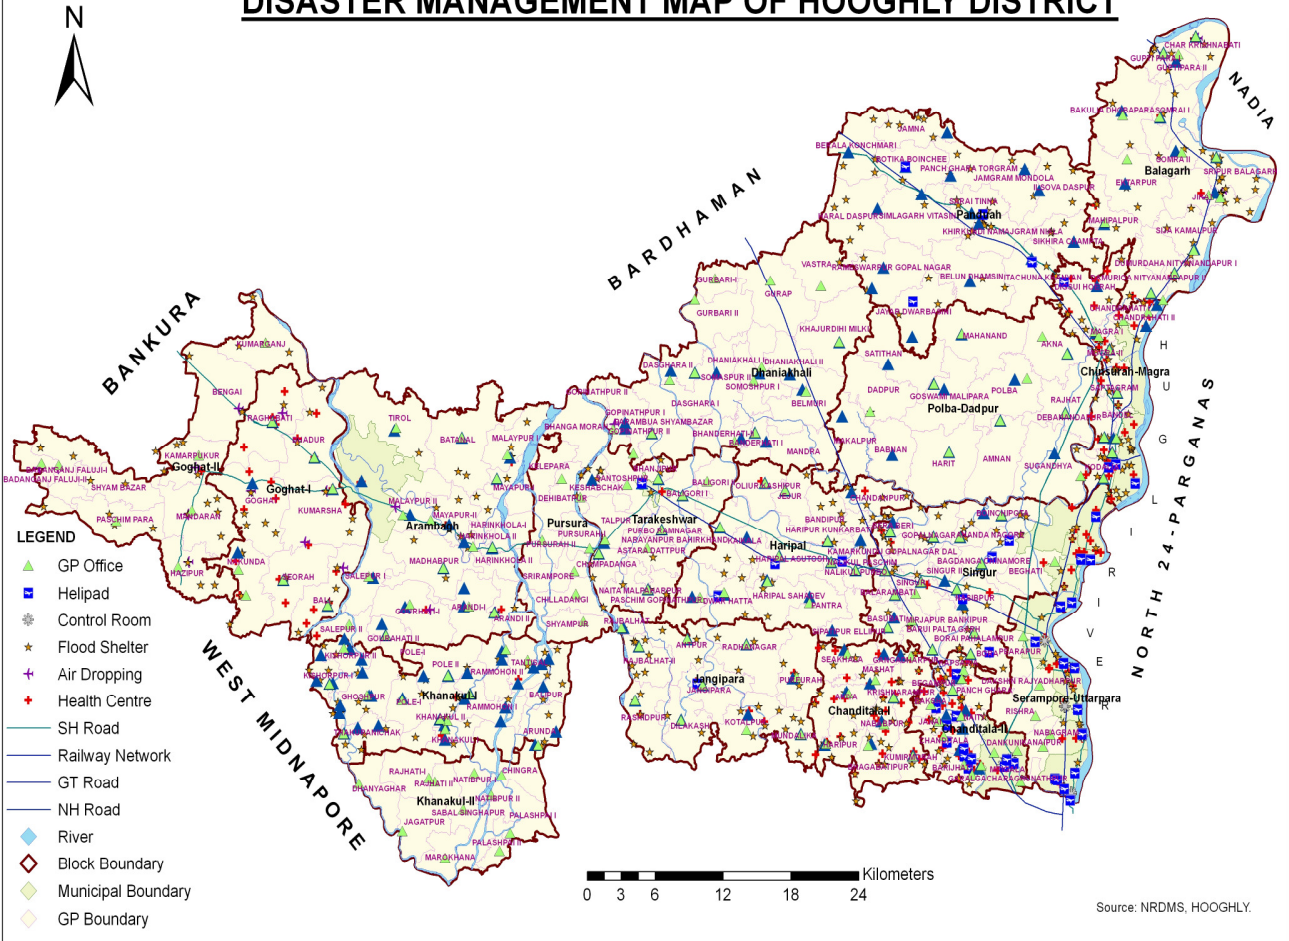

During the period flood, large tracts of land in the district get disconnected from the mainland; Villages get swept away by gushing river. People get dislodged from their homes and suffer indescribable privations and miseries. Normal economic activities including agriculture are negatively impacted in a big way during this period which last almost for about three months. Fortunately we did not face any major flood last year but the deep rooted impact of drawght had played a little negative role in respect of the livelihood measures to the poorest of the poor. Simultaneously the alternative measures had also been taken.

Even though the disaster itself can not be avoided, but the extent and expanse of its impact on life and property can definitely be mitigated through proper management and preparedness. The proposed flood contingency plan is divided into three parts, namely the pre-disaster preventive measures, the action plan during occurrence of the actual disaster and post-disaster relief and restoration measures. Here, a clear-cut action plan involving a well-synergized coordination with all the concerned line departments has always proved useful and, therefore, we have always attached great importance to the same and have accordingly succeeded in realization of our goals. Our again this is to be reviewed in the extended meeting both all line officers from different deptt after Assembly election is over. The disaster management plan of Hooghly District is updated every year and is a useful tool in disaster management. I hope that this document will prove useful, as always, to all those engaged in disaster preparedness, relief and rehabilitation measures.

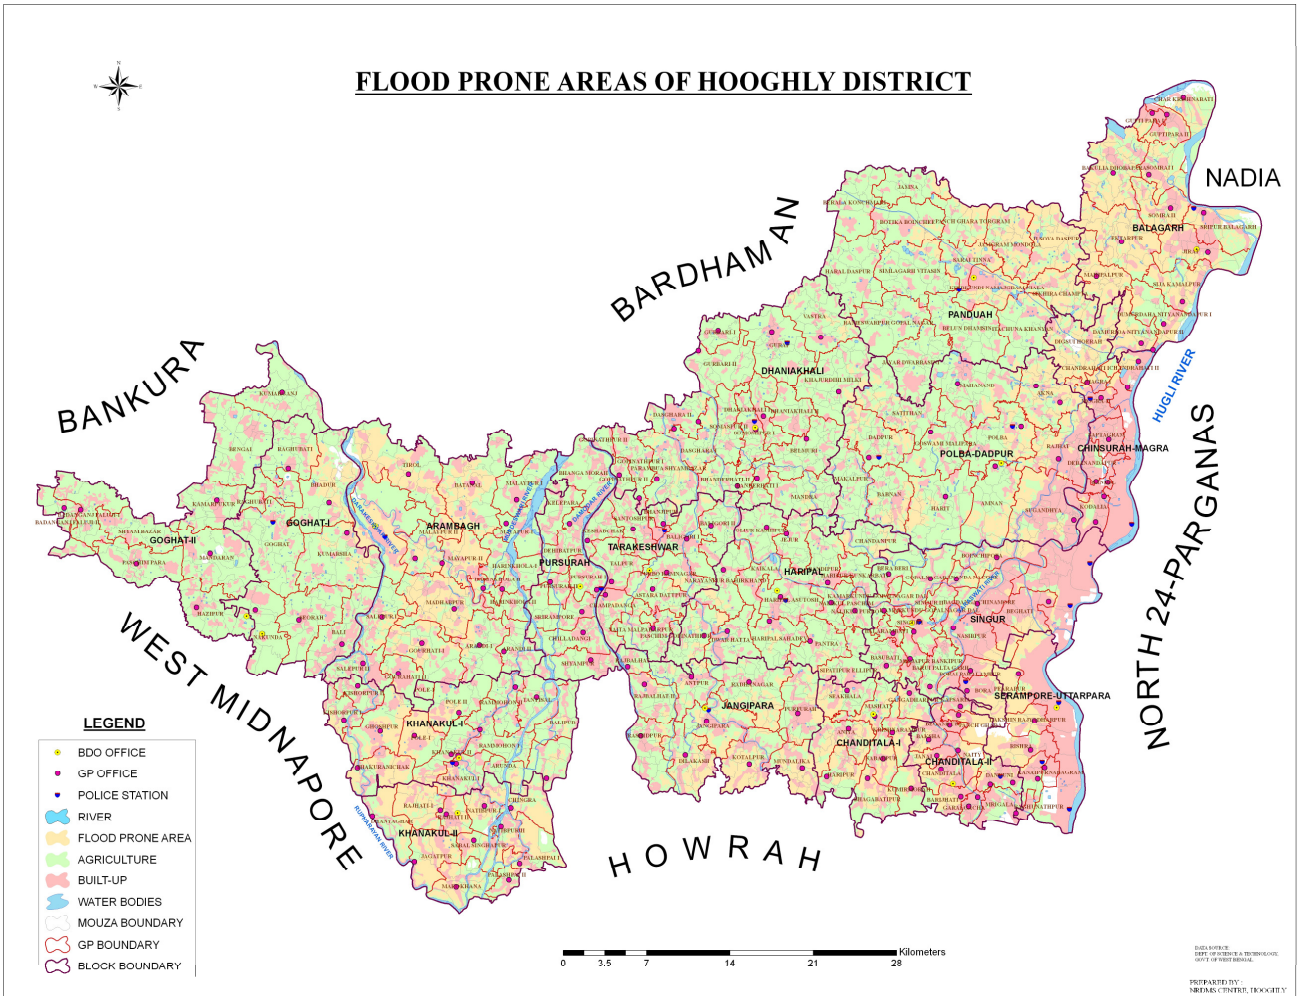

Shri Sanjay Bansal, IAS.
District Magistrate,
Hooghly

Proceedings of the meeting on Review of premonsoon preparedness for mitigation of disaster for the year 2016 held on 07.06.2016 at 4-00 P.M in the New Zilla Parishad Meeting Hall, Chinsurah, Hooghly

The District Magistrate, Hooghly took the chair and initiated discussions.

At the onset of discussions, he welcomed all the attending members for the review meeting on premonsoon Preparedness. The Peoples' representatives, Sub Divisional Officers, the Block Development Officers, the Sub Divisional Disaster Management Officers, the District Level Officers of all Line Departments attended the meeting. On the basis of the Disaster Management Plans-2016 submitted by the Sub Divisional Officers, Block Development Officers, Chairpersons of the Municipalities, Mayor of Chandernagore & Line Departments the District Disaster Management Plan 2016 is being prepared and will be submitted to the Department of Disaster Management, Govt. of West Bengal within 15th June 2016.

The District Magistrate, in brief, informed all the members attending the meeting particularly the District Level Officers of Line Departments in regards to the importance of such meeting. He emphasised that the success of mitigation of any disaster, natural or manmade entirely depends on the preparedness and direct participation in rescue and relief operation by the Line Departments with the help of peoples' representatives. If the Disaster Management Department, the Line Departments and the Peoples' representatives work together, any type of disaster may be combated successfully by reducing loss of human and cattle lives, destruction / damage of dwelling houses, standing crops and other public properties. So he wanted to know from the District Level Officers of Line Departments, SDOs, BDOs, and Executive Officers of the Municipalities regarding their preparedness for this year i.e,2016.

The preparedness of different Line department is as follows:-

(1) Irrigation and Waterways Division :

There are three Irrigation and waterways Divisions working in this District --- 1. Hooghly Irrigation and Waterways Division,2. Lower Damodar Irrigation and Waterways 3. Howrah Irrigation and Waterways. These three (3) Divisions & some Sub-Divisions under them are working to manage flood protection of embankments of the rivers, water transport communication and water irrigation in the vast crop areas of Arambagh and other Sub Division areas.

The representative of the Irrigation and Waterways Division informed that:-

1. The Vulnerable areas have been identified and palliative measures on priority basis have been taken up .

Now the District Magistrate, Hooghly invited the MLA'S or their representatives to express their veins regarding mitigation of disaster in their Assembly constituencies. They expressed their opinion :-----

1. **MLA, Jangipara:-** Natural Disaster affects the lives of common people. He said that the relief work will be pro-active. He said that Dakatia Khal to be renovated. To avoid Water logging in Jangipara steps should be taken up.
2. **MLA, Goghat:-** Different khals, jala to be renovated. Long term plan to be under taken. Roads Rivers to be repaired. SDRF Fund to be utilised property.
3. The MLA, Balagarh stresses on repair of roads in his area.
4. **MLA, Haripal:-** The representative of MLA, Haripal told that the condition of culvert Chandaya ,Polba is dangerous and requires immediate repair/ reconstruction.
5. The Savadhipati, Hooghly Zilla Parishad said that the Hon'ble Chif Minister of West Bengal praised the District Administration & three tier Panchayat bodies for smooth work of relief operation for the last year flood. He also told that the condition of cannal of Jangipara & Uttarpara is dangerous and requires immediate repair/ reconstruction. The Savadipati requested the Executive Engineer to immediate repair said cannal.
6. The Karmadhyaksha, Hooghly Zilla Parishad alleged that illegal mud-cutting of Haripal Block will affect the Govt. Revenue as well as this will create disaster to this Block. The BL & LRO'S attention to be drawn in this regard. He said there is inadequate no. of culverts in 26 no. Bus Route. Incomplete Bridges to be completed at the earliest. He said that no. preparedness meeting has been held in the Haripal Block.

The District Magistrate, Hooghly informed the attending members the an amount of Rs. 40,77,193.00 has been received from the Disaster Management Department for District Relief Godown . The PWD has already taken up the matter and Tender notice has been issued. Work order to be issued soon and the said amount which has been kept in D.M'S P.L A/C will be given to the PWD Department for construction of the same Godown.

At the end of the meeting the District Magistrate, Hooghly emphasised the following points to take immediate action:-

1. He said that according to the Meteroligical Department the rain will be normal.
2. He alerted about the Drought which also may come side by side of the Flood.
3. He said that in the last year flood – relief distribution was fair.
4. Drainage systems to be checked and cleared.
5. To clear water from the inundated areas proper steps should be taken.
6. In case of SDRF the big plans to be taken up
7. Bridges culverts & roads to be repaired in quick response.
8. Relief Materials to be stored at G.P. & P.S. Levels.
9. He said that action is important, not presence.

In fine, the District Magistrate told that mitigation of flood situation in this District depends on the activities of the Irrigation and water ways Departments. They will have to inform of their activities in the vulnerable points in this year. There should remain a list of Saw Mills at the Block., Sub Division and District Levels so that saws are available for cutting of the uprooted trees on emergent basis. He told the District Officers of Line Departments to send the damage report in Form CA II immediately after the occurrence of any calamity with a copy of the same to the District Disaster Management Section without fail. At last he told all concerned to remain aware, well equipped for combating any calamity successfully.

At last the District Magistrate , Hooghly expressed his displeasure due to absence of important line Departments.

However he once again requested the attending members to take necessary stapes so that the sufferings of the affected people may be mitigated if any Disaster comes.

As there is no others discussion the meeting ends with thanks to and from the chair.

- Avg. Rainfall of Last 26 Yrs in Hooghly District – 1399.45 mm.

To cope up with drought the following actions may be taken:

Delayed monsoon and dry spell or drought.

CONTINGENCY PLANNING (for insufficient & Late Rain Situation) :

1. Varietal Choice (Aman Paddy) :

Variety should be chosen based on following criterias of the varieties like :

- 1) short duration (as per situation of rain availability & time availability for the crop) ,
 - 2) long & stout root-system ,
 - 3) very fast growth at seedling stage ,
 - 4) rolling of leaves at day time to minimize the transpiration loss .
- a) High Land situation – upto 10 cm. Water depth :
- i) 70-80 days duration varieties : Kshanica , Kalinga-3 , Heera etc.
 - ii) 105-110 days duration varieties : Rasi , Pravat , Narendradhan-97 , Tulsi , Renu etc.
 - iii) 110-115 days duration varieties : IET-12131 , Jamini etc.
- b) Medium-high Land situation – 10-20 cm. Water depth :
- i) 110-115 days duration varieties : PNR-381 , Satabdi etc.
 - ii) 115-120 days duration varieties : GB-1(Gotra-Bidhan-1), Kshitish, Ratna, IR-64, MTU-1010 , Lalat , Bikash , Krishna-hamsa , Pant-dhan-6 etc.
- c) In case of late planting situation (even upto 50-60 days aged seedlings) , long duration HYV of paddy like Swarna Masuri (MTU-7029) , Swarnadhan (IET -5656) , Sabita (CN-492) , Purnendu (IET-10029) , Jitendra (IET-10520) etc. gives comperatively better yield in respect of sustenance of production .

2. Method of cultivation (Aman Paddy) :

- 1) SRI (System of Rice Intensification) ,
- 2) Use of Drum-Seeder ,
- 3) ZERO-Tillage method ,
- 4) “Charat ” (Double Transplanting) method .

3. Fertilizer Management (Aman Paddy):

- 1) Use of organic manure like FYM/Compost @ 5 M.T./Ha or Vermi-Compost @ 2.5 M.T./Ha (or as much as possible) .
- 2) More N-fertilizer application should be advocated @ 20-25 kg.N/Ha over recommended dose , but not in potato growing fields where farmers are using very excessive dose of chemical fertilizers during potato cultivation .
- 3) In case of transplanting of over-aged seedlings (50-60 days) , 1/2 N may be applied as basal and rest N to be applied at 20 DAT (latest P.I. stage) .

4. Seedbed Preparation (Aman Paddy):

- 1) Preparation of Community Dry Seedbed upto 30-th June may be made for long duration varieties in a place with irrigation facility . Even wet seedbed may be prepared in the place with sufficient irrigation facility.
- 2) If monsoon rain is available within 10-th July , Wet Seedbed may be prepared for short, medium & long duration varieties. If monsoon rain is available after 10-th July , Wet Seedbed may be prepared for varieties with duration of less than 145 days.
- 3) Preparation of seedbed should be made in phased manner at 10 days intervals upto 10th. To 15th. August (latest) to go for transplanting in phases as per availability of rain water and land situation .

5. Transplanting(Aman Paddy) :

Transplanting should be tried to be completed within 31st. August . In case of late transplanting , No. of seedlings per hill should be more and spacing may be closer .

6. Irrigation :

Emphasis should be given on minor-irrigation facilities for possible restoration of late-rain situation . Whatever rain water available should be utilised efficiently checking its run-off.

7. Plant Protection(Aman Paddy) :

In case of late transplanting , Gall-midge , BPH , Leaf-roller , Sheath-blight incidence may be more . Close vigilance on pest-disease situation should be kept and appropriate plant protection measures should be taken accordingly .

8. In very upland situation , farmers may go for suitable **pre-rabi vegetables / early rabi-vegetables cultivation .**

9. Alternative crops :

In situation where aman paddy transplanting becomes totally impossible, farmers may go for alternative crops as compensatory crops during post-kharif & early rabi season. Out of pulses – kalai (sowing 1st.week of August to 1st.week of September), lentil (sowing mid-September to mid-November), Khesari (sowing mid-October to mid-November), etc.; Out of oilseeds – tori sarson (sowing September last week to October 3rd. week), yellow sarson (sowing 15-30th. October) & rai sarson (sowing 15th. October to 1st. Week of November), groundnut (sowing mid-August to mid-September) etc.; Others – composite / hybrid maize (sowing October-November) etc. may be chosen as options by the farmers as per their suitability.

10. Jute Retting : In absence of plenty of water, ribbon retting technology should be advocated for retting of jute maintaining fibre quality.

1. Preparation of short duration paddy seedbed in Govt. Farms @ 1 acre in phases with a view to provide o paddy seedlings to the affected farmers on no, loss or no profit basis.
2. Farmers are advised to transplant Aus crop as an additional coverage with available short duration varieties.

Long dry spell.

1. Rational use of irrigation water in minor installations.
2. Paddy field should be weed free.
3. No top dressing of nitrogenous fertilizer.
4. Field channel should be weed free and clean.

Early flood and to cope up with the situation

1. In such cases re-transplanting of short duration varieties of paddy after receding flood water may be done. On demand farmers may purchase seedlings from the nearest Govt. Farms.
2. After receding flood water nitrogenous fertilizer should be applied as top dressing @ 25 Kg./ha. For quick growth of plants and for this purpose, fertilizer minikit may be supplied to small and marginal farmers, Bargadar and patta holders.
3. Where possible pulse like kalai or vegetables can be grown.
4. Farmers should be aware of the above message through different mass media and leaflets.

Late flood and to cope up the situation.

CONTINGENCY PLANNING (for Late Flood Situation during September) :

1. No scope of Kharif rice cultivation .
2. Post kharif cultivation of Kalai (Black Gram) with varieties like Gautam etc.
3. Major emphasis to be given on early-rabi & rabi season crops :

Out of pulses –

- i) lentil (sowing mid-September to mid- November),
- ii) Gram (sowing 15-25th.November) etc.;

Out of oilseeds –

- i) Tori sarson (sowing September last week to October 3rd. week),
- ii) Yellow sarson (sowing 15-30th. October),
- 5
- iii) Rai sarson (sowing 15th. October to 1st. Week of November),
- iv) Groundnut (in case of Balagarh Block during last week of October to 1st.Week of November),
- v) Sunflower (sowing end of November to 15th. December in case of Balagarh Block) etc.;

Others –

- i) early rabi & rabi-vegetables,
- ii) composite / hybrid maize (sowing October-November) etc. may be chosen as options by the farmers as per their suitability.
4. Application of sufficient organic matter to avoid detrimental effects of sand infiltration, if any, in cultivable area to some extent.

1. **In case of late flood** from Mid. September to Mid. October and when there will be no scope of retransplanting paddy due to water logging or submerged condition of land, the affected farmers may be advised to go for Rabi cropping programme by exploiting residual moisture of the land.
2. To sow pulses and oilseeds in large areas in addition to normal area.
3. To grow wheat in a large area to cope up with the loss of cereal crops as far as possible.

Tentative requirement of seed/ Minikit other inputs in case of early flood.
